The North Star Mine Shipping Coa-

IT IS A VERY RICH PROPERTY

and Carries Ore of a Good Grade-Progress of the Work on the Mascot and Sunset.

Messrs. Frank Robbins and Neill McL. Curran arrived in the city last evening from the North Star mine, East Kootenay. Mr. Robbins is the general manager of this mine and Mr. Curran the financial agent. They report that the mine is now shipping from 75 to 100 tons of ore per day to the Trail smelter. The railway from Cranbrook to the end of the North Star tramway is completed. It covers a distance of 21 miles. The tramway from the North Star tunnel mouths to the railflat one, similar to those found in Lead-ville, and is one of the largest mines in C. C. East Kootenay. The ore carries about 60 per cent lead and from 40 to 60 per cent

Strawberry is Looking Well.

Mr. A. B. Clabon and Mr. Neil Cocarane returned last evening from a visit to the Strawberry mineral claim, which is being operate by the Quebec-Boundary Mining company. This property is located about 12 miles from Grand Forks on the north Fork of the Kettle river. They went for the purpose of examining and making a report on the condition of the property. Twenty-six feet from the bottom of a 55foot shaft, in a crosscut, the ore body was for visitors, a distance of 28 feet, and has been thoroughly sampled, but the assays have not yet been made. The ore is mostly pyrrhotite and chalcopyrite. The ore is solid from wall to wall. It is proposed to continue active development work. For the amount of work done the outlook is very

Work on the Mascot.

Work on the Mascot, which is owned by the Big Three Mining company, is being pushed energetically. Early in January the work of cutting out a station on the vein on the lower tunnel, at a point 750 feet from its mouth, was commenced. This station has been completed, and a noising plant installed. In addition to this a -compartment winze has been sunk to a depth of 50 feet. It is run on the ledge, which has a showing of three and a half feet of ore. This will be deepened 50 feet more, which will give a total depth

of 600 feet from the surface, and then drifting both ways will be commenced upon the ledge. Work has been continued in the main tunnel from the station for a distance of 341 feet in a westerly direction. A crosscut now being run north to cut the parallel ledge, is in 89 feet, and is expected to cut the ledge in 200 feet more.

Ledges on the Sunset.

In the Sunset No. 2 work is being pushed which was opened some time since by a crosscut, has been found to fork northwest and southwest. The drift was continued westward for some time between the forks. A crosscut is now being driven to tap the northwest fork and yesterday in this crosscut bunches of in this crosscut bunches of ore were coming in. The crosscut which is being driven from No. 3 shaft to tap No. 2 ledge under No. 2 shaft has so far struck three small ledges. One of these is six feet in width and carries mixed ore. The other two are a foot and a half in width and carry solid high grade course over that goes 50 to the high grade copper ore that goes 50 to the It is thought from the meeting of these ledges that No. 2 ledges is not very far away.

Okanogan's New Superintendent.

Mr. R. H. Finley, the newly appointed superintendent of the Okanogan Free Gold Mines, limited, is in the city, and will leave today for the properties of the company, which are located on the Similkameen river, in the Okanogan section. Mr. Finley has had 20 years experience as mining and milling superintendent in Montan and Colorado, and was are a time superinstendent of the pern mine and mill. He sbears an excellent reputation, and the man agement of the Okanogan feels certain that he will be successful in the management of their property. He leaves for the Okanogan mines today.

Hall Mines in January.

The following are the results of the company's smelting operations during January, 1900. Copper smelting, 8 days, 11 hours: 1,903 tons of Silver King ore from the company's mine, and 7 tons of purchased or were smelted containing (approximately). Silver King ore, 30 tons copper, 17,405 conness, silver; purchased ore, etc., 9 tons copper, 5,770 ounces silver, 34 ounces gold. Lead smelting, 29 days, 1 hour: 741 tons of purchased lead ore were smelted, together with 128 tons of Silver King ore from the company's mine, from which were produced 164 tons of bullion, containing (approximately) from Silver King ore, 1,700 ounces silver; from purchased ore, etc., 159 tons lead, 25,820 ounces silver, 416, ounces gold.

THE SALMO CON'S.

MINES AND MINING share. This new company proposed to give the present shareholders in payment for the property out of the 100,000 shares in the new company 12 per cent. of the issue of the entire stock and \$5,000 in cash; in other words, they proposed to give the present shareholders \$65,000 out of a proposed capitalization of \$500,000 and very modestry agreed to accept the balance or \$435,000—a great scheme. This liberal English company consented to give the present shareholders 13 per cent. of their own (the shareholders) stock, and this new company to take 87 per cent. of the stock. This C. Dempster recommended and endorsed this scheme, and suggests to the chareholders that the continuous to the shareholders that the contumacy of myself prevented and blocked the scheme from going through. I will leave it to the judgment of our shareholders whether or not I acted for the best interests of the hareholders and myself, and let them judge as to any personal motive in this scheme. It is very transparent to even any ordinary mind. Respectfully yours,
V. P. WIESENTHAL

AN GRE COLLECTION.

Board of Trade Make a Good Move to Decorate Their New Offices.

