

THE WEATHER.
 Maritime—Moderate easterly to southerly winds; mostly fair and warm.
 Toronto, May 21.—The weather today has been fine throughout the Dominion, except in Northern Ontario and at Edmonton and Battleford, where showers have occurred. The temperature has been exceptionally high in British Columbia and in Southern Ontario where it exceeded 80 degrees, with the highest 87 degrees at Toronto.

AROUND THE CITY

Labor Committee
 The labor committee making arrangements for the trades congress convention met last evening and wound up affairs in connection with the recent fair.

Advance Arrangements
 A meeting of the committee appointed by the local medical society to arrange for the convention of the Canadian Medical Society was held last evening and the arrangements were advanced a stage.

Industrial Opportunities
 Canadian Machinery will have a special article on the industrial possibilities of St. John in its annual expansion number. The information for this article was supplied by the Board of Trade.

Valuators Meet.
 The valuers appointed at the last meeting of the municipal council had another session yesterday and made preparations for calling for tenders for the printing of forms on which the different valuations are to be made.

Shad Plentiful
 There were quite a number of shad in the local markets yesterday. Local fishermen have been hard at work for some time past and have been making fair catches of gasperau. It is rather early for shad, but a good many of this fish have been running in the last few days.

Kiernan Kelly Here
 A welcome visitor to the city yesterday was Kiernan Kelly, for some time manager of the St. John Opera House. Mr. Kelly is here in the interests of the Gwent Welsh Male Singers and the stars of the Boston Opera Company both of which attractions are among the bookings for next month. Mr. Kelly was kept busy last evening acknowledging the greetings of many friends. Since leaving the city last autumn he has been chiefly concerned in the management of the Boston Opera Company but has also handled several other attractions in the New England and middle states.

COMMENTS ON THE PROGRESS OF ST. JOHN

Board of Trade Secretary deals with many matters of interest — Seek Maple Sugar.
 A very simple yet comprehensive definition of city planning is that given by the Chief Engineer of the Board of Estimate of New York. He says: "City planning is simply the exercise of such foresight as will permit the orderly and slightly development of a city and its environs along rational lines, with proper regard for health, amenity and convenience, and also for commercial and industrial advancement."

Beautifulizing the City.
 Corporations of the proportions of the Canadian Pacific Railway company are usually referred to as "giant corporations," but in view of what the C. P. R. has done and is doing towards beautifulizing Canada by providing a path way of flowers across the continent, this term seems scarcely applicable. No corporation can be regarded as soulless that loves to beautify its nature among its employees, even though it should do so for the dollars that are in it. If the city of St. John could be persuaded to follow the example of the C. P. R. in this respect—if they would plant a flower wherever there was room for one—it would go far towards making the city beautiful.

Re Paving Schemes.
 The Mayor of Edmonton, Alberta, was recently upon by a workmen's delegation, which asked that immediate relief and employment be given the unemployed in the city. One of the committee made the statement that there were 4,500 people in the city of Edmonton starving. The Mayor told the delegates that the city would not embark on any programme of feeding the unemployed or spending money to provide work for them. He advised the men to go into the country and work for the farmers. It has been suggested that this labor demonstration was designed to force the Mayor to adopt a paving plan which a good many citizens do not approve of. Paving schemes are troublesome things, whether in the east or west.

Clean Up Crusade.
 St. John needs something more than a clean-up day—it needs a clean-up crusade, to extend over the whole season. Cleaning up should be a continuous performance, and it should include the whole city. If public spirited residents on each street would undertake a campaign of effort and of education along this line we would soon have a clean city. The effort is worth the making.

Maple Sugar.
 Secretary Armstrong has received a letter of enquiry from the Chamber of Commerce, of Norfolk, Va., asking for names of producers or wholesale shippers in tons or carload lots of genuine maple sugar. The writer states that local consumers find this sugar to be just what they want, but they have a difficulty in getting it through regular channels.

Pleasant Sail on the River.
 The steamer D. J. Purdy will leave Indiantown Monday, May 25, at 8:30 making regular stops and will connect with the steamer Victoria at Hamstead, which will bring the passengers back. Meals served on board. D. J. Purdy, manager.

Victoria Day Special
 The Intercolonial Railway will run a special suburban train on May 25, leaving St. John at nine a. m., arriving at Hampton at 9:55, making all intermediate stops. Returning will leave Hampton at 10:15 a. m.

DISCREDIT REPORT IN TELEGRAPH

Regarding Activities of Sardine Packers — Fishermen Experiencing a Good Year—Big Catches
 The report which appeared in the Telegraph recently to the effect that only one New Brunswick sardine packer was opening his factory this year as the sardine fishing was expected to be a failure is discredited by a fisherman from down the coast, who was in the city yesterday. While the season for sardines this year has been backward, fair large schools have struck in at various points in Charlotte county.

One well down the shore stocked over \$600 in one day, and several catches of over \$300 for a single tide. As high as \$28 per hoghead is being paid by the sardine packers, and at such prices the fishermen will not need to make many catches to have a profitable year. It is not so many years ago when fishermen counted themselves lucky to get \$2.00 a hoghead.

FIRE HORSES CRASH INTO BIG STREET EXCAVATION

No. 5 Engine Horses in Responding to an Alarm From Box 121 fell into hole in Victoria Street—Effect Rescue After Much Difficulty—One Almost Smothered.
 There was considerable stir about eleven o'clock last night when the fire alarm pealed forth the signal from box 121 at Stetson's mill, Indiantown, and immediately on top of this alarm came another from Box 131 on the corner of Victoria and Elgin streets. The first alarm took the No. 2 chemical, No. 3 hook and ladder, Nos. 4 and 5 hose and engines along with the No. 2 Salvage Corps. When 131 came in it took No. 2 and No. 3 hose wagons from the city proper.

