

	PAGE
Cohesive and non-cohesive gold.....	165
Copper, oxyphosphate of.....	161
Cotton rolls, the use of.....	76, 78
Crystal golds.....	174
Crowning versus contouring.....	101

D

Deciduous teeth, management of the	288
Deciduous teeth, treatment of abscessed	293
Deciduous teeth, treatment of exposed pulps in.....	292
Dental caries, etiology of.....	28
Dental caries, susceptibility to and immunity from	29
Dentine, hypersensitive.....	143
Dentine, recalcification of.....	139
Dentine, secondary.....	142
Dentine, treatment of softened, in deep-seated cavities	139
Deposits on the teeth.....	5
Deposits on the teeth, classification of	8
Deposits on the teeth, removal of	14
Destroying the pulp with arsenic	265, 286
Destruction of the pulp.....	264
Detail of cavity-formation in proximal cavities in anterior teeth involving the incisal angle	95
Detail of cavity formation in proximal-occlusal cavities in bicuspids and molars.....	117
Detail of cavity-formation in simple proximal cavities in incisors and cuspids.....	97
Different forms of gold.....	172
Discoloration of pulpless teeth, to prevent	286
Disto-occlusal fillings in bicuspids and molars	209, 217
Drilling out pulp-canals.....	279

E

Electric annealer for gold.....	169
Electric mallet, the.....	184
Enamel variations in structure of	37
Examinations of the teeth for caries	41

	PAGE
Examining the teeth, appliances for	43
Exclusion of moisture during operations	44
Exploring instruments	43
Extension for prevention.....	81, 86, 104

F

Filled teeth, opening into where the pulps have died but lain dormant	285
Filling materials, characteristics of	151
Filling pulp-canals	272
Fillings, buccal, labial and lingual	225
Fillings, disto-occlusal in bicuspids and molars	209, 217
Fillings, finishing buccal, labial and lingual.....	225
Fillings, inlay.....	241
Fillings, mesio-occlusal in bicuspids and molars.....	217
Fillings, occlusal in bicuspids and molars	220
Fillings, finishing occlusal, in bicuspids and molars.....	224
Fillings, finishing proximal, in incisors	191
Fillings, proximo-occlusal in bicuspids and molars.....	201
Floss silk, use of.....	26, 43

G

Gelatinous film in connection with incipient caries.....	30
Gold, advantages and disadvantages of as a filling material.....	151
Gold, annealing	166
Gold and its combinations.....	151, 156
Gold-and-iridium	158
Gold-and-platinum.....	154, 156, 226
Gold-and-tin	156, 228
Gold, cohesive and non-cohesive.....	165
Gold, cohesiveness of, destroyed by over-malleting	182
Gold, different forms of.....	172
Gold fillings, the introduction, condensation, and finishing of.....	190
Gold inlays	255
Green stain	12
