## Engine Derailed.

Engineer's Promptness Prevents Disaster.

Trinity, August 6.—Engine 116 came to grief about ten o'clock last night and is now lying wheels uppermost about three miles north of Placentia Junction. The disaster was due to leaving an open switch on the Y. Engineer Patrick promptly applied emergency brake, which instantly responded. The tender was derailed, but fortunately the coupling snapped, thus saving the mail and passenger cars. As the engine toppled over, fireman Turner made a forlorn-hope leap from the west window and escaped without a scratch. Patrick's escape was nothing short of miraculous. He crawled from beneath the wreck, succeeding in wrenching his foot free from a jamb. He was bruised and slightly scalded. Dr. Scott of Grand Falls, a passenger, rendered prompt aid. Patrick's conduct merits admiration. His escape from what appeared almost certain death left him cool and level-headed and not till everything possible had been done to prevent an explosion and put matters right would he consent to examination by the doctor. To-day he is little the worse physically and has won general praise for his coolness, pluck and devotion to duty. To engineers such as Patrick, the travelling public owe much. With commendable promptitude gangs of repairers were rushed to the scene, the track was rebuilt and at eight this morning the train re-started. The overturned engine remains a grim monument of some one's criminal carelessness and of extraordinary escape.—Daily News.

## Cable News.

LONDON, August 6.  
If Germany bids above the present navy law, then our policy will be two keels to one, was a striking statement of Lord Ashby, of St. Ledger, during a House of Lords debate on the shipbuilding policy of the Government. The debate was initiated by Lord Selborne, who indicated the Government was deliberately facing a shortage of the sixty per cent margin, which was agreed as necessary and which they themselves had laid down. In 1915 Germany would have 77 Dreadnoughts in the North Sea while we should only have a total of 39 exclusive of those not built by British taxpayers. He said nothing about Canadian ships. That was a matter for the people of Canada. Lord Ashby, of St. Ledger, who is Winston Churchill's cousin, said: "If Canadian ships are not forthcoming, then the whole shipbuilding programme will have to be reconsidered." The Telegraph in its editorial comment on the debate, says: Are we to have mere shadows of a fleet in the Mediterranean and squadrons which are not under Imperial control in the outer seas? The Mother Country will next year probably be faced with estimates amounting to nearly forty million pounds. It is probable the suffragettes will storm the International Congress of Medicine when it opens, as the militant women say they treat patients by doctors while in English prisons should be exposed to the world. Yesterday Mrs. Mansell, who presided at a big meeting said a prison doctor told Mrs. Richardson now out on license "You will be in this jail for the next fourteen days. We are going to make a mental wreck of you, ruin your nervous system, then send you to Brixton. The speaker said it was evidently a scheme of the Home Office to try to drive the militants insane and thus break up the movement. Mrs. Pankhurst, who was wan and pale, sat on the platform, attended by nurses. She said, "Yes, while I was in Holloway jail they sent an alienist to see me and look me over." Then the meeting decided to make an appeal to the doctors convened at the congress.

LONDON, To-Day.  
The second Balkan Peace Conference, having concluded a peace basis compromise which is unsatisfactory to all the States concerned, except possibly Roumania, the question is being asked how soon it will be before a third Balkan war will break out. Bulgaria has obtained under agreement arrived at a considerable portion of Northern Macedonia, much more than the allies were at first inclined to give her and also about sixty miles of the Aegean seaboard, which will enable her to build her projected railway from Philippopolis to Aegean. Bulgaria, however, deeply resents being deprived of Mavala port on Kavala Bay, which goes to Greece under the agreement. She is also confronted with the task of expelling the Turks from Adrianople, it being clear that the Powers will do nothing in this direction. Bulgaria will seek to introduce in a peace protocol, to be signed at Bucharest, a reservation practically appealing to the European Powers for a subsequent revision of the peace treaty. The details of the new frontier line are still unknown, but apparently the disputed country between the northern courses of Vardar and the Struma rivers goes to Serbia, including Orheopolje, Velos, Istip, Kochana, while Demetrias, Seres, Drama and Kavala fall to Greece.

