

# NEW YORK EXCHANGE.

VANDERBILTS BOOM—B. R. T. ADVANCES 16 POINTS IN TWO DAYS—GRANGERS FIRM—LONDON BUYS.

Now York, March 29.

The market for Americans in London opened good and strong, Union Pacific pfd. and St. Paul both selling ~~x~~ d are fully up to the New York parity. The Pacific stocks are features, N. P. Com. selling equal to 53½ bid. on large transactions.

Cheap as capital is and it promises to be so for a long time, Wall Street refuses to believe that the market valuation of the Vanderbilt stocks is based entirely upon confidence in the stability of the present rate of dividends. It is reasonably assumed that if even there were no great advance upon the present value of traffic of New York Central system that Co. upon the completion of all its refunding and consolidation plans to return 6 p.c. annually to stockholders with the regularity of interest payments on a government bond.

The long sustained strength of this stock in the face of the maintenance of dividends at only 4 p.c. together with the constant tendency upward of the Northwest and Omaha stock persuades many shrewd capitalists that there are still schemes in course of execution by the Vanderbilt interests reaching even further than the great stroke by which the L. S. and Mich. Cent. Roads were welded closer to the parent stem, and this conservative element in the street refuses to disbelieve that there will be important future developments connected with the Union Pacific which will look toward the establishment of a Vanderbilt trans-continental system.

B. R. T. had a further remarkable advance, but upon careful investigation we cannot learn that anything definite is impending in the affairs of the company.

The strength of the Vanderbilts continues a feature of the market, which encourages purchasers elsewhere.

Union Pacific shares have been very strong, and while no definite information is obtainable, the best opinion in the Street is that the much exploited and much denied N. Y. C., N. W. and Union Pacific deal will be carried out along the lines originally indicated.

The Northern Pacifics have been very strong also, with no particular gossip attending their course, aside from the large earnings the company is making.

The advance in Sugar appears to be wholly a movement against the more or less permanent short interest.
