A Big Ledge Found on the 300-Foot work will be started again. Level of the Velvet.

What is Needed Now is a Road Over Which the Rich Ore of This and Other Aines of That Section Can be Hauled to the Railway and Marketed,

Work on the Velvet on Sophie mountain continues to bring forth the best results, and the conviction is growing that it is one of the best mines in the Trail Creek division. Mr. J. L. Morrish, manager of the Velvet, was in the city yesples of ore that ran very high in copper, and from the appearance carried at least two ounces of go d. When asked where 12 feet of ore like the specimens had been open up the ore shoots on that level. ound. Mr. Morrish was reticent as to the values, but said it was similar to that found in the other parts of the mine; that it was ore of a pay grade. The ore throughout the mine is generally of a higher grade than any of the other goldcopper mines of the camp, The ore Lody has been opened on three levels in inc mine. On the 160-foot level, where the ledge is from two to four feet in width; on the 250-foot level, where the vein is eight feet wide, and on the 300-foot level. where the ledge is 12 feet in width.

Mr. Morrish said that there was ample ore in sight in the mine to justify shipping as soon as the necessary transportation facilities had been provided. He had received instrctions he said from the board of directors of the Velvet Mines, limited, in London, to construct a wagon road from the mine by the most convenient and economical route to the railway This road will probably be down the we-t slope of Sophie mountain, and from thence along Sheep creek valley to a junction with the Red Mountain radway at a point for the plaintiff.
only a short distance from Norshport. It | W. Walz vs. G was his intention, he said, to commence the construction of this road as soon as the weather settled. The object to be attained by the building of the road will be so as to haul out ore and transport in machinery and supplies. The intention is to put in, as soon as the road is completed, a large compressor plant.
In speaking of the road which the gov-

ernment commenced work on last fall, by clearing the right of way of trees and brush, he said that it was to all intents and purposes, useless for the transports tion of freight, owing to its steep grades.

A good road could be built over the route via the Sheep Creek valley, and this, he thought, offered the only possible route over which a wagon road could tap the west slope of Sophie mountain and also Sheep Creek valley, and Nigger mountain on the west side of Sheep Creek valley. Mr. Morrish is also manager of the Port

land, which is the adjoining property to the Velvet. The tunnel on the Portland is in for a distance of 500 feet, and in this has been garnisheed. a ledge six feet wide of pay ore has been met. The shaft has been sunk from the ics' lien. W. J. Whiteside appears for a mine as the Velvet.

Slocan Ore Shipments.

The total amount of ore shipped from the Slocan from January 1, 1899, to June 30, 1899, was 15,113 tons. From July 1, 1899, to December 31, 1899, the shipments were 4,310 tons. Following are shipments from January 1, 1900 to March 17th: Week. Total.

WINNIPEG TO RESUME.

Operations Will Be Recommenced About Two Weeks.

The Winnipeg mine, which closed down few weeks ago, as it was given out then pending negotiations for consolidation with the Golden Crown, will resume operations shortly, says the Phoenix Pionee This positive statement was given out by D. H. Beecher, the treasurer of the Winipeg Mining & Smelting company. Mr.

Beecher is a prominent business man of

irand Forks. North Dakota, and has just

made a trip of inspection to the mine He informed a representative of the Pio eer that he was much pleased with the opearance of the property, and the rethe expectations of the stockholders. The Winnipeg, which has been continuously worked for two years and a half up his time, is developed to the 300-foot level, and has about 2,000 feet of work done thus far. There are large ore reerves to be drawn on, from which steady shipments will begin as soon as operations this would be at the time the steel was states specifically that no pressure is to laid to the ore dumps, but Mr. Beecher be used in soliciting subscriptions.

his return, where he will be married. He is expected back in about two weeks, when

Mr. Beecher is a prosperous banker in his North Dakota home, and has other interests in the Boundary. One of these is the Homestake, adjoining the Emma IS RICH IN GOLD AND COPPER in Summit camp, which will be actively developed this summer. The corporation owning it is the Boundary Homestake Mining company, limited.

In regard to the proposed consolidation with the Golden Crown, Mr. Beecher stated that negotiations were still pending between the officers of the two companies, but as yet there was nothing that he could give out for publication.

Work on the Referendum.

on the Referendum, in the Nelson divis terday, and he had with him some sam-les of ore that ran very high in copper, from water, but, he reports that he finds he is able to handle it and to keep at work. The shaft is now down to a the specimens had come from he replied depth of 90 feet. When 100 feet depth that on the 300-foot level at a point in a has been reached the intention is to crosscrosscut six feet distant from the shaft, cut to the vein and drift along it, and

GRAND FORKS NEWS.

Mining Development in the Camps in Boundary District

ment of one ton of ore to England for treatment. It is owned by an English ompany.

Drifting is now in progress at the 100 foot level on the Norfolk in Central camp, owned by the London & B. C. Gold Felds. The C. P. R. freight and treatment rate from the Boundary to the Trail

melter is \$7 per ton. Development work will be commence shortly on the Red Rock and Bald Eagle

claims in Greenwood camp.

