**Reliable
Veterinary
Remedies**

No logging outfit is complete without a supply of reliable veterinary remedies. Getting the wrong kind means the loss of the use of your horses when time is valuable.

Johnson's Veterinary Remedies are guaranteed never to fail when used as directed. You get your money back if they ever do.

Johnson's Horse Liniment No. 1.
A penetrating Alcoholic Liniment. Put up in one gallon jugs, with full directions, per Imperial gal. \$4.50

Johnson's Horse Liniment No. 2.
A combination of the best oils used as liniments, imp. gallon . . . \$3.00

Johnson's Horse Colic Remedy.
A sure and speedy cure for colic. Imperial gallon \$5.00

Johnson's Veterinary Healing Ointment.

Positively the best all-round healing ointment made. In use by the largest owners of horse flesh in Canada. Put up in 2 lb tins, each \$2.00 or in 1/2 lb tins, per dozen . . . \$3.00

Johnson's Condition Powders. (Concentrated). Put up in bulk, per lb. . . . 3c.

These goods being put up in bulk are more economical than others, as cost of bottling, etc., is saved.

CAMP REMEDIES.

In addition to our Veterinary Remedies we make a line of medicines for lumbermen, including a strong, penetrating liniment, healing ointment, cholera cure, liver pills, cough syrup, in fact anything in the form of Camp Drug Supplies. We know that there are no better remedies made than those we offer. There may be others nearly as good, but they lack our guarantee. Satisfaction or money back. A trade discount of 10% allowed off all orders amounting to \$100.

Send postal for printed matter.

Canada Chisel Tooth Saw Patent For Sale

Date November 24, 1903

Something new. No hammering required. Will run two gauges thinner than any other saw and make better and smoother lumber. The holder costs less to manufacture than the tooth, which is a very simple drop forged tooth. No milling or machine work on the plate, consequently a higher tempered plate and a plate that will require no hammering, as there is absolutely no wear in service or in changing the teeth; no rivets nor wedges. The only chisel tooth that will stand heavy feed, and in which the teeth will not spring and set from the log in use. To parties who mean business and want to control the inserted tooth saw trade in Canada, I will sell cheap. I will retain my U.S. Patent, and need more funds to push it. Other patents now pending, and will be assigned. Cut sample of tooth and holder, and sworn statement of results from a test of this saw will be furnished to those interested who have a good commercial rating, and a saw will be shipped for trial. "KILLAM'S TANDEM CIRCULAR SAW MILL"

The attention of Manufacturers of Lumber is called to the above named latest and best method of sawing lumber.

The following advantages are obtained:

Lower cost of installation than any other method which will saw an equal number of superficial feet in a given length of time.

Smaller expense in operation, thus producing lumber at a lower cost per thousand feet than any other method.

Requires no more help to operate it than any well equipped Circular Saw Mill.

Lumber has been sawn better and more accurately cut by this method than by any other now in use.

The Killam Tandem Circular Mill requires no more skilled men to operate it than is required to operate the ordinary Circular Mill.

If solid saws are used, the larger one, when worn down can be used for the smaller one, thus saving expense for saws.

No difficulties in handling or setting by this machine and no delays.

No time is lost in setting for any thickness from the cut of stationary saw up to six inches.

This machine takes the place of a resaw in a mill and only requires a floor space of 6 ft. x 6 ft.

Also takes the place of a Twin Circular Mill that is now used for slabbing, and this machine will slide as much lumber as any Twin Circular, thus saving the expense of a resaw and men to operate the same.

This machine is so cheap that any manufacturer of lumber can well afford to have one, for it will pay for itself in a short time.

Will cut 50 per cent. more lumber than the Circular Mills now in use.

MANUFACTURED BY **OXFORD FOUNDRY & MACHINE COMPANY, OXFORD, N. S.**

REFERENCE.

M. L. KILLAM, TRURO, N. S.

Dear Sir,—It gives us great pleasure to testify to the value of your Tandem Circular Saw Mill. It has paid for itself twice over during the six months we have run it. It requires no more help to operate it and the lumber is more evenly sawn. It does all that you claim it will and we would recommend it to any manufacturer who wishes to make more and better lumber with the same help as with the Single Circular Mill. Wishing you success, we are Yours very truly,

Dec. 31, 1903.
