## CONDENSED PROSPECTUS OF THE

# Cobalt Silver Qu

INCORPORATED UNDER THE ONTARIO MINING COMPANIES ACT.

#### **AUTHORIZED CAPITAL** \$1,500,000

Divided Into 1,500,000 Shares of the Par Value of \$1.00 Each.

This Company owns and is operating THE STORMONT MINE (formerly owned by the Temiscaming and Hudson Bay Mining Company), one of the most valuable properties in the COBALT MINING DISTRICT.

#### DIRECTORS:

HON. FRANK R. LATCHFORD, K.C., President. R. W. CORDON, Vice-President.

C. B. TAYLOR, Banker, Treas, FRANK L. CULVER, Managing Director A. N. MORGAN, Esq.

#### LOCATION

The property of the Company is part of the Southeast Quarter of the north half of lot No. 7 in the fifth concession of the Township of Coleman, in the District of Nipissing, lying west of the right of way of the Temiscaming and North Ontario Railway, containing 18 3-4 acres, more or less, upon which is situated the "STORMONT MINE," and is also the owner of the southwest quarter of the north half of said lot seven containing 40 acres. These properties lie right in adjoining the Town of Cobalt, to the southwest, and on account of its being right adjoining the right of way its shipping facilities are unsurpassed.

#### DEVELOPMENT

There are two shafts in the mine, one 65 feet deep (perpendicular), and the other 90 feet deep, on the angle of the vein, with a drift cut along the vein for a distance of 100 feet, showing an immense ore body. A large sleeping house, blacksmith shop, ore house and shaft house are on the property, and it is a shipping mine.

A shipment was made during September, 1905, by the former owners of the Cobalt Silver Queen mining property to the Balback Smelting & Refining Co. of Newark, N.J., in which practically 23 tons of ore netted, above all cost of freight, cost of treatment, etc.,

A condensation of the original statement of said shipment is as Balback Smelting & Refining Co., Newark, N.J.:
Statement No. 7820. Silver Ore shipped from Stormont Mine (now owned by Cobalt Silver Queen, Limited.)

|    | on the by Coolin Sirver Queen, Dimited.)        |               |
|----|---|---------------|
|    | 38 bbls., weight Deduction for moisture         | 46,388<br>445 |
|    | Net after deduction for moisture                | 45.943        |
| 34 | Gross amount of silver, per ton                 | 2.000.52      |
|    | Net amount of silver, per ton, 95 per cent      | 1.908.00      |
|    | 62 5-8c per oz                                  | \$27,849,40   |
|    | Less freight and cartage                        | 282.19        |
|    | Total net receipts for which remittance is made | \$27,667.21   |

The above from the remittance sheets of the Balback Smelting and Refining Co. shows that practically 23 tons of ore shipped returned, above freight charges to Newark, N.J., cartage, cost of treatment, etc., the sum of \$27,667.21, or over \$1600 net per ton of the silver values alone, for which a check was remitted to the owners of the property by the Balback Smelting and Refining Company.

On 6th day of November, 1905, with no machinery in use and under the crudest possible mining facilities, the old management of this property (The Temiscaming and Hudson Bay Company) paid to its stockholders a dividend of 200 per cent. It is the purpose of the new management (THE COBALT SILVER QUEEN, LIMITED), with the installation of the latest improved mining machinery which has been ordered, to increase, if possible, the dividends to the shareholders.

This property is not a prospect, but a shipping mine. This is the mine which has made Cobalt famous.

This is the mine formally owned by the Temiscaming and Hudson Bay Mining Co., Limited.

This is the mine which has already paid the shareholders of the Temiscaming and Hudson Bay Mining Co., Limited, 200 per cent. on the par value of the shares.

Shipments from the district range from \$30,000 to \$50,000 net per carload of ore shipped to smelters in the United States. It is the purpose of the management to develope the property actively and intelligently, combining the development of the property with the extraction and shipping of ore. In order to purchase machinery and provide additional working capital, the directors of the COBALT SILVER QUEEN COMPANY, LIMITED, offer through their financial agents, COBALT CONSOLIDATED MINES, LIMITED, 75,000 shares of capital stock at par (\$1.00 per share), reserving the right to withdraw said offer or advance the price of

said shares at any time. The undersigned, COBALT CONSOLIDATED MINES, LIMIT-ED, financial agents, through their own experts, have fully investigated the holdings of the COBALT SILVER QUEEN CO., LIMITED, and consider the properties owned and operated by it as one of the best properties within the small proven section of the Cobalt mining distroct, and that the "STORMONT MINE," which is well known to every operator, can be classed among the most valuable in the district, and with the additional equipment and machinery it should produce unusually large profits for every investor of its stock. Subscribers for stock offered by the COBALT SILVER QUEEN CO., LIMITED, will be allowed a prior right to any additional issues

In fairness to all "First come, first served" will strictly be our policy. If you wish to secure a portion of this stock send in your

Chicago Gossip.

Ennis & Stoppani wired to J. L. Mitchell. McKinnon Building:

Wheat—Initial transactions in wheat were at higher prices, and the market appeared strong for a time, being influenced chiefly by the continued strength in coarse grains and higher outside markets. Later it developed that considerable long wheat was coming out, with wars joined in the selling, thus accelerating a downward movement, until a full cent had been taken off the price. We still advise sales on all hard spots.

hard spots.

Corn and oats were strong early on continued delay in seeding operations, consequent upon wet weather. Free selling developed, however, of a profit-taking nature, resulting in a decline of nearly one cent.

Is certainly widespread, there is absolutely no doubt of the occurrence of spontaneous cure in mice with cancer, no less than 101 clearly defined cases having been under our observation during the year."

Up to Jan. 1 the laboratory had employed 3500 mice for experimental purposes. Of these 2500 received injections of materials derived from the Jensen tumor and 550 fatal tumors were developed. Healthy mice have been placed in the same cage with those which were inoculated, and there is also evidence that some of the healthy animals have become infected. It is shown that spontaneous recovery diminishes with increasing age and dimensions of the tumors, and there is also evidence that the chance of recovery is greater when the growth of the tumor is lower.

Spontaneous cure in mice with cancer, no less than 101 clearly defined cases having been under our observation during the year."

Up to Jan. 1 the laboratory had employed 3500 mice for experimental purposes. Of these 2500 received injections

This is the age of steel. The man who intends to build a home, or remodel his present one, should cerstainly learn more about Metal Walls, Metal Ceilings, Metal Shingles, Metal Sidings. In the first place, they are absolutely fireproof and lightning proof. They are practically indestructable. They insure warm, comfortable rooms at the minimum cost for fuel. The walls and ceilings are made in an endless variety. ceilings are made in an endless variety of handsome designs and are, in themselves, sufficiently attractive to do away with the necessity of wall paper. The with the necessity of wall paper. The leading insurance companies appreciate the great value of Metal Building Material by making their premiums 1/2 LESS on homes constructed of metal. Full information as to cost, etc., may be obtained from The Metal Shingle & Siding Co., Limited, Preston, Ont., by mentioning this paper.