LONDON, To-Day.  
It became known that the Duchess of Connaught, wife of the Governor General of Canada, was seized with a sudden illness at Cowes last Thursday, which caused much anxiety. The Duchess was much better yesterday and it is expected she will completely recover from the indisposition in a few days.

PEKING, To-Day.  
Mr. Sun Yat Sen, former President of the Republic of China, now one of the leaders of the Southern revolution, has fled the country on board a Japanese steamer, bound for Formosa Island, belonging to Japan in the China Sea.

LONG BEACH, N.Y., Aug. 5.  
S. O. Goodpel, a millionaire real estate broker of New York, and an unknown chauffeur, were killed by their auto being struck by an electric train.

## Benefit Concert.

On Friday night there will be a monster benefit concert for the C.L.B. Armoury, by the very kind permission of Captain McLachlin and officers of H.M.S. Sirius. Jack Rossley was approached by several of the ship's crew about a concert, and he, with his usual generosity turned over his theatre, and suggested that it would be a kindness to hand over the money to the C.L.B. Armoury. The captain very kindly consented to all the ship's concert party, and band to give the entire show. There will be about twenty-four real fine turns, and there is lots of talent, both singers, dancers and instrumentalists on the Man-o-War, and it should be well patronized, as at the dull season when show business is about at a stand-still, a good, lively concert would fill the bill especially for so good a purpose. The brigades should turn out in great numbers and patronize this concert, and the extreme kindness of Capt. McLachlin, the officers of H.M.S. Sirius, also the concert party and the ever-obliging Rossleys.

## Garden Party.

Yesterday afternoon, a Garden Party, which was successful in every respect, took place on St. George's Field. The promoters were Messrs. J. Pratt and A. Rooney, who were assisted in carrying out the arrangements by Rev. F. R. Matthews. A series of exciting football contests were run off by the members of the Bible Class. The members of the Ladies' Aid served teas and refreshments during the day, and helped to make the affair a success. The proceeds will be devoted to the Wesley Church Organ Fund.

## Minimise The Loss.

Practically farmers may easily minimise the loss, due to a backward and cold season, by the judicious use of Sulphate of Ammonia as a fertilizer. Sulphate of Ammonia contains over 20 per cent of nitrogen, as against 16 per cent in Nitrate of Soda, and is therefore more than 25 per cent better than nitrate of soda as a means of quickening and increasing the growth of crops. The use of Sulphate of Ammonia has increased enormously of late years and it is recognized to be the most valuable fertilizer obtainable. By its judicious use the production of root crops per acre may be doubled, and the growth of late crops stimulated. We invite the attention of Farmers to our special pamphlet on the best methods of using Sulphate, copies of which will be forwarded free to any address on application. The price of Sulphate is moderate, and our terms are accommodating. **ST. JOHN'S GAS LIGHT COMPANY.** Board of Trade Building, St. John's, July 8th.

## Not Suitable Husbands

Western Canadian Farmers Get Jolt From Dr. Parkin.

Those who are anxious for the welfare of the surplus of educated women in Britain will have their eyes on Canada. The Bishop of London recently declared that there would be a nation of a hundred million on one side of the Rockies. It was for the women who were the world's idealists, to make this new nation the kingdom of God. Recently an offer was made to the Girls' School settlement in London of two houses at Edmonton, Alta. in which former pupils might establish themselves. Miss Hodge, principal of the settlement, told the Canadian Associated Press that there seemed "misapprehension" among western Canadians concerning the object of those willing to found a settlement. There was absolutely no spirit of condescension, but of real service. They realized that the church in Canada was unable to afford paid workers. Settlement workers would be willing to serve in any way they desired. However, the Edmonton settlement scheme had been abandoned and it was now proposed to make an attempt further west. Dr. Parkin, formerly of Upper Canada College, Toronto, speaking to the press on the emigration of educated women, but without any reference to the foregoing, deprecated the idea which he believed was rather prevalent here, that women might very well get married soon after their arrival. The educated woman would find the style of man of the prairie farms soon here as being typical of western life. "You might as well take the view of the suburban back yards here and say it represented England," he said.

**ARTHUR B. WALKER, 27** Charlton St. (3 doors from Springdale Street).