New offices have just been erected at the B. C. mine in Summit camp. The new poiler and engine house is nearing com-

pletion: Sixty miners are engaged, and th working force will be doubled as soon as the plan, received from Montreal, is installed. The 250-foot level has been

Work will be resumed shortly on the Winnipeg, in Wellington camp. Over 2,000 feet of work has been done on the property, and the 300-foot level has been reached. Nine car loads of ore have been

shipped to the Trail smelter. Seventeen men are employed at the War Eagle in Greenwood camp. The main shaft is down 90 feet. The new compressor and hoist is working satisfactorily

A Splendid Collection

The mineralogical, lithogical and geo logical collection, which was purchased by Hon. C. H. Mackintosh from Mr. E. J. Lilijegran has been placed in position the board of trade rooms, where it at tracts much admiring attention. It probably the most complete collection the kind in British Columbia. T mineralogical collection comprises 259 specimens, including many that are rare and novel. The lithological collection comprises nearly all the known specimens of rocks, showing all the different formations of structural geology. Included in this are 20 specimens illustrating struc ture of rocks showing stratification, folds faults, joints ,etc. One very rare speci of helite. It is a cubic cleavage full of cubic centers and air bubbles. the label it says, "Don't let it freeze or it will burst." Helite is rock salt, and the specimen came from a salt deposit in Kansas.

Will Join the Board of Trade

trade last evening, and it was unanimously voted that they all become members of the board of trade.

on the mine.

Considerable development has been done on the Second Relief during the past winter. Tunnel No. 2 has been driven forty fine ore being now uncovered at the face. No. 1 tunnel is in 800 feet and No. 3 a that in time the payment of dividends will c. M. Co. on the Iron King No. 4.

Rathmullen is a little stiffer than it has c. M. Co. on the Tenderfoot.

Surface by upraises and shafts. The vein has been thoroughly prospected over a distance of 2,000 feet on the surface. The met. The shaft has been sunk from the surface to the level of the tunnel, a depth of 155 feet. The Portland, he says, has the earmarks of making just as good will be surface to the level of the tunnel, a depth of 155 feet. The Portland, he says, has the earmarks of making just as good values for the plaintiffs.

Rathmullen is a little stiffer than it has been sunk from the lics' kien. W. J. Whiteside appears for the plaintiff.

Harch 26.—[Special.]—The Jewel mine in Long Lake camp recently sent an experimental ship ment of one to proper to England for the plaintiffs.

Rathmullen is a little stiffer than it has been sunk from the just as little stiffer than it has been sunk from the just as little stiffer than it has been and 15,000 shares were disposed of the plaintiffs.

Hunter Bros. vs. H. S. Jones for goods will be not the plaintiffs.

W. S. Deacon appears for the plaintiffs.

Tamarac is a little weaker than it has been sunk from the surface. The condition of the plaintiff.

So on the Tenderfoot.

March 24.—To J. Chambers for the Pavo as the snow has disappeared as many force of the plaintiffs.

Tamarac is a little weaker than it has been sunk from 3 1.4 to 3 1.5 cents.

March 24.—To J. Chambers for the Pavo as the snow has disappeared as many force of the plaintiffs.

Tamarac is a little weaker than it has been sunk from 3 1.4 to 3 1.5 cents.

Tamarac is a little weaker than it has been sunk from 3 1.4 to 3 1.5 cents.

March 24.—To J. Chambers for the Pavo as the snow has disappeared a large force of men will be put to work on the construction of a stamp-mill and compressor. To date the shipments of ore from this mine to the Northport smelter

THE SLOCAN. Shipments From Various Mines-Items

During the first 18 days of March there was more ore shipped over the K. & S. line than in many a month before. The million-pound mark was even topped.
The Payne, always ahead, is resuming shipments at the old rate, and the Last Chance is steadily shipping. The detailed figures from March 1st to 18th are as

	Pounds
Last Chance	280,00
Payne	728.00
Rambler	82.00
American Boy	42.00
Florida	36.00
B. N. A. Mine	33,00
Gibson	12,00
Total	1.213.00

The niternational, Whitewater, is put-ting in a gasoline air compressor, the first of its kind in Kootenay. Some beautiful samples of almost native

vopper ore were recently taken from the Copper King claim on the north fork of the Lardeau near Circle City. The samples are an excellent indication of a big body of high grade copper ore in that district—the sample shown would run about 82 per cent copper. The Copper King was located by Lou Thompson, a well known prospector, and it is now owned by H. C. Dier, who has had a fair offer of cash

A meeting of the grocers of the city was held in the rooms of the board of March 27.—To the Pavo Consolidated Gold Mining Co. on the Ethel No. 1.

March 27 .- To same on the Ethel Frac-

THE ARHCITECT IS JUSTIFIED.

As was duly noted in the columns

Yesterday morning a telegram was re-ceived from J. C. Gamble, Commissioner of Lands and Works, which justified the at 3 1-4c.; Tamarac, 1,000 at 7 1-4c.; 500, prompt action taken. It was addressed to Mr. Honeyman and read as follows:

"Work on court house to proceed. Reengage the clerk of works. Inform Smith Curtis of your instructions."

There is now every probability of the court house becoming a feature of the city before snow flies next winter. 2 14c. Okanegan, 500 at 2c.. 1,000 at 1

for this prospect.

Great improvements are being made at the Hartney, which, when completed, will have an important bearing on the town. A new bunkhouse is being erected, along-side the old one. It will be two stories a large ore nouse will be built. The force has been increased to 19 men, and this will be largely augmented when the new buildings are completed. Another tunnel will then be commenced lower down the hill, which will afford an ample test to the value of the property. The management is liberal in its views and money, and its orders are the trivial of the property and its orders are the trivial or the same of the property. money, and its orders are to make the Hartney a mine as soon as possible. Its money also stands ready to begin work on the Silver Mountain wagon road so soon as the government grant is available.
