

To Prospective Stallion and Mare Buyers

We have at our barns the largest and finest bunch of imported approved Percheron Stallions and Mares ever brought into this country. Our stallions range in age from two-year-olds to six, and are all the large, drafty, heavy-boned type and good movers. Our mares, of which only a few are left, range from two to five years old, and are all in foal. As we buy for cash direct from the small French farmer, we are able to sell at prices that will save any buyer from \$200 to \$500 on a stallion, and give more quality and breeding. To all parties contemplating buying a stallion, we feel confident that it will be to their advantage to inspect our stock, as we sell below competition. Correspondence invited from all interested parties.

R. HAMILTON & SON, SIMCOE, ONT.

UNION STOCK - YARDS Horse Exchange WEST TORONTO, CANADA.

NEW IMPORTATION OF CLYDESDALES

Superior breeding and quality, selected for the requirements of the Canadian trade—9 stallions, 6 fillies, 3 colts, including prizewinners and champions. This consignment will bear close inspection, and will be sold at moderate profit. Phone connection. **GEORGE G. STEWART, Howick, Que.**

ELM PARK Clydes, Aberdeen-Angus and Suffolks. We have at present six Clyde mares recorded in both Canadian and American Studbooks. Three of them sired by Lord Charming (2264), and two of them in foal to Montecicco Marquis (6735). Our cattle number fifty-five head of both sexes. Our Suffolk sheep are doing well, and flock numbers sixty-seven. **James Bowman, Elm Park, Guelph, Ont.**

QUESTIONS AND ANSWERS. Miscellaneous.

SERVICES OF STALLION.

A is owner of stallion and breeds mare for B, who afterwards sells her by public auction to C, at the same time making the announcement that the man that bought the mare must pay for service fee of stallion. C simply buys mare for his brother, D, who afterwards sells her to E, at the same time agreeing that he, D, is to pay for colt. Who is A to look to for payment of said account? **STALLION OWNER.**

Ontario.

Ans.—To B.

ACTION AGAINST MUNICIPALITY.

The council of our township have constructed large ditches on the roadside. While I was driving on the road in the night, my horse took fright and plunged into one of those ditches, doing a lot of damage to my rig.

1. Is the council responsible for the damages?
2. If so, how shall I proceed?

SUBSCRIBER.

Ontario.

Ans.—1. It is probable that the municipal corporation is liable for the damages sustained.

2. A preliminary notice to the council is required to be given; then, if necessary, an action may be brought. You should instruct a solicitor at the outset to take the requisite proceedings for you.

OMISSION TO ASSESS.

An assessor fails to return his roll by the time prescribed by the Municipal Act, namely, the 30th of April, but returns it several days later. The Clerk, looking over the Roll, notices some property not assessed. The Assessor takes the Roll away again and adds these parcels of land to the Roll and returns it to the Clerk. The Council hold a Court of Revision, and, after some changes, a motion is passed that the Assessment Roll, as revised, be adopted. Afterwards, it is found there is other property that was not assessed.

1. Can this property be placed on the Collector's Roll?
2. Would the foregoing be a legal assessment?
3. Who would have the right to place it on the Collector's Roll?

F. R.

Ans.—1. Yes. Not, however, upon the Roll in question, but upon the next Collector's Roll.

2. Yes.

3. The Clerk. See Section 51. of the Assessment Act (4 Edw. vii., Chap. 23).

SYMPTOMS OF HEAVES.

I have a horse fifteen years old that has been coughing more or less for the last two months, and, in breathing, draws his sides in rather quickly. Would those symptoms indicate heaves? Cough is dry. **A. W. C.**

Ans.—In heaves, the act of inspiration, or "breathing in," is somewhat shorter and quicker than in a healthy horse, but not always so different as to be noticed. It is in expiration that the difference is noticed. In heavy horses, expiration is in two jets, the second part of the outbreathing being accompanied by a contraction of the walls of the flank. When the disease is established, there is no cure. Proper attention paid to the diet will relieve the distressing symptoms to an extent. Clover hay, bulky, nutritious food, or dusty, moldy food, should be omitted entirely. The diet should be confined to food of the best quality, and of the smallest quantity. Feed good hay only once a day, and then only a little. Preferably, it should be cut and dampened with lime water. Water always before, never right after a meal. Carrots, potatoes, or turnips, chopped and mixed with oats, are good diet. If the bowels do not act regularly, a pint of raw linseed oil may be given once or twice a month. You might give, every morning, a ball composed of 2 drams solid extract of belladonna, 1 dram powdered opium, and 1 dram camphor, with sufficient oil of tar to make plastic; roll in tissue paper, and administer, or mix with 1 pint of cold water, and give as a drench.

HORSE OWNERS! USE

CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all blemishes from horses. Impossible to produce scar or blemish. Send for circulars. Special advice free.

THE LAWRENCE-WILLIAMS CO., Toronto, Canada
