

AN IMPROVED STEAM SETTING MACHINE

WITH
ENCLOSED RATCHET
SET WORKS

THE NEWEST
AND BEST
OF STEAM SETTERS

This machine is an improved form of the original Corry & Barker Steam Set. It will set four inches just as quickly as the standard and all hand machines set two.

Just the thing for mill men who saw timber and thick stuff for export.

The Ratchet Set is dirt proof.

So many interesting and money-saving features are incorporated in this machine it will pay you to write us.

It is positively guaranteed—we know what it will do.

The standard size machine is also a dividend payer, and continues to make friends among all mill men. It is the pioneer steam setter, and with our patented improvements, it is a necessity in all mills.

We manufacture everything for a saw mill. Write us.
