A method similar to the "punch-the-clock" system for church members has been inaugurated in a Pittsboro, N. J., church. Instead of a time clock there is a board with pegs and tags bearing the names of the members. Those who attend turn their tags over to the reverse side and thus the pastor can tell at a glance who the faithful ones are.

# MAY PROHIBIT ALL EXPORTS

Rumor of German Plan to Induce United States to Seek End of British Blockade of Traffic

Washington, Oct. 30.—Unofficial information reached Washington through several reliable channels that the German government contemplated the prohibition of all exports from that country. Such an embargo would not only raise serious issues for the government of the United States, growing out of the importunities of importing, but would result in losses, running into the millions, for American importing houses, which for months have been clamoring for German and Austrian goods for this winter's holiday trade. These goods have been tied up in Holland, Germany and Austria by the British order-in-council.

To complicate the situation involved in the effort to bring these American owned goods to the United States, it was learned that unofficial information has reached Washington that the British government was contemplating refusing to permit the passage of any goods of the class upon which Germans might have placed such an embargo. This, it is said, would seriously hinder the efforts of the state department's trade advisors to facilitate the shipment of such goods.

There has been no official confirmation of either of these reports, as is to be expected. The information is of such a character that officials here are inclined to regard it as authentic. Should this be so it is probable that President Wilson and Secretary Lansing will find it necessary to take vigorous diplomatic action in an effort to facilitate the movement of American owned goods now in Germany.

According to the unofficial information received here, the Berlin government contemplates the embargo in an effort to force Great Britain and the allies to relax the blockade or to permit American cotton and other goods to enter Germany when destined only for the use of the civil population. It was intimated here tonight that the Berlin government felt that in the present condition of affairs, Germany could very well afford to establish such an embargo.
