

There seems no doubt to the writer that the last solution wherein all the observations on both components are grouped into one set of observation equations resulting in a u...iform set of values, is the only rigid one, and, as previously stated, the suggestion for such a procedure came from the Director, Dr. W. F. King, to whom my acknowledgements are due for this and other valuable suggestions.

One detail in which, for future work, the foregoing can be improved upon. The two groupings representing the blend
