Have the POTATO MAN Call

He will keep down your living costs and give you Good Potatoes.

You throw away frequently from one-fifth to one-quarter of the potatoes you now buy, don't you? This makes the good ones you have left pretty costly.

Let us bring you, each week, nice, carefully selected, hand-picked Potatoes, in peck packages or larger quantities, if you like. We will leave them right at your kitchen door, and guarantee them to be good. You pay no more for them, yet they are cheaper, because you do not waste potatoes.

Montreal Notes.

Montreal, April 7.—Domestic engineering and machinery company, which is taking over the Ontario Wind Engine and Pump Company, to issue \$500,000 stock in London soon.

Duluth superior traction earnings for March \$106,915, an increase of \$5,205; increase for the year to date \$25,841. Western freight rate decision expected soon.

Canadian Consolidated Rubber Company will show a surplus of approximately \$140,000 against \$385,000 the previous year.

Power earnings show increase of \$309,801.80 in surplus towards dividend over last year. For the year they should show about 1.8-2 p. c. over last year. Considering that most companies are showing decreases, this is undoubtedly favorable.

Grand Trunk fourth week March, dec.

Thin Folks Who Would Be Fat

Increase in Weight Ten Pounds or More A Physician's Advice

"It certainly gives most anything to be fat up to a few pounds and stay that way," declares every excessively thin man or woman. Such result is not impossible, despite past failures. Thin people are victims of mal-nutrition, a condition which prevents the fatty elements of food from being taken up by the blood as they are when the power of nutrition are normal. Instead of getting into the blood, all the fat and flesh producing elements stay in the intestines until they pass from the body as waste. To correct this condition and to produce a healthy, normal amount of fat the nutritive processes must be artificially supplied with the power which nature has denied them. This can best be accomplished by eating a Sargol tablet with every meal. Sargol is a scientific combination of all of the best strengthening, fat-producing elements known to the medical profession. Taken with meals, it mixes with the food and turns the sugar and starch and dietary rich, rich nourishment for the tissues and blood and its rapid effect is remarkable. Reported gains of from ten to twenty-five pounds in a single month are by no means infrequent. Yet its action is perfectly natural and absolutely harmless. Sargol is sold by good druggists everywhere and every package contains a guarantee of weight increase or money back.

Caution:—While Sargol has produced remarkable results in the treatment of nervous indigestion and general stomach disorders, it should not, owing to its remarkable flesh-producing effect, be used by those who are not willing to increase their weight ten pounds or more.

TO LET!

MODERN FLAT—Richmond street, near Waterloo; eight rooms. Modern plumbing and electric lights. Can be seen Tuesdays and Saturdays two to four.

WEST SIDE PROPERTIES

STORE—No. 79 Ludlow street, near corner of King; fine commodious store with large plate glass windows; an excellent stand for grocery or almost any kind of business. Possession at once.

LARGE BARN—On Prince street, immediately around corner from Ludlow, water in the building; size about 40x100. Suitable for warehouse or stabling. For further information, apply to

INCREASED DUTIES

Iron Industry Gets More Protection—Free Wheat and Agriculture Implements Refused—The Budget Speech

Ottawa, April 6.—It was a budget of explanations and pronouncements. Hon. W. T. White, minister of finance, read the major portion of his speech from manuscript, the pages propped up on a substantial looking reading desk improvised out of statute books. He started shortly after 8 o'clock this afternoon. He finished shortly before 10 o'clock tonight.

He spent the first two hours in explaining the period of Canadian depression, which had followed the advent of the Borden administration, was something the government could not help. The arrival of Premier Borden and his colleagues just happened to "synchronize" as it were, with the Balkan war and the phenomena of recurring economic cycles, about which Mr. White talked learnedly.

The explanation was all the consumer got out of it. The farmer fared but little better. Wire for his fence was exempted by a drawback from the duty placed upon hitherto free wire rods. He just escaped in that case. He was told, however, that he could not have free wheat because the millers and the railways had to be considered first.

The Liberal idea of free agricultural implements was scouted. Instead, Hon. Mr. White told him that all that could be done for him was to reduce the duty on two implements, binders and reapers from 17 1/2 per cent to 15 1/2 per cent.

Manufacturers Fared Well.

The manufacturers, however, fared well. All the tariff changes were specifically stated to be for their advantage. In essence, the tariff has been subjected to a minor revision upward, having the interests of the manufacturers in view. The iron and steel industries got the best alloy, while wire rods, brass sheets, bars and rods, caustic soda, hyperchloride of lime and other commodities, heretofore upon the free list, are to be subjected to customs tariff.

Tariff increases are made in building stone and other treated and manufactured articles. There are no outstanding reductions. The Borden government has run true to form.

Although the finance minister was able to announce a surplus of approximately \$84,000,000 of revenue over ordinary expenditure for the fiscal year just ended, the other aspects of the statement were not nearly so encouraging. With a revenue less by some \$4,000,000 than the revenue of the preceding year, and still falling, there was coupled a total increase in expenditure of nearly \$40,000,000, and an increase in the net debt of some \$19,000,000.

The total expenditure of the year was \$188,000,000, while the total revenue was estimated at \$168,000,000. The increase in consolidated fund expenditure, or for the ordinary cost of administration has been \$14,500,000.

During the first two complete fiscal years of the present government the total increase in the ordinary cost of administration has been nearly \$28,000,000. For the coming year Mr. White thinks that there will be a gradual improvement and that the worst of the financial stringency is over. He declared, however, that there must be still prudence and caution, and predicted more borrowings and a further increase in the national debt.

The principal change in the interests of the iron and steel industry was the imposition of a duty on wire rods, which are now on the free list. This duty will be 22 1/2 per cent. British preference; and \$2.50 per ton general and intermediate. Mr. White explained that this might hit the nail manufacturers, especially, who were the chief opponents of the imposition of the duty. However, if it was found that the iron and steel men at Sydney and Hamilton took advantage of the duty to raise prices to the nail manufacturers the government would take steps to remove the duty.

There was also an increase in the duty on rolled iron and steel beams and other merchantable mill products, and some changes of relatively less importance with regard to drawbacks to Canadian manufacturers on imported pig iron and bituminous coal imported by coke oven proprietors for foundry or metal smelting purposes.

One of the most interesting of the tariff changes is the adoption of the British and United States legislation prohibiting after January 1 next, the importation of algerettes, osprey plumes, and feathers, quills, wings or parts either raw or manufactured of wild birds. This prohibition, however, does not apply to ostrich, pheasant or peacock plumes, or the plumage of birds used as diet.

Some of the other changes are as follows:

On desiccated coconut, the British preference is increased from 3 to 5 cents. Amyl alcohol used for metal varnishes, is put on the free list.

Trade journals are allowed to bring in loose inserts of fashion plates, etc., free.

The duty on caustic soda and hyperchloride of lime is increased by 7 1/2 per cent in addition to the general tariff, and by 10 per cent under the general tariff. There is a considerable list of jobs cloth, yarns used for the manufacture of socks and stockings and other items used as raw material of woolen manufacturers included among the commodities on which a drawback of 50 per cent is allowed when manufactured in the finished product.

In all there are some sixty changes most of them of a very minor character in the whole seven hundred odd items in the present tariff schedules.
