**ATTACKS MONDAY NIGHT**

German Assaults on French  
Positions East of Meuse  
Repulsed.

PARIS, June 20.—11:40 p.m.—The war office communication issued this evening says:

"There has been no important event worthy of mention on the entire front, with the exception of rather lively artillery fighting in the region south of Fort Vaux."

Belgian communication:

"There has been artillery fighting and attacks with bombs in the region of Steenstraete. Calm has prevailed on the rest of the front."

Three German attacks, made last night on the French positions northwest of Hill 221, were repulsed by the fire of the French machine guns, according to an official statement issued this afternoon. The Germans are heavily bombarding the French positions in the neighborhood of Vaux, Chaptre and Chattancourt.

The text of the statement follows:

"On the right bank of the River Meuse German forces delivered three attacks last night upon our positions to the northwest of Hill No. 221, but all their efforts were broken by the activity of our machine guns and our curtains of fire."

"The bombardment has been intense in the region of the woods of Vaux and Chaptre and in the sector of Chattancourt, on the left bank of the river."

"In the Vosges a surprise attack of the enemy upon an advanced sap in the region of Michelbach, to the south of Thann, resulted in failure."

British Occupy Crater Created by  
Enemy Explosion.

LONDON, June 20.—11:40 p.m.—The British official communication issued this evening says:

"The principal feature of the last twenty-four hours has been mining activity, combined with some bombardments by both sides. In the Loos sector we exploded two and the enemy one mine. Our mines are believed to have been fired with good effect against a hostile gallery, where work was in progress at the time. The host mine destroyed a short length of the enemy trench which we have occupied the crater."

"Last night in the same sector our troops surprised and bombed a large hostile working party, inflicting numerous casualties."

"There has also been some artillery and trench mortar activity about Angres and Vimy. Otherwise, the day passed quietly."

**Girl a Nervous Wreck

Was Tired Out, Pale and Sallow—Would Tremble Till the

In the schools of today there is found an alarming proportion of weak, nervous children who have little chance of developing into healthy, useful men and women. Nature requires the assistance of such treatment as Dr. Chase's Nerve Food to help them on their way.

There would be fewer wearing glasses if the nerves were invigorated, less irritation in the school and home, more robust health and a greater pleasure in the school tasks.

This letter bears a cheering message to parents whose children are weak, puny and nervous. It shows you what may be expected from the use of this great restorative.

Mrs. Stephen Hartman, Italy Cross, Lunenburg County, N. S., writes:

"My little sister at eleven years of age became nervous, irritable and seemed all tired out. She had no appetite, was lifeless and drowsy, and

Vienna Says All But Hundred  
Persons Escape From  
Czernowitz.

VIENNA, June 19.—Via Berlin to London, June 20.—9:55 p.m.—Austria takes the third evacuation of Czernowitz with great sadness, but with absolute quiet, and with confidence that the loss of the capital of Bukovina is only temporary.

Military critics point out that in view of the overwhelming Russian forces, a continued defence of Czernowitz would merely have spelled the city's destruction, and unite in praising the decision of the military authorities to evacuate it. They declare that the Russian occupation is of minimum military importance, and a merely local advantage of a temporary nature.

Fugitives Reach Capital.

The vanguard of the fugitives from Czernowitz has now begun to straggle into Vienna after a week-long journey, in which they were constantly delayed to allow of the passage of the trainloads of Russian and Austrian wounded. The fugitives described the fierceness of the Russian attack and the devastation caused by it, and also the final scenes in Czernowitz, from which all but a hundred persons had fled. According to these reports the Russian gunfire was so terrible that nothing could live in the advanced positions. Wire entanglements and trenches were obliterated.

The inhabitants of Czernowitz first realized that the situation was serious when the Austrian staff retired upon the city from the advanced posts and swarms of country people, with their possessions in packs of wagons and driving their live stock, came fleeing southward through the city. The scene of awfulness increased at night when the sky was red with the glare from bursting shells or illuminated by searchlights.

Exodus Began June 11.

The general exodus from Czernowitz by the civilians began at 6 o'clock on June 11 and continued uninterruptedly all day, trainload after trainload of the populace departing as fast as the coaches could be filled. The fugitives included the faculty and students of Czernowitz University, the latter of whom for six weeks had pursued their studies with shells punctuating their recitations and the noise of explosions drowning the lectures.

A large majority of the fugitives have gone only a short distance into the hinterland, there to await the anticipated re-taking of Czernowitz.

The city was evacuated by the Austrians the night of June 15, after an irretrievable Russian attack had destroyed the bridgehead, rendering further defence of the city all but impossible.

**CANADA HAS 3,700  
QUALIFIED OFFICERS  
MORE THAN NEEDED**

Twelve Thousand Have Found  
Places in Units.

