CARRYING COAL FOR ROJESTVENSKY'S SHIPS.

New York, May 22. The Paris corre spondent of the Times cables that he hears from a well-informed Russian source that the rendezvous of Admira Rojestvensky is an island in Balintang Channel, probably Babuyan Claro. This sland is north of Luzon. A Russian coaling fleet, consisting of 27 colliers and three other ships, supposed to be carrying ammunition, with sailing orders from Hamburg, received instructions at Singapore that the island in Balintang channe would merely be a point of rendezvous where the coaling fleet might receive further instructions from Rojestvensky.

As to the particular harbor or bay where Rojestvensky's fleet will coal, it

will in all probability be somewhere on the coast of the Island of Luzon, that is to say in American waters. From the information, it would seem that Rojestvensky's intention is to con-

THE CABINET VACANCY.

More Teamsters Forced Into Struggle-Phousands of Men May Be Thrown Idle.

STRIKE SPREADING

Chicago, May 22.-The spreading of the teamsters' strike began promptly to-day. Thirty-six teamsters employed by the Ritten Ross & Embree Company, lumber dealers, and four by the Edward Hines Lumber Company, were the first to be forced into the struggle.

Through the threatened spread of the strike to all lumber dealers, every branch of the building industry in Chicago was to-day apparently facing paralysis. There are only 800 teamsters employed by lumber firms, but so close are the relations between them and several other unions of the men engaged in hauling building material, that the walk-out of plumber teamsters, it is said, would doubtless lead to a strike in nearly every department of the business industry. Directly dependent upon the building those two gentlemen came on to the material teamsters, it was estimated to-coast, Dr. Rutherford went down to day, hung the employment of one hundred thousand men-mill yard, factory Improvements in

and construction workers. The same programme was seemingly in store for the stoneworkers and industries dependent upon them. The planing mills, the sash and door factories, the box factories and kindred plants would also face soon a shortage of lumber supplies, which would necessitate the closing down state veterinaries of Washington, and of the different mills and factories.
