

FROM MR. D. H. MACALLISTER, Hardley, Que.

I am a great admirer and enthusiastic advocate of your Latin method whose almost incredible claims I have verified by practical personal experience. I have been so much benefitted myself that I am always glad to recommend it to others.

FROM MR. W. B. STORMES, Newburgh, Ont.

Thanks for the manner in which I have been treated during the time I studied your course. I believe your method will do all you claim for it if it receives due attention.

FROM MR. E. B. ROSS, Lower Windsor, N.B.

I am highly pleased with the system. Although I have not given it a fair chance it has worked wonders with me.

FROM MR. I. W. LYNN, (Grenfel, Ont.)

I believe you have struck the key-note in teaching Latin, which is supposed to be a very difficult language to learn. Your method is simplicity indeed in comparison with the ordinary text-books.

FROM MR. R. J. MULLEN, Minesing, Ont.

I have found your course everything that could be desired.

FROM MR. W. H. LYNCH, Montreal.

I am pleased to state that I am getting along very well with my Latin and have certainly derived a great deal of benefit from your course, as I have been able to read Virgil, Books I., II., IV., Cicero, in *Catilinam* and *Pro Milone* since Sept. 1st, (4 months). On account of other work I have not been able to devote sufficient time to your course, but, considering the great benefit I derived from it under the disadvantages with which I worked, I am sure extraordinary results can be accomplished by close attention to the course.

FROM MR. FRANK A. BOLSER, Middleton, N. S.

Permit me to express to you my appreciation of your method of teaching Latin by mail. The close personal interest must be felt by every pupil taking your course. The method has certainly all the merits you claim for it, which, with the personal interest taken in the student, and the promptness of your business methods, must recommend the course to everyone.

FROM MR. J. E. GIBSON, Teacher, DON, ONT.

It has been a very agreeable surprise to me, to find that so thorough and practical a knowledge of Latin could be so readily acquired. As one with some experience as a teacher, I agree with you that yours is the correct and scientific method.
