ELECTRIC COMPANY WISH A SETTLEMENT

(From Saturday's Daily). J. Buntzen, menaging director of the B. C. Electric Company, is in the city. He has come to Victoria to look into all questions affecting his company in this city, and will remain several days holding conferences with A. T. On Monday, when the question of the city's requests for amended legislation relative to water comes before the gov-ernment, Mr. Buntzen intends to be liminary questions are settled the finances will be available to carry out present so as to put forward the situation as it affects his company.

When interviewed to-day with respect to contemplated improvements in this city to the systems controlled by the first thing to be settled was this one of the city's right to come into direct competition with the B. C. Electric in supplying power. His company, he says, has big things in view in Victoria representing undertakings per-haps similar to those which were in-stalled about Vancouver. But before such a move is made it will be neces-sary to settle the question whether the investment contemplated shall, be interfered with by municipal compe-

Now that the investment is giving a profit it would be unfair to have the city take it over at its actual value or even a material advance on that. The long years of loss should also be

taken into account.

Referring to the argument that the city sought to sell power in order to help in paying for the great expense incurred in putting in an adequate water supply system, Mr. Buntzen sugrested that if that was what was wanted, arrangements might be made by which the company would get powe

rom the city.
With a settlement of the whole ques tion along somewhat similar lines to that aimed at in Vancouver a few years ago the B. C. Electric Company vill be prepared to undertake some vast enterprises in connection wit heir work here looking to the acquisition of power for an extension of the iness. Until these questions are settled of course it will not be possible extend the business to any great expany is about up to their capacity and additional power must be obtained be-fore extensions are made. A LAZY LIVER

May be only a tired liver, or a starved liver. It would be a stupid as well as savage thing to beat a weary or starved man because he lagged in his work. So in treating the lagging, torpid liver it is a great mistake to lash it with strong drastic drugs. A torpid liver is but an indication of an ill-nourished, enfeebled body whose organs are weary with over-work. Start with the stomach and allied organs of digestion and nutrition. Put them in working order and see how quickly your liver will become active. Dr. Pierce's Golden Medical Discovery has made many marvelous cures of "liver complaint," or torpid liver, by its wonderful control over the organs of digestion and nutrition. It restores the normal activity of the stomach, increases the secretions of the blood-making glands, cleanses the system of poisonous accumulations, and so relieves the liver of the burdens imposed upon it by the
