

# ALLIES' DAY PROVED SPLENDID SUCCESS FOR THE BIG CROWD

Special Recognition Given and  
Honor Paid Countries With  
Britain in War.

## PROGRAM IS THRILLING

Immense Audience Sees Spectacle  
and Great Military Tattoo  
at Night.

Thursday's attendance . . . 69,500  
Same day last year . . . 66,000  
Gain over last year to date . . . 5,500

Allies' Day was a wonderful day at the Exhibition yesterday. It was a day when the people of this city and the people of the world were reminded of the sacrifices made by the Allies in the great war of 1914-1918. The program was a splendid success, and the crowd was immense. The weather was perfect, and the sun shone brightly. The program was a thrilling one, and the people were entertained to the hilt. The military tattoo was a sight to behold, and the people were in awe of the display. The day was a great success, and the people were very happy.

More particularly was Allies' Day recognized during the evening performance, when a great military tattoo was staged. The Polish band, from the great multitude of people with their excellent music. The famous French trench band, representing France, was a sight to behold. The band from Buffalo, representing the United States, drew forth volumes of applause. The band from the representative of Italy, occupied a prominent place, and when the British bands came on patriotism knew no bounds.

Thrilling Program.  
Never before has such a tremendously thrilling program been seen at the Exhibition. This may be accounted for by the sentiment attaching to the Allies' Day. It was a day when the people were reminded of the sacrifices made by the Allies in the great war of 1914-1918. The program was a splendid success, and the crowd was immense. The weather was perfect, and the sun shone brightly. The program was a thrilling one, and the people were entertained to the hilt.

There was a good attendance for the afternoon performance, when the playing of the French trench band was a feature. In addition to the regular vaudeville and other acts, the program was a very interesting one. The people were very happy, and the day was a great success. The military tattoo was a sight to behold, and the people were in awe of the display. The day was a great success, and the people were very happy.

Yesterday's attendance will go a long way towards making up for the falling off on Wednesday, when the rain interfered to such an extent. The grounds filled up rapidly, and by noon the parade thru the buildings was slow because of the crowds. The midway had its quota and played to capacity. The various demonstrations were attended by interested onlookers.

All in all the day was a big success from the standpoint of the Exhibition. The people were very happy, and the day was a great success. The military tattoo was a sight to behold, and the people were in awe of the display. The day was a great success, and the people were very happy.

## VISITORS CONTRIBUTE TO SWELL TAG FUNDS

Under the co-operation of Mrs. W. P. Harvey the Parkdale Soldiers' Comforts Society did a splendid business in the war tag yesterday. Exhibition visitors and travelers generally were the most part tagged early in the day, none seeming to refuse the pleaders' plea. Men and women on their way to their downtown offices and to the factories were not allowed to escape, the "tag" being continued to the western part of the city with the eastern boundary at Ossington avenue.

## MAKING ARRANGEMENTS FOR LABOR DAY SPORTS

Arrangements are well forward for the Labor Day sports at the Exhibition. The events will all be run off again on the track near the waterfront, out of Dufferin street, and a splendid entry is assured in every event, of which there will be 21. One of the outstanding features of the day will be a tug-of-war between the British Forgings and the Leaside Ammunition Works, eight men to a team. It will be for the championship of Toronto, and the keenest rivalry has been worked up between the participants.

## GLASS WORKERS PROGRESS.

The glass workers of Toronto are working ahead, and were addressed on Wednesday night by Joseph Hunter, general organizer for the union in Canada. John Hopkins stated yesterday afternoon that this trade was among the most skilled in the general trades.

# EXHIBITION NOTICES

## MEDICAL SIDE OF SOLDIERS' RE-ESTABLISHMENT.

One of the most important services operated by the Department of Soldiers' Civil Re-establishment is certainly its medical branch, under the director of medical services. Returned men may, as a general thing, be divided into four great classes: First, the blind; second, those suffering with internal diseases, tubercular and non-tubercular (chronic heart and kidney diseases, arterio-sclerosis, and the like); third, the mentally deranged, and fourth, the crippled, that is, those whose motor functions, whether of limb or trunk, have been impaired.

