Shorthorns Poland Chinas and Chester Whites—Am offering some choice young bulls and calves. Boars fit for service, sows in farrow and young pigs of either sex, both breeds. Quality and prices right. Geo. G. Gould, Edgars Mills, Ont., Essex County.

During her second period she gave 10,519 pounds of milk in 299 days.

Given even quantity of food, the percentage of beef return is as large as can be shown by any other breed. The beef is of fine quality and as fatteners, South Devons are not surpassed in England and will go from store to fat beasts quickly on good pasture and a little cake or corn. They require no expensive or extensive course of fattening! At Newton Abbot Fat Stock Show, held so recently as December last, four steers in one class gave the wonderful average weight of 1 ton 1 qr. 9 lbs. each. The heaviest animal weighed 22 cwt. 2 qrs. 7 lbs.

We dropped in at the Devon County Show, held at Totnes, and saw these wonderful Devon cattle in the ring. They made the strongest section numerically in the cattle yards. In old bulls there were some remarkably massive specimens. The grand red, New Year's Gift, belonging to C. A. Hanson, stood out prominently for quality and substance. Five years and five months old, by Charleton Hero, he measured nine feet from horns to root of tail, and his girth behind the shoulders was nine feet five inches, while he scaled the enormous weight of 3120 lbs.—the heaviest since Nimrod's days. He carried off the challenge cup. In the two-year-old bulls, however, Ben Luscombe led with Langston King, a smart son of Leigham Sort. There were nearly a dozen bulls calved in 1913 and one of the best seen out for years gained the blue for A. Rogers. The cows made a fine array. Orange Girl maintained her unbeaten record and won the cup for females for Messrs. D. Camp and Sons for the second year. There were nine yearling heifers, and here Messrs. Camp and Sons scored again with Orange Girl 2nd, a daughter of the champion.

Many excellent papers were read at the Conferences held on this jaunt. Mr. B. N. Wale spoke on calf rearing and emphasised the importance of strict cleanliness in all matters: the scalding of the feeding buckets and other utensils in which the food is fed or stored, lime-washing the walls of the calf-pens periodically, and the use of sufficient bedding material for the calf to have a dry bed at all times. Cleanliness is the chief factor, because a man finds he is unable to rear calves on milk fat or milk substitutes, which others have found satisfactory, may be due to the neglect of these points and not to any faultiness of the food.

MILK TOPICS

Some astonishing milk yields are recorded in the English Dairy Shorthorn Association's Year Book. These figures should give far-away lovers of the dual-purpose Shorthorn cause for thought. The yields are taken from October 1st, 1912 to September 30th, 1913, and we quote, too, the number of days in milk—

Owner and Cow	Days in Milk	
	Yield.	Milk.
Cambs. Univ. Dep. Agric's Eaglethorpe Gwynne 5th.	10,202	335
Lord Derby's Millicent Waterloo 2nd.	10,830	334
Lord Derby's Waterloo Lily 2nd.	10,528	308
R. W. Hobbs and Sons' Dulce 7th.	10,770	313
R. W. Hobbs and Sons' Solo 6th.	10,479	325
A. J. Hollington's Nelly Lee 16th.	11,070	321
Lord Lucas' Charity 23rd.	10,425	302
W. A. Pilkington's Red-Va's Jessamine	10,479	323
J. Ellis Potter's Bartlow Grand Duchess 5th.	12,949	290
J. Ellis Potter's Ewerby Countess 4th.	10,554	354
Lord Rothschild's Dolly Grey	13,132	300
Lord Rothschild's Dorothy Samuel Sanders's Gladys Rose 9th.	10,288	274

J. W. Sander's Kensington	10,069	312
Charles Jones's Grey Grey	10,542	319
Charles Jones's W. Yarns	11,972	337

It is a well-known fact that the milk yield of a cow is largely determined by the quality of the food which is fed to her. It is a well-known fact that the milk yield of a cow is largely determined by the quality of the food which is fed to her. It is a well-known fact that the milk yield of a cow is largely determined by the quality of the food which is fed to her.

McCormick—The Binder of Satisfactory Service

HERE are some of the things that stand back of McCormick binder service.

On a McCormick binder the reel has a wide range of adjustment and handles successfully, tall, short, down or tangled grain. A third packer assists in handling grain that is full of undergrowth or that is very short. The bottoms of the guards are nearly level with bottom of the platform, allowing the platform to be tilted to cut close to the ground without pushing trash ahead of the knives.

The floating elevator on a McCormick binder handles grain in any quantity and does not clog. The cutter bar is built to use either smooth section or serrated knives. The improved McCormick knoter does good work without the usual close adjustments.

The McCormick local agent will explain these and other important features on the McCormick binders which are built especially to meet Eastern Canadian conditions. You can get catalogues from him, or, by writing the nearest branch house.

CLAREMONT STATION, C. P. R.

ROUTE 2, CLAREMONT, ONT.

100

SHORTHORNS IN OUR HERD
Our 1913 crop of 22 bulls are all sold, we have 20 extra bull calves coming on for the fall trade. For sale—25 heifers and young cows; those old enough are bred to Right Sort (imp.) or Raphael (imp.), both prize winners at Toronto last fall.

100

MITCHELL BROS. Farm 1/4 mile from Burlington Junction BURLINGTON, ONT.

Springhurst Shorthorns

Shorthorn cattle have come to their own; the demand and prices are rapidly increasing, now is the time to strengthen your herd. I have over a dozen heifers, from 10 months to two years of age, for sale; everyone of them a show heifer, and some of them very choice. Bred in my great prize-winning strains. Only one bull left—a red, 18 months old.