The alarm from box 121 was for a slight blaze in the roof of a cooper shop at the mill and it was extinguished before the firemen reached the scene.

It was while No. 5 engine was speeding along Victoria street with Driver Parks holding the reins over the two horses that he met with a bad accident. Near the corner of Victoria and Elgin streets there was a large, deep excavation in the street where city workmen had been employed making repairs to a water pipe. The place was lighted on each corner of the excavation by lanterns, and there was also an arc light on the corner of the streets. For some reason Driver Parks drove the fire horses through the fence, which with the lanterns was knocked down and the two horses plunged into the deep hole. The steamer was left on the edge. The two animals, one piled on top of the other,

were struggling to get clear, and to get assistance the alarm was sent in from Box 131 and the firemen hastened to the scene of the accident.

With the aid of ropes the firemen, after considerable hard work managed to pull the horse which was on top of its comrade to the street. It was led away uninjured to the fire station. It had been rescued just in time for the horse lying underneath was slowly smothering to death. With one horse pulled out of the hole it was not long before the second one was rescued.

Other than a few scratches the two animals were uninjured.

Chief Blake and Commissioner McMillan were present while the animals were being rescued.

Department on Jump
 The fire department was kept on the jump yesterday when they responded to one still alarm, and three bell alarms. The still alarm was at 12:45 in the afternoon and was sent in for some smoke backing down a chimney in Dr. Beattie's residence on Charlotte street, and other than the house being filled with smoke no other damage was done.

At 6:45 o'clock last evening an alarm was sent in from box 17 for a fire on the roof of John Graham's house on Erin street. The fire was quickly quenched and the damage caused will be covered by fifty dollars.

It is not so many years ago when fishermen counted themselves lucky to get \$2.00 a hoghead.

ESTABLISH RECORD FOR THREE YEARS

Citizens Greet Warm Weather With Joyful Spirits — Rain Sorely Needed in Province
 Yesterday there was a pleasant and welcome change in the temperature and citizens were given the first real tap of summer weather. The apparent warmth of the atmosphere, following a spell of rather chilly weather for this time of the year, made the day seem all the warmer, and the coats and other accompaniments of cold were doffed and discarded for a year.

Those who have been grumbling about the unseasonable cold weather had no cause for complaint yesterday for the thermometer crawled up to a temperature of seventy-one degrees, and established a record for warm weather during the month of May since the year 1911. The highest temperature registered at the Meteorological Observatory at the customs house was seventy-one degrees, and following a record for the past three years. On the twenty-second day of May, 1911, the official thermometer registered the temperature of seventy-two degrees.

The city and the province in general is now experiencing an unusually dry spell, and to aid vegetation and assist the lumbermen to carry on operations rain is sorely needed. It was learned from D. L. Hutchinson at the observatory last evening that the total rain fall since the twenty-second of last month has only been one-third of an inch, and this is reported as unusually dry.

At 9 a. m. o'clock yesterday the official registering at the observatory was 52 degrees, and at 3 p. m. the reading was 65 degrees, while at eight o'clock last evening the temperature had risen to 75 degrees. The highest temperature was reached around noon when the thermometer registered 71 degrees.

The highest temperature reached last year, during the month of May, was on the third day of the month, when the official registering showed the temperature as 65.5 degrees. During May last year, up till 22nd, the total rainfall was one and a quarter inches, and during the whole month in the year 1913, there was a total rainfall of three and seven-eighths inches. On the twenty-first day of May the maximum temperature was 53.5 degrees, and the minimum temperature 39 degrees.

During the month of May this year the lowest temperature was 34.5 degrees.

During the past few days the temperature has been comparatively high in inland districts, but sections of the province near the sea have been cool owing to the south western winds. Dr. Hutchinson says that fog has not been prevalent so far this season, but that of late the atmosphere has been clouded owing to smoke from forest fires.

The change in the temperature was yesterday received appreciatively by the residents, and those who had been clinging to the overcoats discarded the same and prepared for real summer weather. It is expected that from now on the weather will be fairly warm.

WILL REPRESENT TRADES COUNCIL IN COMMUNITY WORK

The regular meeting of the St. John Trades and Labor Council was held last evening. In response to a letter from the promoters of the proposed community council J. L. Sugrue, F. Hyatt and C. Stevens were appointed to represent the council at the meeting to be held in the High School on the 28th. Another resolution was adopted in reply to a request from Calgary urging the government to take up the matter of providing technical education for the working classes.

A letter was received from the post office department stating that the post office at Indiantown was supposed to be open from 8 m. to 7 p. m., and to 8 p. m. on Saturday.

The secretary was instructed to try and secure further information as to the taking off of the train at five o'clock by which workmen at Rothesay were accustomed to come to the city after finishing their day's labor.

Other matters of a routine nature were dealt with.

RARE BARGAIN VALUES IN TRIMMED HATS AT MARR'S

Hundreds of eager bargain-seekers attended the week-end sale of trimmed hats, which opened yesterday morning at the showrooms of the St. John Hat Company, where rapid sales and delighted buyers were the features of the day.

These beautiful millinery creations, as already announced, represent the most favored of this season's styles in feminine headwear, and were made to sell at \$5.50 to \$5.00, but during this sale, are offered at the marvelously low figure of \$2.00 each.

Pharmaceutical Exams.
 Notification of the dates set for the pharmaceutical examinations appears in the notice on page five of this issue.

FISHING TACKLE
