

LARD MUST GO. Cottolene. The matter may seem only a trifling one to the Department but it is not creditable to the efficiency of your management, nor does it indicate a disposition to give a proper service to a very large and important section of the country.

M. S. N. Co. The Miramichi, on and after Monday the 10th of Oct., will make three trips a week for points down and up the river.

Miramichi Advance. CHATHAM, N. B., NOVEMBER 9, 1893. A Postal Grievance. People of Blackville and other points along the line of the Canada Eastern Railway, and their correspondents elsewhere, have good reason to complain of the Sleepy-Hollow style in which their mail service is managed by the post office department.

The Miramichi ball has rolled into Halifax, according to the following despatch to the Sun:— "Pursuant to the new interpretation of the treaty relating to masters on board of steam vessels under one hundred tons, plying and registered in Canada, nine persons being in command or officers on such steam vessels, lighters and tug boats in Halifax and along the shore have come forward, passing the prescribed examination and have been awarded certificates of service. Capt. Mills of Gervais City has made application for a certificate of service.

Woman's Work. The class of women who are reforming everything and, at the same time, placing their individuality above their work, will not think much of Lady Aberdeen, the first lady of Canada, who, in an interview with a representative of the Chicago Herald, said:— "The fault I find with woman's work is that I have encountered it, that you capitalize the woman rather than the work. In England we do much, but we always spell woman with a little w. 'Do you understand I would not for the world be quoted as saying anything harshly critical about the noble women workers in this country. Their methods are different from ours, only we work very quietly in England, and we always place our homes and our children above all else. It seems to me, sometimes, that many of the American women put domestic matters first and promote material aims in societies rather than practical work."

The Tappers on Top! One of the first measures that will be submitted to parliament by the Dominion government at this coming session will be a bill to ratify the treaty negotiated last winter by the Marquis of Dufferin and Sir Charles Tupper, on behalf of France, with the government of the French republic, which treaty was practically repudiated and condemned by the Dominion government last session.

Mr. Bowell is on his way to Australia on a trade mission and Mr. Foster is in Manitoba. Both these gentlemen are said to be still strongly opposed to the ratification of Sir Charles Tupper's French treaty, but the prospect of having to fight the two Tappers in the event of a failure to ratify will no doubt bring them to terms. Friends of the Tappers believe that the government will take its existence upon a motion to ratify the French treaty in parliament rather than allow Sir Charles and his son to go into opposition, and also point out that Sir Charles has been throwing anancers to windward by making eulogistic references to Mr. Blake and other Liberal leaders.

Gloucester County Court. JUDGE WILKINSON PAYS A GLORIOUS TRIBUTE TO THE LATE THOMPSON DISASTER. BATHURST, 7TH NOVEMBER, 1893. The November term of the County Court of Gloucester County, His Honor Judge Wilkinson presiding. There was no grand jury and time was granted by the court to counsel to give the civil cause, should there be any. The lawyers present were Messrs. R. A. Lawlor, N. A. Landry, Robert Gilbert, John J. Harrington and Gustavus McLaughlin.

Parliament was prorogued and the story was for a time transferred to the other side of the Atlantic. Before Mr. Foster had announced that the treaty would not be submitted for ratification, Sir John Thompson, the premier, had left for Paris to serve as arbitrator in the Behring Sea case, and Sir John was on

filled the office of clerk of this court and court prosecutor; his voice has been forever, and his remains now lie in a casket made ready for burial. I have no doubt that your feelings harmonize with my own on this occasion, and I should not think it strange that I should desire to offer a well-deserved personal tribute of friendship, as well as to express my estimate of the value of his services as the clerk of this court and all the duties connected with the office for so unusual a period, and especially from the time of my preceding over this court. For myself, I may say I have known the deceased clerk for over 50 years. Even at that time he was a well-read, well-learned, able practitioner—no superficial pretender. A word of encouragement and a kindly word from him, and the beginner was made to feel that the public is bound in self-defence to render.

A Toronto despatch says:—A daring attempt to catch a forged draft, was made at Winnipeg on Wednesday 1st inst. The draft, which was for \$7,000, was presented on Wednesday last week at the branch of the Bank of Montreal there for \$7,000. It bore the signature of Messrs. Winslow, pro manager of Toronto Bank, and A. L. Branchard, pro accountant. It was soon learned that no such draft had ever been issued and that the signatures were bogus.

Some idea of the abundance of game, big and little, in the wilderness of the Northwest mountain ranges may be gathered from the record of a recent hunting for business in the Cascade Mountains about Mount Hood, by W. G. Clark, a noted trapper, who used one time to hunt with Buffum. He had pitched his camp on the north side of Mount Hood just about noon-fall last year, and was in exile for six or eight months. Part of the time the snow was twenty feet deep. In little more than a month he killed 120 elk and over 200 deer, and sent the skins to Portland by a packer. When the snow got too deep for hunting he took to his traps, and when summer set in returned to civilization with \$2,000 worth of mink, sable, marten, fox and other skins, which he worth \$300. He had also cleared about \$5,000 by his season's hunting. He got no bears, for though there are plenty of them in the mountains, they are held up in the winter.

London, November 3.—Details of the British victory over the Metabales and King Lobengula state that the first fighting occurred between Hope Fountain and the Metabales in the mountains concentrated in force. The Metabales were armed principally with their native weapons, assegais and knobkerries, although some of them had rifles that proved of little service to them. They were not only inferior to the British in their arms, but also in their tactics. The latter, however, with their superior arms and their Gatling guns, were able without trouble to keep them from getting into dangerously close quarters. During one of the fights Hope Fountain's ammunition was almost exhausted and he was slain by the British. The Metabales and King Lobengula were finally forced to retreat, followed by the Queen's Company's forces. They followed the road to Bulawayo, where everything was in the greatest confusion, runners having arrived with news of the Metabale defeat. The loss of the Metabales was 3000, killed and wounded. The King commanded in person.

News and Notes. The careless use of fire-arms has resulted in a serious accident that happened at Ed. River. A young man named LeBlanc, while out shooting, had the muzzle of his gun on his foot to remove the cap when it accidentally went off carrying away a part of his foot.—Enterprise.