The blind, the diseased and the mentally affected all had their institutions in pre-war days, but the crippled soldiers—these were soon found—presented features falling outside the ken of the existing hospitals. Reconstruction of the returned soldier, it soon became evident, would make simultaneous demands upon the orthopaedic surgeon, the mechanical engineer, the physical therapist, the psychologist, the social worker, the teacher—that is to say they must be treated not only medically, but the technician must supply the proper brace or artificial limb, and the teacher must enable them to overcome diminished physical power by increased mental and technical ability. Consider the immense effort to provide curative workshops, equipment for occupational therapy in its various forms and the skilled personnel to operate them, in order to bring about the physical and psychic reconstruction of the discharged soldier!

## TRAJAN WASHING MACHINE.

McDonald and Willson, Limited, late of 12 Queen street East, now 441 Yonge street, have an interesting exhibit of washing machines and electrical fixtures at the Exhibition. The feature of their "Trojan" washing machine is the high powered water pump motor which operates the machine. The clothes are prevented from becoming tangled by the one revolution system of reversing the cylinder. An official of the firm stated yesterday that he would be willing to allow anyone to pour a pail of water over the motor without affecting it.

## A BOAT FOR ALL WATERS.

The Disappearing Boat Propeller Company is showing models at the Exhibition that are attracting many visitors. The engine of the boat, and the propeller are both controlled by the same lever. It is possible on account of the disappearing propeller to use the boat in shallow water. The propeller always remains under the water, being in the centre of the boat. All vibration has been eliminated and the speed up to nearly ten miles an hour may be obtained. The watercraft will be interested in seeing this fine exhibit. It is a vast improvement in motor boat transportation.

## BARNET PEERLESS PRODUCTS.

Unsurpassed on the market is the Barnet refrigerator and cold storage, each of which are built on the same scientific principles with regard to the best requirements of sanitation and refrigeration. In the construction of the refrigerator, the inventor has used the insulation system, and the circulation in any test is proved to be perfect.

Among the requisites for preserving food immune from destructive germs are freedom from moisture, sanitary construction and a sanitary ventilation. These are found to perfection in the porcelain-lined and beautifully equipped cold storage. The cold storage is built along the same healthy lines. Because of their exceptional quality the products of the Barnet Manufacturing Company, Limited, of Renfrew, Ont., are endorsed by hospitals, health boards and Exhibition judges.

Food not taken in these refrigerators at the Exhibition under the grand stand will be opened today and will be on view at 2 p.m. You are cordially invited to call and see the results of this test at their booth, No. 15, under the grand stand.

## CHRISTIE-BROWN COMPANY OVERSEAS PRODUCTS.

"Pure as can be made" is the motto of the Christie-Brown Company, who have a fine exhibit of their cakes and biscuits in the manufacturers' building at the Exhibition. Their fruit cakes are rich and fruity and keep fresh a long time. This makes them a first place for sending overseas. The company is making a special line of cakes put up in a tin box for sending to the soldiers. About the first of October they will have a fine line of Christmas puddings ready to add to the overseas boxes.

# Brain Fag

You are mentally tired. The strain has been continuous. The supply of nerve force is running low.

You cannot leave for a long rest in the country, and it is therefore necessary that you have assistance where you are. Help awaits you in the form of Dr. Chase's Nerve Food.

This great restorative feeds the nerves back to health and vigor. It restores the energy and vitality that is necessary to success and the healthful enjoyment of life.

## SOLDIER HANDS TURN TO THE DAILY TASK AGAIN.

"Once a soldier, always a soldier"—so came down flatfooted to certain professional men the other day. He confessed to despair when he contemplated the reversion of civil obligations of the Canadian army when peace was concluded. Once a soldier, always!

That is as far as possible from the truth. The men who dealt doughty blows at Ypres and Vimy Ridge had not the military habit and the military mould of mind resulting from years of martial service. They were ordinary Canadian citizens, all ages, drawn from every class of society from lofty pulpits to pit of coal mine. As one writer puts it, "Their military service has been an interlude after which they will return to take up their interrupted tasks or to find other tasks more suited to their altered capacity."

