

BRONCHIAL ASTHMA

Choking and Coughing for Bronchial Relieved by "FRUIT-A-TIVES"

"In 1919, I was taken with Bronchial Asthma and no one knows what I suffered with it during the winter. I began having Choking Spells—gaspings for breath and could not speak. I would have one of these bad spells in the evening, one during the night, and one in the morning. The doctor said he could do nothing for me."

"In the spring of 1920, I started taking "Fruit-a-tives" and in a few days, the choking spells stopped, and I have had none since May 1st, 1920. I have so wanted to tell other sufferers who have the same trouble about "Fruit-a-tives" for I know how they must suffer."

Some thought the Asthma would come back on me as winter came on but it has not, thanks to "Fruit-a-tives". Mrs. J. M. PENNINGTON.

50c a box, 6 for \$2.50, trial size, 25c. At dealers or sent post-paid by Fruit-a-tives Limited, Ottawa.

The sidewalks of Manchester, Vermont, are of marble, the most common rock found in that vicinity.

HENRY J. SEELEY
Hartland, N. B.

Railway News in Brief

None Jav. Bank—Good progress has been made during the past month with the work of finishing the interior of the C. P. R. Office Building in connection with the station here. The contractors expect that the building will be ready for occupancy by April 1. This will complete one of the finest stations west of Winnipeg.

Vancouver, B.C.—The Committee of the Board of Trade was told by W. B. Lanigan, traffic manager of the C. P. R., at a meeting of the freight classification No. 17 which was prepared in 1919 has been sealed, and an entirely new list is at present being prepared.

There was considerable discussion in regard to the retention of the existing trade lists, under which shippers can mix certain commodities in the same car for shipment. Local business men were afraid that the present trade lists would interfere to the detriment of their business, but Mr. Lanigan gave an undertaking that there might be a modification in the existing arrangements, but it would not be of such a nature as to interfere in any material way with business.

Much satisfaction was expressed by the Board members at this assurance.

Kingston, Ont.—The Royal Military College at Kingston has just received some interesting relics presented by prominent C. P. R. officials. Mr. W. Beatty, K.C., President of the Canadian Pacific Railway has sent two splendid war relics in the form of a Prussian helmet and a regimental flag captured from the enemy during the late war. Mr. Beatty, who is a member of the college governing board, is taking a keen interest in its progress and his gifts have been placed in the staff mess.

A number of very interesting and serviceable articles have been handed to the college by Col. F. L. Wainman, of the board of governors, one of which, an umbrella stand made from a massive shell-case is in the "centre" to the mess. Other gifts from Col. Wainman include a handsome table lamp constructed from an 18 pound shell; a tobacco box made from a shell case; and a fine engraving depicting "The Surrender of Cronje." The latter is particularly appropriate as framed group photographs of the cadets who were in the South Africa War have been preserved and will be hung on the walls in proximity to the picture of the dawn of Majorca.

Colonel Wainman has also given the college a framed picture entitled "Reliefs," which is composed of composite photographs taken of lightning and an express train. This picture hangs in the cadets' new mess room.

Mr. A. D. MacTier, of the C. P. R.

has also presented an engraving of the painting entitled "Command" to the college.

The painting has been much admired by all who have seen it, and the kindness of these friends of the Military College is appreciated by all connected with the college, as is apparent from the many happy remarks heard.

Vancouver, B.C.—The "Princess Louise," all-British Columbia built and newest addition to the coastwise passenger fleet flying the House flag of the Canadian Pacific Railway, will be ready for commission shortly, it was stated by Capt. C. D. Neroates, marine superintendent, British Columbia Coast Steamship Service.

"Princess Louise" will first be opened, Capt. Neroates states,

on the route between Victoria and Vancouver, which will be in the nature of a thorough test of the boat's machinery before she is sent north to Alaska, for which service the "Princess Louise" was designed. The Alaska service between Victoria, Vancouver, Prince Rupert and Skagway will be maintained by the "Princess Louise" from the time she is put into commission for the northern run until June next, when the summer schedule of the Alaska route will go into effect.

The first of the sailings under the summer schedule will be taken by the "Princess Louise" in leaving Victoria June 6 at 11 p.m. and arriving from Vancouver at 9 p.m. June 16. The "Princess Louise" will be operated to Alaska.

This summer in conjunction with the "Princess Alice." These two splendid boats will give the Alaskans the finest steamship service they have ever had. It will amount to approximately a semi-weekly schedule.

The summer schedule of the "Princess Louise" from Victoria to Alaska is as follows: June 6, June 23, July 4, July 14, July 25, August 4, August 15, August 26.

Sailing from Victoria and Vancouver, the ports to be touched at by the "Princess Louise" and "Princess Alice" in the summer service will be Alert Bay, Prince Rupert, Ketchikan, Wrangell, Juneau, and Skagway, these calls being made on both the northbound and southbound trips.

A lighthouse, the flash of which can be seen for nearly 200 miles, has just been completed in Paris. It is intended for the new air station at Dijon and has been under construction for two years. The beam of light thrown from groups of lamps has an intensity of 2,000,000,000 candlepower. The lighthouse will be set up on Mount Afric, in the east central part of France, as a guide to airplanes on the great airways to the south and east of Europe.

A whale ran aground in shallow water inside the Atlantic entrance to the Panama Canal and was killed by machine gun fire by canal employees, who undertook to salvage it for oil and bone. The whale was too heavy for the 75-ton railroad crane to handle and a tug attached a line to the carcass and towed it to a point 12 miles outside the breakwater, where a naval airplane dropped two bombs weighing 300 pounds each from a height of 1,000 feet and destroyed it.

The new immigration law of America has kept 1,000,000 foreigners out of the United States in the last six months, according to the chairman of the House Immigration Committee. Only 100,000 aliens entered in the first five months of the last fiscal year.
