THE VALUE OF DAIRYING.
Without agriculture no civil-
ized government can stand, no
nation of free men exist, while
without live stock there can be
no permanent system of agricul-
ture. Specialized concentrated
effort counts, and of this dairy-
ing is an illustration of the high-
est type. As nature gave the
richest soil, so the cow and the
sheep will conserve it.

APPLE TREE CANKER.
Recommendations For Preventing and
Curing Serious Orchard Evil.
Of all bark diseases of fruit trees
none is worse than apple blister can-
ker.
Experiments conducted in orchards
for the purpose of discovering means
of treating the disease led to the con-
clusion that where wounds are made
on apple trees accidentally or by the
removal of branches or limbs some
form of covering should be applied as
soon after as possible to prevent the
entrance of the fungus spores.
Tests were made in covering tree
wounds with white lead paint, asphalt-
um and paraffin. Treatment attempt-

Distribution of Seed Grain and Potatoes
From The Dominion Experimental Farms, 1913-1914.
By instructions of the Hon. Minister of Agriculture a distribution of superior sorts of grain and potatoes will be made during the coming winter and spring to Canadian farmers. The samples for general distribution will consist of spring wheat (5 lbs.), white oats (4 lbs.), barley (5 lbs.), and field peas (5 lbs.). These will be sent out from Ottawa. A distribution of potatoes (in 3 lb. samples) will be carried on from several of the experimental farms, the Central Farm at Ottawa supplying only the provinces of Ontario and Quebec. All samples will be sent free, by mail.
Applicants must give particulars in regard to the soil on their farms, and some account of their experience with such kinds of grain (or potatoes) as they have grown, so that a promising sort for their conditions may be selected.
Each application must be separate and

APPLE TREE CANKER (BLISTER CANKER).
ed after the sap had begun to flow was attended with difficulty. Where the cankered limb was cut off or the diseased bark was removed and the wound treated some of the wounds showed that the fungus continued to grow in spite of the covering.
Recommendations for prevention are that when a branch or limb is severed the cut should be as smooth and as close as possible, that as far as possible tree trimming should be done when the sap is not flowing and that all wounds should be covered with some kind of dressing. Of the tree covering materials mentioned it was impossible to determine which was the best.
Other protective measures consist in spraying of branches, limbs and trunks of apple trees and removal and destruction by fire of all brush. All dead trees should be grubbed out by the roots and burned.—Country Gentleman.

Value of the Wheel Hoe.
The wheel hoe, a light cultivator to be operated by man power, is regarded with amusement by many who raise acreage crops. They consider it a nice little plaything for the suburban resident and the boy with a garden. The wheel hoe has, however, undeveloped possibilities as a real farm tool. For instance, if one is kept near the kitchen garden somebody is likely to pick it up almost any night after supper and cultivate a dozen rows of vegetables. If the garden had to wait until a horse could be spared with a regular cultivator it might wait all summer. Truckers use the wheel hoe for tuten sive crops.—Country Gentleman.

Children Cry FOR FLETCHER'S CASTORIA
Cause of His Anger.
An angry advertiser rushed into the office of an English paper recently and shouted: "See here, our ad-
ought to read 'Thousands of patrons are wearing trousers of our make.' The foreman of the composing room looked up and weakly said, 'Well?' The irate advertiser threw down a copy of the paper containing the ad. The compositor had made it 'matrons.'
Got the Pointer.
"Poor old Hafdiapple! He saw an ad. in a farm paper that stated for \$5 they would send him the prettiest pointer ever seen in this state."
"Gosh! And was the dog as represented?"
"Dog! Why, the blamed butcher sent him a stuffed porcupine."
Earned It.
"You say you are worth a million?"
"Yes, sir. And I earned every penny of it too."
"I'd like to know how che man could earn a million."
"I married for it."
A Good Job Coming.
Jeweler—How was your boy pleased with the watch I sold you?
Fond Father—Very well, sir. He isn't ready to have it put together yet, but be patient. I'll send him around with it in a day or two.