Bullet, bayonet and blast of shell or gas have worked their dread effect upon thousands of the flower of our manhood and have left such physical—often mental—condition, as to veto the possibility of a return to their former means of livelihood. They have not discharged until they have been made as medically and mentally fit as possible to resume civilian service. Neither are they "plunked" into the world to be taken good care of by the department of soldiers' civil re-establishment, which sees that they are re-trained in a way that they can successfully compete with their fellow-workers. They are not only propped up and set on their civilian feet again, but they are kept going by subsequent "follow-up" by the department which Sir James A. Loughheed presides over.

The task of thinking out and bringing into being the manifold ways and means by which all this is effected is a great one. Canada was represented at the recent Inter-Allied Conference on After-care of Disabled Soldiers. In London, London, and from the English press it would appear that Canada is well in the lead.

The exhibit made by Sir James A. Loughheed's department at this year's Canadian National Exhibition, while it has been a success, has been the artistic craftsmanship displayed by wounded soldiers and a few of the occupations wherein disabled men are retraining for the thousand and one features of the re-establishment industry and procedure. Everything and everybody must co-ordinate to the one end: quick and easy passage of the returned man who drops his kit bag to shoulder once more his long-forfeited civilian point never to be lost sight of is that Canadian army experience, instead of meaning civil disability, should mean a better and higher citizenship. It has been wisely said: "Because of the experience of the war, the soldier is a man who has been through a process of self-sacrifice and subjection of individual interests to the common good. He is a man who has been through a process of self-sacrifice and subjection of individual interests to the common good. He is a man who has been through a process of self-sacrifice and subjection of individual interests to the common good."

## W. C. T. U. DINING ROOM.

The members of this well-known organization are again looking after their annual visit to the Exhibition. "The best and cleanest meal" is the usual expression. Come and try them. They will be well worth the price. The members of this well-known organization are again looking after their annual visit to the Exhibition. "The best and cleanest meal" is the usual expression. Come and try them. They will be well worth the price.

## FURTER & DALTON'S BEAUTIFUL FURS.

Fretty and girlish are the fox fur sets shown at the Exhibition in the manufacturers' building at the Exhibition, 3022 West Dundas street. The over-popular red fox is shown in some new styles and also in a new fur, as well as giving warmth in the zero weather. One handsome set of fur coat and hat is shown in a new style and a new barrel-shaped muffs to match. The garments will complete a favorably with any in Canada in effect and workmanship.

## EAT AT MUMBY'S.

The attractiveness of Mumby's dining hall is due to the fact that they are operated by an expert who understands how to cater to the pleasure of the public. Everything is served in a spotless manner. Mr. Mumby also desires to give his patrons exactly what they want. He has his regular lunch and dinner service in the grand stand, and he has established a cafeteria under the west end of the grand stand, where those persons who prefer this mode of service may get a meal. Then, under the east end of the grand stand, he serves the government fish meal.

## MAPLE PRODUCTS ARE POPULAR

Everyone likes hot cakes and syrup. The Maple Company have a good exhibit of their maple products at the Exhibition in the manufacturers' building. Among them is Pure Tyme Syrup, which is made of the purest maple, flavored with the real maple sugar. This is put up in pint and quart bottles and in larger-sized tins. The company manufactures the syrup as well as Maple Butter and other products. They are located at 409 Van Horne street, Toronto.

## PRESS DAY FEATURES

This is Press Day at the Exhibition. Newspapermen from all over the province, and many from points far and near, will be the guests of the directors. The speakers at the luncheon will be J. Taylor, president of the Exhibition; Sir James Loughheed, minister of reconstruction; Lloyd Harris, chairman of the War Canadian War Commission; Washington and Harry Anderson, president of the Toronto Press Club. The whippet races will conclude with tonight's performance in front of the grand stand. Speed motor boats, racing over the Exhibition course, will continue to draw big crowds at 5.30.

## SIR JAMES LOUGHEED Head of the Invalid Soldiers' Aid Commission, who will be a guest of the directors of the Exhibition today.