[Special to The Advertiser.]

OTTAWA, June 20.—The training of officers has been carried on so energetically that there are now 3,700 young men qualified, who are unattached to any expeditionary unit. This is in addition to the great number of officers, considerably over 12,000, who are in charge of the 350,000 men Canada has enlisted and who are serving overseas or training in Canada or England.

General Hughes announces that all of the surplus officers will be attached in some way to the corps in training camps to further prepare them for the real part which is before them.

Casualties since the first of the month will take 500 of the 600 officers now in England.

A good many young officers are going into the ranks in order to get to the front more speedily. Permission has been given them to do so, with the promise of preference for appointment as officers to the first vacancies.

General Hughes tonight left for Niagara camp, where he will spend tomorrow. Thursday he will be in London, Friday, Ottawa, and will then leave for the west, going as far as Vernon, B.C., inspecting.

**The Efficiency  
of the  
British Navy**

—is due to the fact that it wasn't afraid to discard  
obsolete ships, methods—and men.

When Lord Fisher started to revolutionize the British Navy—not only did he scrap useless ships which could neither fight nor run away—but he also scrapped useless men. It is this courage to wipe out ultimate waste by the "scrapping" of obsolete methods and machinery—that stamps "efficiency" on the man of to-day.

But there are thousands of business men who strive for 100 per cent. efficiency in the factory or office who are still content with 40 or 50 per cent. in the morning toilet.

The demand for more speed, less mess, less of the tedium of re-lathering, rubbing-in, and slow difficult shaving, and less smart, bite and irritation, has caused many men to discard successively the mug, the stick and the powder as they would discard a wasteful, antiquated machine in the factory.

Mennen's Shaving Cream overcomes every objection to mugs, sticks and powders. It wipes out waste, "rubbing-in," and re-lathering. It is sanitary. It actually softens the beard. It leaves the skin soft, cool and refreshed. There is not a bite or a smart in a tube of it. Mennen's Shaving Cream costs but little more than bar or stick and lasts longer than powder. A 25-cent tube, if used according to directions, will deliver a shave a day for months. It is without free caustic; its healing, soothing properties make lotions unnecessary.

**AFFLICTED WITH LAME BACK  
THREE YEARS AGO.  
Could Not Sweep the Floor.**

Women are coming to understand that weak, lame and aching backs from which they suffer so much excruciating pain and agony are due to wrong action of the kidneys.

The kidneys are overtaxed—given more work than they can do, and when the back aches and pains it is hard for a woman to look after her household duties, for no woman can be strong and well when the kidneys are out of order.

On the first sign of any weakness in the back Doan's Kidney Pills should be taken. They go right to the seat of the trouble, cure the weak, aching back, and prevent any serious kidney trouble liable to follow.

Mrs. L. Gonslow, 633 Manning avenue, Toronto, Ont., writes: "I take great pleasure in writing you, stating the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to use Doan's Kidney Pills, and before I had used one box there was a great improvement, and my back was completely cured. I highly recommend 'Doan's for lame back'."

Doan's Kidney Pills are 50c per box, 3 boxes for \$1.25; at all dealers, or mailed direct on receipt of price by The T. Milburn Company, Limited, Toronto, Ont.

See that our trade mark, "The Maple Leaf," appears on the wrapper.

**TO PUT ON FLESH  
AND INCREASE WEIGHT**

Most people eat from four to six pounds of good solid fat-making food every day, and still do not increase in weight one ounce. While on the other hand many of the plump, chunky folks eat very lightly and keep gaining all the time. It's all a matter of what is in the nature of the individual. It isn't Nature's way at all.

Most thin people stay thin because their powers of assimilation are defective. They absorb just enough of the food they eat to maintain life and a semblance of health and strength. Stuffing won't help them. A dozen meals a day won't make them gain a single stay there now. All the fat-producing elements of their food just stay there in the intestines until they pass from the body as waste. What such people need is something that will prepare these fatty food elements so that they can be absorbed and increase their blood's carrying power.

For such a condition it is well to recommend eating a Sargol tablet with every meal. Sargol is not, as some believe, a patented drug, but is simply a careful combination of six of the most effective and powerful assimilative and flesh-building elements known to science. It is absolutely harmless, yet has been wonderfully effective, and a single tablet eaten with each meal often, according to reports of users, has the effect of increasing the weight of a thin man or woman from three to five pounds a week. Sargol is sold by all good druggists everywhere on a positive guarantee of weight increase or money back.

If you find a druggist who is unable to supply you, send \$1. money order or registered letter, to the National Laboratories, 74 St. Antoine street, Montreal, and a complete ten days' treatment will be sent you postpaid, in plain wrapper.
