NOTE AND COMMENT

There was a brilliant scene on the lawn at Woodbine yesterday immediately after the fourth race, when the members and handsomely-dressed ladies grouped in a circle in front of the stand and witnessed Sir Mortimer Clark present the Earl of Durham's gold cup to Joseph E. Seagrave, whose horse Inferno had just scored a game victory. The president's response was brief but ample. Three hearty cheers and a tiger for Sir Mortimer and Lady Clark were given with gusto, and the distinguished guests seemed to thoroughly appreciate the compliment. Whatever puny objections may be raised to racing in Toronto by a narrow-minded coterie, the crown representatives, both of Toronto and Ottawa, have always lent their dignified patronage to the sport, and the O. J. C. can well afford to ignore the opposition.

The new man-horse disease is now under observation in St. Michael's Hospital. Chas. Whisenand, a trainer at Woodbine Park, has a badly infected hand and arm as a result of coming in contact with the horses in the stable suffering from the new girth disease. Cultures have been made from the wound, and the medical men hope to be able to find out something of this malady.

Again in the excitement the baserunner failed to touch his base and a pennant may fall by the referee's decision. The contention is upheld by the referee, President Pulliam must call the game a tie.

Two Canadian players are figuring prominently in the big league races that are being played at the University of Chicago, Ont., in doing all the catching for the Pittsburgh Pirates, who are running neck-and-neck with New York and Chicago, while Napoleon Lajoie, the French-Canadian, has the Clevelanders right in the grip of the American. And here's hoping that they figure against each other in the world's series.

It seems rather unfortunate that Columbia, which has made rapid strides to the front in rowing circles under Coach Jimmy Rice of Toronto, is about to give up the business, but it is a pity that the university until the deficit which was caused by the expenditures incurred during the season of 1907-8 is paid. The first full meeting of the club was held on Monday night, and at that time resolutions were passed recommending the discontinuance of the sport for 1908-9, or until the debt of \$297.39 is paid.

Of Owens, the Toronto lad just drafted by the Chicago Americans from Memphis, a writer in a Memphis paper said:

"Bully good luck to you, Frankie Owens."

That's what all the fans hope for the popular Memphis catcher in his 1909 berth at Chicago with the White Sox. For he's been drafted by Comiskey's team.

No player has ever earned a warmer place in the hearts of the Memphis fans than this young fellow, who came down here in the spring of 1906, a youngster, hardly out of his teens, but green at the business, but with every natural qualification, and willing and quick to learn.

That year Owens sat on the bench for the greater part of the season, working only when Huriburt needed a rest. Even then he showed a marvelous pegging arm, and he was a runner, but he was still shy of some of the finer points. The next year, 1907, Frankie divided the work with Huriburt, and this year he has been promoted to first catcher. Each season he has shown improvement, until to-day there has not been a writer in this league who has not given Owens the preference over any other receiver. There has probably not been an All-Southern team selected that has not had Owens down for first backstop.

No harder worker, or more willing worker ever wore the Memphis M. on his breast, and this club has he has in the hearts of the fans.

Again it is:

"Bully good luck to you, Frankie Owens."

MOB HELP THE GIANTS TO WIN FROM CUBS

Trouble Arises in the Ninth Innings—Game Has Been Protested—The Scores.

At New York.—According to the official score of the New York Baseball Club, the local Nationals won to-day's game from the champions at the Polo Grounds by the score of 2 to 1. The game has been protested by the Chicago Club, but President Pulliam denied to-night that he had taken any action in the matter. The trouble arose in the ninth inning, when the case has been presented to him in the regular form.

Following is Mr. Pulliam's statement: The New York stock ticker to-night having carried this statement, Harry Pulliam, president of the National League, and the field and Captain Chance of the Chicago team, announced that it must be played over, I say such statement is unauthorized. I have made no decision and I will not until the matter is presented to me in regular form.

In the latter half of the ninth with two out, McCormick, on third, and Merkle on first base, Bridwell smashed a single to center, scoring McCormick. Merkle insisted that he had made no decision and I will not until the matter is presented to me in regular form.

Chicago claimed the run did not count as there was so much interference that his men could not get control of the ball.

Umpire Emile was judging the base running and in credited with saying that he did not see whether Merkle went to second or not. O'Day, later on, declared that the run did not count.

The umpires are expected to make a report to President Pulliam at once.

COLUMBUS, Sept. 23.—Hedgewood Boy, a strong favorite for the free-for-all race of this afternoon's Grand Circuit at Columbus, was defeated by Citation, but the Illinois mare had to set a world's record to do it. Inferno Wins Cup

Beats Hedgewood Boy and Takes a Record of 201 1/4—Canadian Colt, Oro Lambert, Third—Great Racing.

COLUMBUS, Sept. 23.—Hedgewood Boy, a strong favorite for the free-for-all race of this afternoon's Grand Circuit at Columbus, was defeated by Citation, but the Illinois mare had to set a world's record to do it. Her heats in 2:03 and 2:03, following the one by Hedgewood Boy in 2:02, are the fastest two ever paced by a mare. Citation's time was only noted out in the first heat, won in the second by a scant head, and got the third by a scant margin. Citation's time in the second mile equals the world's record for a mare, single mile, made by Bonstette at Resville, Aug. 25, 1898. Summary:
