Export Contact: Mr. John Stanger, President

Marketing Profile

Econo-Serve Systems was established in Canada three years ago. The company designed and now manufactures a unique windshield service centre used at service stations for the purpose of storing and dispensing materials used to clean glass and check oil levels. The Econo-Serve System is unique in its ability to dispense plastic gloves and either single sheets of paper towel or European style core-less rolls. The design is registered in Canada, the United Kingdom, the U.S.A. and Australia.

The company also designs and manufactures storage containers for waste and recyclable materials. Clients in Canada include most major oil companies. The company manufactures under licence in the U.K. and seeks licences in Australia and the U.S.A.

The company currently markets a windshield service centre dispenser for paper towels and protective gloves. It also markets matching containers for both garbage and recyclables. The company exports tooling and small injection moulded parts used to dispense various products.

The company has established a licensed manufacturer in the United Kingdom and is seeking to make similar arrangements in Australia and the U.S.A.
