# ENUE COME FROM?

To meet the regular expenses of administration, to pay war service gratuities to demobilized soldiers, to provide pensions for disabled soldiers and for the dependents of those who have lost their lives, as well as to carry out the program of public works which is being undertaken to relieve unemployment, it is estimated that the Dominion Government will require to raise this year a revenue of about

# 400 MILLION DOLLARS

Last year the Dominion Government revenue was 260 million dollars and was derived from the following sources:

Canadian Customs Tariff	116 millions
Special War Tariff	45 millions
Excise Tax	26 millions
Business Profits Tax	21 millions
Income Tax and other Sources .	52 millions
Total	260 millions

How is the shortage of 140 millions to be made up?

At the very moment when Canada is struggling with this problem the Western Grain Growers come forward with insistent demands for:

(1) "An immediate and substantial all-round reduction of the customs tariff."

(2) Free trade with Great Britain inside of five years.

(3) Reciprocity now, and free trade later, with the United States.

These demands are apparently made in the hope and belief that, if they are granted, those making them will be of a large part of what they call the "Burden of Taxation" which the tariff imposes upon them. That expectation can only be realized if the revenue raised by means of the tariff is substantially reduced. They may argue that under a lower tariff the volume of goods imported will increase, and consequently there will be no decrease in the revenue. But mark this—they want the duty removed entirely from implements, lumber, cement, oil and other articles of which they are large consumers. If the revenue is to be maintained under such a rearrangement of the tariff schedules, other classes of the people must pay what the Grain Growers will escape.

Passing to the next point, how would the Grain Growers provide for the probable shortage of 140 million dollars this year? They ask the Dominion Government to impose the following taxes:-A direct tax on unimproved lands, increased taxation on personal incomes, increased inheritance taxes and increased taxation on corporations.

Vacant land now pays taxes to the Municipalities and, in some Provinces, additional taxes to the Provincial Government. Income taxes are now paid by individuals to the Municipalities and also to the Dominion Government. Inheritance taxes are now imposed by all the Provinces, ranging in Ontario, for example, from one to twenty per cent. Corporations are now taxed as persons by Municipal Governments, Provincial Governments and the Dominion Government, and also pay special taxes to every Province for the privilege of being corporations.

Last year the tariff collected sixty-one per cent. of the total Dominion Government Revenue. Does anyone believe that the forms of taxation advocated by the Grain Growers can be increased sufficiently this year to obtain the revenue which would be lost by tariff reduction, and also the additional 140 million dollars required, without crippling industry, stifling business and throwing thousands of workers out of employment?

The United States has all the the forms of taxation advocated by the Grain Growers, but still finds it necessary to maintain its customs tariff.

If the Grain Growers are to escape almost all taxation, including the great increase caused by the war, what will happen to the people who will be driven out of business through having to pay not only their own taxes but also those of the Grain Growers? Will they try to grow grain? It is more likely that they will go to the United States to get work, as other Canadians went fifty years ago, and leave a population, chiefly farmers, ever growing smaller, to bear all the taxes, ever growing greater.

Again we ask where is the extra revenue coming from?