The provincial government, in its exhibit of the Ontario Bureau of Mines at the Exhibition this year in the government building, has featured minerals from which chemicals are derived. Before war conditions made the demand for chemicals so great, many of the by-products of minerals went to waste. Now these very by-products are proving, if anything, more valuable than the minerals themselves. The complete exhibit is being taken to New York in September to display at the national exposition of chemical industries.

# FEATURE MINERALS GIVING CHEMICALS

## Provincial Government Has Fine Display in the Government Building.

The Ontario Bureau of Mines at the Exhibition this year in the government building, has featured minerals from which chemicals are derived. Before war conditions made the demand for chemicals so great, many of the by-products of minerals went to waste. Now these very by-products are proving, if anything, more valuable than the minerals themselves. The complete exhibit is being taken to New York in September to display at the national exposition of chemical industries.

After the introduction by T. A. Russell, president, who explained that the country responsible for the purpose of public good was the noble service rendered by the dear sons of Canada across the ocean and as a soothed for their sufferings.

He pointed out that the people were here to celebrate the unity of 20 nations allied to fight a common enemy. It was hardly credible that in this century of such high civilization a nation would set out to do what Germany had done, yet it was the fact. "The country responsible for this purpose of public good was the noble service rendered by the dear sons of Canada across the ocean and as a soothed for their sufferings."

## STELLA AGAIN AT THE EXHIBITION.

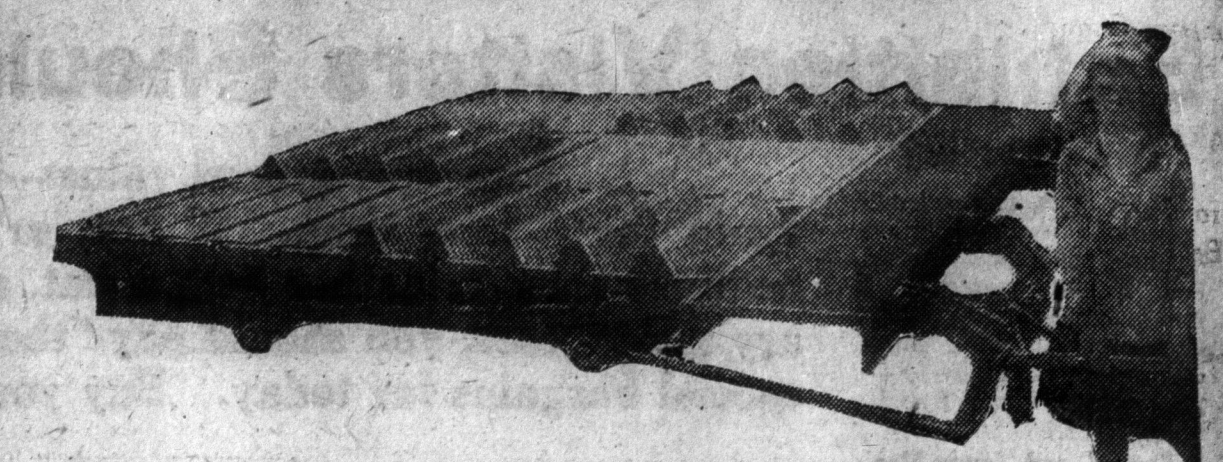

An outstanding feature of the Midway is the well-known painting "Stella" which during the two weeks of last year's Canadian Exhibition drew large crowds to the midway and evoked considerable comment because of its high standing in the Italian school of art.

The painting, which is valued at \$100,000, presents the figure devoid of artificial ornaments to distract the beauties of nature. The girl is shown reclining on a couch, the head resting upon the right arm while the left falls naturally over the body and hips. The flesh tints are very natural, the outlines delicate and effective and the great rolls of hair for the present, the flesh tints are very natural, the outlines delicate and effective and the great rolls of hair for the present, the flesh tints are very natural, the outlines delicate and effective and the great rolls of hair for the present.

