

Synopsis of Canadian North-West Land Regulations

THE sole head of a family, or any male over 18 years old, may homestead a quartersection of available Dominion land in Manitoba,
Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or
Sub-Agency for the District. Entry by proxy
may be made at any Dominion Lands Agency
(that not Sub-Agency) on certain conditions. (but not Sub-Agency), on certain conditions.

Dutles—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable honse is required except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section along-edde his homestead. Price \$3.00 per acre.

Duties—Six months residence in each of three years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be vobtained as soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Frice \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate \$0 acres and erect a house worth \$300.

The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

W. W. CORY, C.M.G., Deputy of the Minister of the Interior.

You Can Save Enough Money By Feeding Silage This Winter to Pay For This Silo

JOU cannot save money by wasting feed, and you are wasting feed as long as you do without a silo. If you keep dairy cattle, beef cattle or sheep, you should feed silage. It is a rich, juicy feed that stock relish and digest better than dry feed. You can get at least 25 per cent more profit from feeding them silage.

A large part of the food value of your corn crop is in the fodder, and most of it is wasted when allowed to dry and stand exposed to the weather or be scattered around when feeding. Put it in the silo and stop this waste. Stock eat silage up clean stalks, leaves, cobs and all.

It is not a question of whether you can afford a silo, but whether you can afford to waste from one-third to onehalf of the feeding value of your corn crop; and whether you can afford to have your stock go through the winter on dry, unpalatable feed, from which they cannot produce the best results for you.

There is still ample time for you to get an Ideal Green Feed Silo erected before silo-filling time, providing you order at once. We can assure a prompt delivery and complete satisfaction. Under ordinary circumstances the Ideal Green Feed Silo will last from twenty to thirty years, and save its cost every year you use it.

Write us, stating what size silo you want or how many head of stock you wish to feed. We will send prices and complete information.
