

Northern Ontario

The forest and mineral wealth of Northern Ontario has attracted many people from all parts of the civilized world.

One ninth of the world's reported output of silver in 1908 was taken from Ontario mines.

New discoveries of undoubted richness are being constantly reported from sections far distant from the far-famed Cobalt. Yet a more certain reward is insured to the settler who acquires for himself 160 acres of the rich agricultural lands now open for settlement and made accessible through the construction of railways and Colonization Roads.

The fertility of the soil is unsurpassed. The timber is in demand at a rising price. Mining, railway and Colonization Road construction, lumbering, etc., afford work in abundance to those who have not the means to remain on their farms continually. These also provide a market for farm produce at prices unequalled anywhere.

Cochrane, the terminus of the T. & N. O. Ry., on the G. T. P. Transcontinental Railway, now under construction, is in the same latitude as the southern part of Manitoba, and 800 miles nearer the seaboard.

That the experimental stage is past is clearly demonstrated. The country is rapidly filling up with settlers from many of the other Provinces, the United States and Europe.

For information as to terms of sale, homestead regulations and for special colonization rates to settlers and for settlers' effects write to

D. SUTHERLAND, The Director of Colonization,
Parliament Buildings, TORONTO.
HON. J. S. DUFF,
Minister of Agriculture.

Galt Shingles

ANY progressive minded, unprejudiced man must admit that as a roofing material for any building, public or private, slate has only one advantage—durability. It is not water-tight. It is very expensive to lay and more expensive to repair. Its immense weight necessitates a heavy roof frame and massive walls.

And you can't concede even permanence to slate in comparison with "GALT" Steel Shingles. For you think that a roof which keeps out snow and rain, is handsome and dignified in appearance and fire and lightning proof for 50 years is a better investment than one that leaks for three hundred? That's what a roof of "GALT" Shingles does. They are easily laid by any man and will last indefinitely without any attention whatever. Locks or seams are automatic and complete in each sheet—no trimming, punching or soldering required. "GALT" Shingles are the result of years of study and effort to produce for a reasonable price a practical roofing material suitable for all classes of buildings.

Our free booklet "Roofing Economy" fresh from the press tells all about this modern roofing. Name and address?

GOOLD, SHAPLEY & MUIR CO., LIMITED,
Brantford, Canada.

"BT" Steel Stalls and Stanchions

With cement floors reduce labor to a minimum, and make bright and sanitary stables. They are practically indestructible, while the out-of-date stables are constantly in need of repair, and are short-lived when compared with the latest and most up-to-date stables.

Our new catalogue contains a lot of valuable information for you if you are building a new barn or remodeling your old one. It is free, and a post card with your name and address plainly written will bring it. Write: **Beatty Bros, Fergus, Ont.**
