shirments from Boston is causing much anxiety to the steamship managers. Notwithstanding the fact that the steamers are making a lower rate than has been quoted for some time, the business is stagnant, only a triffing amount in the way of cereals having been booked for the balance of the month. Montreal is getting the bulk of the grain shipments at the present time, quoting rates three and four cents lower than Boston,- Portland Argus.

Doctors to Gather Here From All Parts of the Dominion

St. John is highly likely to make a noise next year like the chief medical centre of Canada. It is expected that three large medical associations will gather here simultaneously. At the final meeting yesterday of the New Brunswick Medical Society, it was decided that the session for 1910 would be held in this city, owing to he fact that the Maritime Association is meeting here. The third Tuesday in July is likely to see the city full of doctors, as that is the regulation date

of the provincial meeting, and arrangements are being made to have the Nova Scotia and Prince Edward Island doctors here on the same day, the smaller society merging with the lat-The Canadian Medical Association is also due to meet in the Maritime Provinces next year. This fall it is meeting in Winnipeg. As the Marime Society is meeting here for a certainty, it is unlikely that the other provinces will oppose the move to have the Dominion meeting here. This plan will save them all a trip. Short meet-

ings of the smaller societies will likely be held prior to their merging into the big one. At the final session of the N. B. Society, held yesterday mornings, Dr. Thomas Walker, president of the Anti-Tuberculosis Society, made a vigorous appeal for assistance in fighting, the plague. He deplored the action of various counties in refusing to work up sufficient public interest. Others participated in the discussion, and t is probable that the society will here after more vigorously attack tu-

During the past year one hundred and fifteen persons have died in the city from tuberculosis, but it was impossible to secure a meeting to consider the treatment and prevention of

Dr. Walker appealed to the meeting the evil. But two counties had formed The speaker made a strong protest against the suggestion of Dr. Butler to patients reside. He again deplored the nactivity of the people of New Brunswick in not uniting to stampede this disease. The prevention of tuberculosis is preferable to the cure. To eradicate

he disease the aira should be at prevention. It is also important to disinfect the sick room at regular intervals. The patient should have a separate room. The municipalities of New Brunswick should care for the pauper tuberculosis patients. In the province there are but four beds for consumptive patients. The speaker also referred to the necessity of the disinfection of the schools. He related personal experiences in the treatment of the disease and told of the great benefit of fresh air. A tuberculous patient under proper treatment receives practically six meals a day.
