SECURE THIS NEW BOOK
ENTITLED
SWINE IN AMERICA
By F. D. COBURN
Secy. Kansas Dept. of Agriculture

It will help you
MAKE MORE MONEY
Out of the Hog Business

This volume is handsomely printed on fine paper from large, clear type, and is profusely illustrated, containing a large number of magnificent half-tone illustrations and drawings, many of them full page plates which are printed on a special plate paper. Another marked feature is the frontispiece, this being an anatomical and physiological model of the hog, which appears in a book of this character for the first time. It is entirely new and original, and should prove of the greatest value to every owner, teacher, student, stockman, farmer, or general reader.

The work contains 704 pages (6 by 9 inches) bound in fine silk cloth, making a very handsome and attractive book. No one can claim to be up to date in swine matters unless he possesses a copy.

Price, prepaid to your address, \$2.50

CRUMB'S IMPROVED WARRINER STANCHION

Prof. F. G. Haysar of Mt. Herman School, Mt. Herman, Mass., writes: "We could not get along without Warren's Stanchions." Send address for booklet of information to WALLACE B. CRUMB, Box 191, Forestville, Conn.

Why buy another farm?

Are you thinking of buying another farm in order to extend your operations and produce larger crops? You will find it better in almost every way to build a new farm on top of the one you now have.

Do not seek to farm more acres but make your land produce more bushels.

If the farm you now have produces—say 30 bushels of oats per acre, instead of buying more land to get an additional 35-bushel yield, why not make the farm you have produce 70 bushels per acre? You can do it.

Buy an I. H. C. Manure Spreader

It is the machine which enables you to take the manure produced on the farm and in a few years fully double the productive power of your land.

It does this by placing the manure on the soil in the most available condition to support plant life. It also makes the manure go further than can be done in any other way.

I. H. C. manure spreaders are made in two styles: Corn King and Cloverleaf.

The Corn King The steel roller equipment of the apron on this machine reduces friction to the minimum, even with the heaviest loads. This machine will be supplied with either a ratchet feed or a double pawl worm feed for the apron. Either of these feeds can be regulated to bring the desired amount of manure to the beater. The beater is equipped with long, square steel teeth with chisel points. It is driven by means of a chain from a large sprocket on the rear axle. A vibrating rake is used on this machine to level the load as it comes to the beater. The Corn King spreader has steel wheels of the most serviceable construction and a frame made of thor-

oughly air-dried wood stock and put together in a very durable manner. There are three sizes of this machine: No. 3 small, No. 3 medium and No. 4 large.

The Cloverleaf is of the endless apron type. It is also supplied with two leads for the apron—ratchet or double pawl worm feed. The beater on this machine is constructed the same as the beater on the Corn King. This spreader also has a vibrating rake to level the load as it comes to the beater, has steel wheels and a well made main frame. This spreader is made in three sizes: No. 2 small, No. 3 medium and No. 4 large. It is very attractive, being well painted and symmetrically designed.

Many Excellent Features

It is impossible to describe all of the features of the above machines in this small space. However, we have catalogs which illustrate and describe in detail the many excellent features of these machines. These catalogs are well worth procuring, not only because they describe the spreaders, but because they contain information on soil fertility.

Points that are well to bear in mind in connection with these spreaders are that you can top-dress your fields and grow large crops of clover to turn under and enrich the soil, so that you may grow still larger crops and add to the soil's fertility. They double the value of the manure, save much time and labor and greatly increase the value of your land by increasing the soil's fertility.

Any one of these machines will pay for itself in from two to two years, depending upon the amount of work you have for it to do.

Call on the International local agent and see about owning one of these manure spreaders. He will supply you with catalog and full information, or write direct to nearest branch house.

International Harvester Company of America, Chicago, U. S. A. (Incorporated)
