It is not proposed that the owners should give up 10 or 20 per cent. of their output, but the people certainly do expect that all the labor connected with taking out the ores and reducing them shall be performed in this country.

They do this because of a false delicacy frequently inculcated by their mothers.

There is a marvelous medicine for women that cures all weakness and disease of the distinctly feminine organism. It acts directly on the delicate and important organs concerned in maternity and makes them strong and healthy. It is Dr. Pierce's Favorite Prescription. It allays inflammation, heals ulceration and soothes pain. It gives rest and tone to the tortured nerves. Under its magic influence the headaches and pains in the back and sides, the dragging and burning sensations, the nervousness, weakness, lassitude and despondency-that result from so-called female weakness are banished. It fits for wifehood and motherhood. Taken during the period of solicitude, it banishes the usual discomforts and makes baby's entry to the world easy and almost painless. It insures the new comer's health and an ample supply of nonrishment. Thousands of women have testified to its marvelous merits. All good druggists sell it.
