War Eagle and Centre Star Power Question.

SHIPMENTS MAINTAIN AVERAGE

o'umbia-Kootenay to Go Down 1,500 Feet-New Compressor For (h) Le Roi-No. 1 Getting Ready to Ship-News of Cany of the Camp's Working Properties.

Outside of the camp, and particularly Outside of the camp, and particularly in the east, it has been rather broadly stated that the interests of the War stated that the interests of the War Eagle mine were being sacrificed in the and additions. Had the new plant workinterest of the Centre Star, or to put it ed smoothly the War Eagle would not in another way, that the development of only have had plenty of power, but there in another way, that the development of only have had pienty of power, but there the War Eagle was being hindered and would have been additional power availdelayed by power being diverted and used delayed by power being diverted and used in the development of the Centre Star would have been additional power available for the Centre Star. To obviate the difficulties arising from this quarter and to hasten matters as much as possible, former mine. Some of the eastern and the management have arranged as particularly the Toronto papers have had last week, the following temporary proand the news has become a current topic in this city. It will be seen from the drill compressors are being grouped on statement of the general manager of both companies how very wide of the truth capacity of 35 drills. The ventilating alleged statement of fact is, and Mr. Kirby's explicit account of how matters No doubt transactions in stocks are at the root of the whole question in the

Mr. Carlyle's weekly notes on the forward movement of the B. A. C. properties are worth more than passing notice, particularly in regard to the Columbia-Kootenay and Number One, while the increase of power to be supplied to the present Black Bear compressor is gratifying evidence of the continued confidence in all the properties concerned, which will obtain their power from this source when the new compressor is completed.

The surface find in the Deer Park, which has been explored for a depth of 20 feet, has given a new impetus to south

belt properties. The news of the camp generally for the past week has been of an encouraging nature, but no strike of importance other than the Deer Park find has occurred Mr. W. B. Wilson, the new superintenthe new superintendent of the Le Roi assumed his duties early in the week.

The Ore Shipments.

The total output for the past sever days from Rossland camp is almost the same as the previous week and, consider ing that the Centre Star is not included in the list, it is well up to the expected average. In all 4,669 1-2 tons, it is estimated, were sent out. The Northport smelter obtained 2,476 tons from the Le Evening Star and Mountain Trail, on September 1st, but the record of it only got here this week through the customs house return. The Trail smelter received 2,173 1-2 tons from the War Eagle and Iron Mask, while 20 tons went to the Hall Mines at Naless from the Would be at least 10 reasons. to the Hall Mines at Nelson from the

Columbia-Kootenay.

The shipments for the week ending 23rd September and year to date (esti-mated) are as follows:

mated) are as ronding

Le Roi.-A 40-drill Rand compressor of the latest type has been ordered and will new gallows frame will be erected and be placed end on to the present Black hoist installed on the new shaft. The present giving the combined Bear compressor, giving the combined plant, when completed, a capacity of So on the new ledge to a depth of at least drills, and making one of the most efficient compressor plants in the world. The whole plant will be completed and in running order in about five months' time. It is intended to pipe all the other B. A. C. properties except the Columbia-Kootenay, and to supply them with power from this source until further power is needed. Twenty-five Rand drills of a large type have been ordered to replace 20 drills now working in the mine. Only Rand drills Jeansville pump has been dered for the Le Roi.

the water in the mine will drained into the 900-foot level and raised to the surface from this point by the It will be of very little use to the manpump in question. Three new pumps of agement this winter in getting supplies same make have arrived here and into the property. have been put in place on the No. 1, Nickel Plate and Great Western. These pumps are now used for the first time in the camp, and are regarded by the manage- and lower tunnels. The operations are ment as the best pumps obtainable any where. What is known as the Black Pear electric shaft, now down nearly 700 feet, ther during the week and is now in for a is being sunk as rapidly as possible and is being converted into a three compartment shaft. It is intended to sink at this point to a depth of 1,400 feet or 1,500 feet. Sinking will not be maintained in the old shaft below its present 900-foot level at all events, for the present. In connection with the progress recently attained in the Le Roi, it may be mentioned that Mr. R. E. Palmer, M. E., who, under Mr. Carlyle, has had special charge of the Le Roi, acting as superintendent, pending the appointment and arrival of M. W. B. Wilson, in addition to his other duties, has point a three-compartment vertical shaft been most successful in pushing the de-

The result is that if anything the Centre Star power is being used to help the War when ever the power in that Eagle. mine falls short. "The big War Eagle compressor had a

run with both sides during the week, and will be tried again during the coming week, when further action will be deteron. A temporary hoist is being rigged up at the 250-foot level in case of accidents to the big hoist, one side of which is only being used. Every effort is being made to keep up and advance the monthly output of the mine."

I. X. L.-Good progress is being made with the development of this mine. There is ore in the faces of the lower and upper drifts. Both have been driven along the vein for a distance of 140 feet. The faces look better than ever and for a number of feet the ore has been of a high grade. The ore that is taken out during the progress of the work is being sacked and it has averaged for a considerable distance about \$100 to the ton, and there is some of it that will go higher. The intention is to shortly go to a point 100 feet further down the hill, for the purpose of driving another tunnel, as to tap the ledge at a lower point. About the middle of the present week a carload of ore will be sent to the smelter creek. The shipment mentioned was made on September 1st, but the record of it treatment rate of \$4.50 per ton that the would be at least 10 per cent. In the smelter there would be no appreciable

Returned From the Slocan.

Mr. Hugh Hastings, M. E., has just Deer Park.—During the week a survey has been made on the 300-foot level for the purpose of determining the direction in which a crosscut will have to be run on that level to tap the newly found ledge. An air pipe line has been laid from the compressor to the new surface find, a distance of 406 feet. The determining the direction is to work them all winter. A trail has been built by the government and Martin. M. P. D. has find, a distance of 406 feet. The determining the direction in this city. In the Wilson creek vicinity, there is considerable work in progress. Forces of men are working the Jeanette that good results have followed in almost every instance in that section where development work has been done on proper lines.

Mr. James M. Martin. M. P. D. has been built by the government and Martin.

been built by the government and Mar-tin Bros. from Rosebery to the head of Wilson creek. A number of prospectors are going into that country and finding

which there is an ample quantity.

Mr. Hastings visited the head of Cariboo creek. Work is in progress on the Silver Queen which is owned by the Silver Queen Mining company. It is anticipated that the ledge will be struck in a few deys. The Chieftain, which is owned by Messrs. Patrick Burns, the butcher, and McKenzie, the railway contractor, is being steadily developed. The Millie Mack group in this section is not being operated. It is a good section, as ther are great showings and fine ledges, and the facilities for getting into the claims are better than in most places.

Gold Rock Found Near Midway.

About two and a half miles south of Midway, in the Colville reservation, strike of gold-bearing quartz has recently been made on the Golden Chest, on which an open cut was being run. The character of the ore is identical with the free milling quartz found on Myers' creek. The width of the ledge is not yet known. The hanging wall is porphyritic. The ledge can be traced by croppings the entire length of the claim and also, onto the adjacent claims, the Velvet and the Nettie. The properties are owned by C N. Owen and Robert Lockhart, both Midway. Work is being pushed on the open cut at present.

On the other side of the same moun

tain, two years ago, Dan Maclun staked the Hazel, on which he has already done considerable development work and from which he has obtained rock assaying from
