KIPLING'S

vale, public, or international. He does not recognize the existence of any laws, least of all those he has subscribed to himself, in making war against combatants or non-combatants, men, women and children. "He has done from his own point of view very well indeed. All mankind bears witness today that there is no crime, no cruelty, no abomination that the mind of man can conceive which the German has not perpetrated, is not perpetrating and will not perpetrate if he is allowed to go on. These horrors and perversions were not invented by him on the spur of the moment. They were arranged beforehand, their outlines are laid down in the German war book. They are part of the system in which Germany has been scientifically trained. are part of the system in which Germany has been scientifically trained. It is the essence of that system to make such a hell of the countries where her armies set foot, that any terms she my offer will seem like heaven to the people whose bodies involved amounted to \$35,825, while she has defiled and whose mids she.

A Long War Ahead

"Up to the present, as far as we can find out, Germany has suffered some three million casualties. She can suffer another three million, and, for aught we know, another three million after that. We have no reason to believe that he will break that an will break that an expension of the second se to believe that she will break up sud denly and dramatically, as a few peo-ple still expect. Why should she? She took two generations to prepare her-self in every detail, and through every fibre of her national being for this war. She is playing for the highest rules in the world-whe demitted of stakes in the world—the dominion of the world. It seems to me that she must either win or bleed to death almost where her lines run today. Therefore, we and our allies must continue to pass our children through fire to Moich until Moloch perish. This,

making war material or fortifications "Dr. Fowler's" on the market, so see you for their conquerors. They are given enough food to support life as the German thinks it should be supported by the way, I believe the United States of America supplies a large part of that food. In return they are compalled to work as the point of the pelled to work at the point of the

bayonet. If they object they are shot. Their factories, their houses and their public buildings have long ago been gutted, and everything in them that was valuable or useful has been packed up and sent into Germany. They have no more property, and no more rights than cattle; and they cannot lift a hand to protect the honor of their women. And less than a year ago they were one of the most civilized and prosperous of the nations of the earth.

FACTS IN THE FACE

Would Fare Worse Than Beiglum
"There has been nothing like the horror of their fate in all history, and this system is in full working order within fifty miles of the English coast. Where I live I can hear the guns that we trying to extend it. The same system exists in such parts of France and Poland as are in German hands. But whatever has been dealt out to Belgium, France and Poland will be England's fate tenfold if we fail to subdue the Germans. That we shall be broken, plundered, robbed and enslaved like Belgium will be but the first part of the matter. Over and above this, no pledge we can offer, no guarantee we can give will be accepted by Germany as binding. She has

she has defilled and whose minds she the liabilities were \$88,203. For the has broken of set purpose and intention. So long as an unbroken Germany exists, so long will life on this bilities set \$205,900. In St. John the planet be intolerable, not only for us and for our allies, but for all humanity. And humanity knows it.

WATER WAS BAD. GOT DIARRHOEA.

Change of water, change of diet catching cold, eating unripe fruit, etc. are all causes of diarrhoea.

The safest and quickest cure for diarrhoea, dysentery, colic, cholera, chol-era morbus, cholera infantum and all looseness of the bowels is Dr. Fowler's Extract of Wild Strawberry.

Therefore, we and our allies must continue to pass our children through fire to Molch until Moloch perish. This, as I can see, is where we stand, and Germany stands.

America Giving Germany Food

"Turn your mind for a moment to the idea of a conquering Germany You need not go far to see what it would mean to us. In Belgium at this hour, several millions of Belgians are making war material or fortifications

Extract of Wild Strawberry.

SHAKING HANDS WITH THE COLONEL BEFORE LEAVING TO PERFORM A DANGEROUS TASK This incident, drawn especially for this newspaper, the New York Heraid and the London Sphere, occurred in the heavy fighting around Ypres during the fight for the canal. In describing the action a correspondent wrote:— "A small body of Canadians performed a particularly gallant service. While the Germans were rushing the bridges orders came that a pontion must be held at all costs, and as far as possible intact. The colonal in command of the section could only spare two companies for the work. In sending them out he wrung the sectional commander's hand and wished him 'goodby,' for the task seemed to involve certain death. Digging themselves in on the caual bank the two companies withstood the awful onslaught. Behind them the pontoon was mined, and the engineers on the farther bank lay ready to blow it up when all resistance was over. But they battled on and held their ground till the German attack was defeated. The bridge was saved intact, and the gallant commander was able to bring in his two companies with surprisingly small loss." It should be mentioned that although the sectional commander is usually a commissioned officer when he goes into action he discards his ordinary uniform and dresses as a private so that the enemy may not be able to distinguish him too easily.
