

In nervous conditions associated with anæmia no preparation can be found of more service than this in combination with strychnia sulphate. It is given in dessert to tablespoonful doses, with or immediately after meals, and may be given in water, sweet milk, or preferably, in most cases, sherry wine. This preparation, as in case with all general tonics, should be given from four to six weeks before any marked improvement is expected.—Editorial from *Alabama Medical and Surgical Age*.

SANMETTO IN PROSTATITIS, CYSTITIS, CHRONIC GONORRHOEA AND VESICAL IRRITATION.—I take pleasure in saying that sanmetto in my hands has proven its superiority to other remedies in prostatitis, cystitis chronic gonorrhœa and general vesical irritation. I prescribe it with confidence every time, and in cases not attributable to mechanical causes I feel sure of relief every time. In gleet its action is marvelous, the worst cases yielding readily, and I shall continue its use.

THE INFLAMMATORY CONDITION IN PERITONITIS, ETC.—An interesting reference to an extensively prescribed remedy is found in that valuable text book "Materia Medica and Therapeutics" by Finley Ellingwood, A. M., M. D. Chicago. The substance of the article is to the effect, that the influence as a pain reliever of the popular analgesic—antikamnia—is certainly next to morphine, and no untoward results have obtained from its use, even when given in repeated doses of ten grains (two five-grain tablets.) It is especially valuable during the progress of inflammation, and given in pleuritis or peritonitis it certainly abates the inflammatory condition, relieves the pain at once and the diffused soreness shortly, as satisfactorily as opium. It does not derange the stomach or lock up the secretions. It is also of value in pain of a non-inflammatory character, and is a convenient and satisfactory remedy in headaches without regard to cause, if the cerebral circulation be full.