# SAVE FUEL, SAVE MONEY

The Nonpareil Shaking and Dumping Grate Bar enables you to make an immediate saving in fuel—a saving that will continue for years. We will install any size, under any kind of a boiler, for a trial period of thirty days, and guarantee to show a saving of not less than 10 per cent. of your fuel. The grates are also guaranteed to give entire satisfaction in every way. You will be the sole judge. If at the end of that time you are not satisfied, remove the grates and return them to us at our expense. It will not cost you a penny. WE ALSO SPECIALIZE IN FIRE-BRICK WORK—re-lining boilers, building and repairing Murphy and Detroit stokers. Agents wanted.

# GREAT ASSEMBLY WELCOMES BELAND

Thrilling Reception to Noted  
Canadian by People at  
Exhibition.

# GERMANY RESPONSIBLE World Conflict Planned, and Population Trained for the War.

An immense audience gathered to hear Hon. Dr. Beland when he spoke from the main bandstand at the Exhibition yesterday afternoon. He was given a most enthusiastic reception. As the distinguished guest stepped on to the stand, the crowd played "O Canada," while the people stood with bared heads. "Three cheers for the gallant doctor," someone called out, and the great assembly cheered to the echo.

After the introduction by T. A. Russell, president, who explained that the country responsible for the purpose of public good was the noble service rendered by the dear sons of Canada across the ocean and as a soothed for their sufferings.

He pointed out that the people were here to celebrate the unity of 20 nations allied to fight a common enemy. It was hardly credible that in this century of such high civilization a nation would set out to do what Germany had done, yet it was the fact. "The country responsible for this purpose of public good was the noble service rendered by the dear sons of Canada across the ocean and as a soothed for their sufferings."

Germany accepted the proposal of England and which was accepted by Italy and France, to settle the difference by a conference, the conflict would have been averted, but he refused. Belgium was overrun and conquered and the calamity of the great war followed. For 25 years the purpose of the nations of the world had been to reduce to a minimum the horrors of war, but Germany had disregarded all treaties, treating them with utter contempt.

Among the great spectacles of the war was the entrance of the United States—the greatest republic in the world. "The coming of the United States into the war will play a decisive part and will prove that with the allies the armies of liberty are no longer a mere slogan, but a reality," he said. "Canada has taken her share, Canada has played a noble part."

Apks for Tolerance.  
The speaker urged tolerance in Canada, defining it as the first public virtue; the qualifying of an extreme opinion for the welfare of the community. He told of meeting the Canadians from Quebec and Ontario as well as other parts of the Dominion and concluded by saying: "I have told them that Canada would enshrine their memory and that our gratitude would continue to descend until the last drop of the Saskatchewan and mighty St. Lawrence had rolled past their deserted homes on its way to the sea; that their memory would be kept as long as the placid bosom of beautiful Lake Ontario will reflect the beauties of a Canadian night."

"I have told them to go ahead and work because their work is the noblest that ever existed; that Canada will emerge from this war a unified land, a land in which all men from all parts will share in the development, a land that will be contented when it resumes its old duties, one of the most prosperous and the best land in the civilized nations of the world."

Great cheering and applause greeted this eloquent passage. It was estimated that between 8000 and 10,000 people heard the address.

See the Child Welfare Clinics and Exhibit conducted by the Provincial Board of Health daily in the north wing of the Government Building.

# Garage Equipment

# Car Owners and Dealers LOOK HERE!

Did you ever think that any spark plug could stand up to its work continuously from 8 a.m. till 10 p.m. every day for two solid weeks without the least sign of a crack in the porcelain?

# Come and See the TUNGSTEN SPARK PLUG AT THE "EX"

In the TUNGSTEN we have the plug that every car owner has often wished for—a plug that will work right along from dawn till dawn without ever ceasing to deliver a big, fat, sizzling hot spark that assures maximum motor efficiency.

And the chief reason is the Cornish Clay from which the porcelain is made. This material is elastic—not brittle like porcelain made from ordinary American Clay. In making the Porcelain for Tungsten Spark Plugs, the Cornish Clay is heated to 2600 degrees—1600 degrees above the point at which ordinary American Clay will melt like wax.

# But--See for Yourself!

We are operating a special machine that shows six Tungsten Spark Plugs at work. They will run all day long from the time the Exhibition opens in the morning till it closes at night. Never else you miss at the Exhibition, be sure you see the demonstration of this super-spark plug.
