The "Bissell" Requires No Centre Bearing

And for that one reason alone it will pay you to buy the "Bissell" Roller.

A centre bearing, you know, will, in the course of time, cut the shaft in two, as it is utterly impossible to keep out the dirt. But, as the single heavy axle of the "Bissell" passes entirely through the three drums and is supported by the centre drum, no centre bearing is required. Oiling is

hardly necessary with the "Bissell," as the axle revolves with the drums there is no friction.

Nothing complicated about the construction of the "Bissell." Nothing

to get out of order. In fact, the "Bissell" is so much better it

will be wise to get our **Free Booklet** and learn more about it.

These Frictionless Bearings

Make the **EMPIRE** Easiest Running
Cream Separator

Not only the **cleanest skimming**, but the **easiest running**—the greatest saver of elbow grease—is the Frictionless Empire Cream Separator.

With its **lighter bowl**, its **simpler driving mechanism**, its **Frictionless Bearings**, the Empire revolves so much the easier that a **child of ten**, can get it whirling at full speed with a few turns of the handle.

The bowl of the Empire spins on the point of its spindle. As the point of the spindle rests between and touches nothing but the three balls of the Frictionless Bottom Bearing (see bottom arrow) and automatically adjusts itself to the proper center, friction—wear—is reduced to the smallest fraction.

The Frictionless Neck Bearing (see top arrow) eliminates all friction on the spindle—makes the Empire easiest, smoothest running. If there was friction the Empire Neck Bearing would, like others, require a large quantity of expensive oil instead of just ten drops per day.

To prove to you that the Empire runs easiest we will allow you to try it **free of charge** in your own dairy, but in the meantime drop us a post card for our

Free Illustrated Dairy Book

which tells how to make your cows pay better.

Every Frictionless Empire sold under the **strongest kind of a Guarantee.**
