LIVERPOOL MARKETS.

LONDON STOCK EXCHANGE.

LONDON, April 14.—Money was in brisk demand and discount rates were steady today. Exchequer bonds and treasury bills were well absorbed.

The stock market was steady with the demand principally for war stocks, home rails and colonial bonds. Dealings in other sections were quiet, with weakness in Argentine rails and strength in shipping shares and special mines. The general tone improved near the close on news of the British advance in Mesopotamia, American securities were attected by the political situation and closed dull and easy.

the year 1915.

The figures show that the assessments collected during 1915 amounted to \$1,539,492.58, of which \$1,186,221.62 was distributed, or will be, for accidents, and that a net balance or surplus remains of \$395,026.40, a large ortion of which will be remitted to the employers in lessened rates during the present year. The total number of accidents for which compensation

the present year. The total number of accidents for which compensation was made was 9829. Of these there were 3544 cases of temporary disability, 1084 of permanent and 2b1 deaths. The largest number of accidents occurred from falling, rolling and flying ebjects, namely, 2587; the next from machinory and parts, 2098; third, from falls, 1100; fourth, dangerous substances, such as electric currents, 612; moving vehicles, 270; hoisting apparatus, 208; runsways and animals, 73. Out of those 778 cases developed bloodpoisoning, of which four caused death and 11 amputations.

There were 170,711 days lost, equivalent to 569 men's labor for one year. The amount paid by the board for injuries and disablements required on an average 150 cheques daily, amounting to \$3600.

Employers' Benefit.

The board in its report as to the working of the act says:

"The act has worked smoothly and satisfactorily. The benefits of the new system of law to both workmen and employers are recognized and appreciated. Claims are expeditiously and inexpensively disposed of. Employers are immune from the expense and annoyance of litigation. The intricacios and hardships upon workmen and their families of the old doctrines of negligence, common employment and assumed ris kare eliminated. The facts to be determined by the board are usually few and simple. There is no longer need for payment of legal fees either by workmen or employers."

There were 14,750 employers in schedule 1 contributing to the accident fund, but not individually liable. For schedule 1 there were 1252 employers liable for payment of compensation fixed by the board but not contributing to the accident fund. These included such bodies as railways and municipalities. There were also crown cases, including the Timiskaming and Northern Ontario Rail-

ways and municipalities. There were also crown cases, including the Timiskaming and Northern Ontario Railway and the Hydro-Electric l'ower Commission, who voluntarily placed themselves under the operation of the

board.

The figures show that the average wage of those injured was \$13.27 a week, the average age being 33 years, running between \$1 years, the oldest,

and 11, the youngest.

Provision of the Act.

The working of the act is quite informal, the employer being compelled to send in a notice within three days after the accident, and forms are sent to the workman and surgeon as well. In many cases the claims are subjected to personal Anvestigation by an officer of the board, and evidence is taken on oath. Temporary payments pending a report are fre-quently made for the convenience of

Brig.-Gen. Logie and Lieut.-Col. H. C. Bickford hurriedly left camp headquarters at noon yesterday for the military quarters in Brantford. The call was unexpected, as the G.O.C. did not intend going out of the city, and it is assumed to be a military matter of more than ordinary importance.
