The trial lasted the life of one Daniel Morrissey for \$1,000, in three companies, the largest amount, \$5,000, being in the Mutual Reserve. Morrissey was not a subject for juries, and died shortly after the guides were jugged. The amount on his life was divided among the two W. J. Randell and a brother of Morrissey's, the latter receiving the smallest share of the sum. The case proves very sensational, which has been increased by the sudden disappearance of Norman Morrison, brother of the deceased Daniel.