Now that the Board of Trade has got omfortably housed in its new quarters over the post office, a movement has been started to maintain a good ore collection at this central point. The secretary of on exhibition at the board's rooms. Mr. Jackson said yesterday that he was arranging with local men to get a full display from Rossland mines and have the ore properly labelled and described, the intention being to get specimens from every mining section of the province, particularly to the camp will thus be able to inspect the various classes of ore and to obtain all necessary information at the board's office. The secretary might go a step further and put up a few of the best maps obtainable of the various mining division The office should become a natural center mining section of the province, particularly

AN ERA OF PROSPERITY.

the city on a business visit. He reports he ever visited. The country is fairly that business is fairly good in the several swarming with mining men from all over Boundary towns and mining camps. He the world, and the situation there reminds thinks that Proenix camp is destined to him of Rossland in its early days, although come to the front, and says that the Knob the conditions are very different. The ore Hill and Old Ironsides are erecting in-of the Rossland camp is of the smelting mense ore bins. He takes this to indicate type, while those of the Sumpter camp that they intend to take out extra ore on are free milling, the values being princian extensive scale. There will be consider-pally in gold. The productive zone is very able of an increase in the business of the large, and at present there are some 14 section early this year, or as soon as the mining companies operating there that are Canadian Pacific railway has completed now paying handsome dividends. There its branches to the several mines. Then are 150 stamps falling on ore in the disthe output of ore will commence in earnest, the number of men employed will be increased and the country will begin to enjoy an era of wonderful prosperity, for

ROCK FROM SUMPTER

Mr. Young Says It Is a Wonderful Rich Country

Boundary Country, It Is Anticipated, Will ing Standard, has returned from a two-ing Standard, has returned from a two-weeks' stay in Sumpter and adjoining Mr. A. C. Baldwin of Greenwood, is in is one of the liveliest mining camps that which the residents have long been tooking large. The cost of mining and milling forward to. gross value of the ore is \$15, some of the country is comparatively open and the mountains are not very steep, and as a

to open up the country.

A peculiarity of this section is that the the deeper the workings the higher grade

are largely interested there," said Mr. Young. "Among these are Colonel E. S. Young. "Among these are Coloner E. C. Topping, Hon. C. H. Mackintosh, Mr. Michael Shea, Mr. E. C. Finch and Mr. T. C. Gray and several other prominent

men of this d strict.
"There is considerable placer ground there that is yielding well. It is being operated by large hydraulic plants. 1 believe it is a better place for a poor man to prospector, as there is a large area that has not yet been prospected, and I looi: for a number of new finds in the spring

advertising that country. "While I was there I made several investments on behalf of friends, and I am It Saves the Life of Mr. so pleased with them that I have advised them to not sell, but to operate them, as they will yield good returns, I think, with a very small outlay."

The Arthur and the Evening.

The tunnel on the Arthur is in a distance of 45 feet. Friday a round of holes disclosed a five inch seam of galena holes disclosed a five inch seam of galena and copper ore of apparently a high grade. It is thought that this stringer will lead to the ledge, which is thought to be only about 25 feet away. The tunnel on the Evening is in about seven feet and is expected to tap the ledge in about 25 feet further. It will intersect the ledge at a depth of 150 feet.

North Star Branch runished.

The North Star branch of the Crow's Nest Pass railway, running from Cranbrook to Kimberley, has been completed, and arrangements have been made for large and regular shipments of ore from the North Star mine to the Omaha & Grant Smelting company.

BRITISH INVESTORS.

After the War They Will Invest in British Columbia Mines.

THE SALMO CON'S.

Editor Miner: Will you kindly, in the interest of the shareholders of the Salmo Con's, insert this information regarding a certain reflotation by an English syndicate of the Salmo Con's, properties referred to in a circular issued to the shareholders of the Salmo Con's properties referred to in a circular issued to the shareholders of the Salmo Con's properties was submitted to the Salmo Con's properties was submitted to the directors and shareholders of the Salmo Con's properties was submitted to the directors and shareholders of the Salmo Con's properties was submitted to the directors and shareholders of the Salmo Con's properties was submitted to have been made by an English company and was in writing. This new company proposed to incorporate a new company pro Mr. Hector McRae is in receipt of a let

On the White Bear a crosscut has been run to the north from the main crosscut to the east. A ledge containing about oine feet of mixed ore has been met.

Late advices from the Bunker Hill are and that it will be ready for operation early in March. There is plenty of ore in Seam of kica Ore Found n the Arthur—Ir. sight to keep the mill in operation as soon Young Gives His Opinion of the Summit as it is ready to reduce it.

Work on the Ethel Group.

On the 68-foot level of the Ethel the Mr. Neill Cochrane, manager of the Oro has been crosscut and drifted on for a dis-Denoro, which is being operated by the tance of 80 feet. The ore is mixed and King Mining company, is in the city. Mr. somewhat broken. A shaft of 150 feet in Cochrane reports that the development of neath surface disturbances.

The Salmo Consolidated

Editor Miner: In replying to many of 260 feet. It is expected that the ledge shareholders of the Salmo Consolidated will be met when the tunnel has been ex- Gold Mining and Development company, tended 50 feet further. In No. 2 tunnel asking for information regarding the man the ore body was crosscut for a distance agement and the condition of affairs of of 66 feet. No. 2 tunnel was driven a distance of 150 feet when it met the drift facts and information regarding the numfrom the shaft. The first 66 feet made on ber of shares sold, money received and No. 2 tunnel was in ore. The ore body absorbed. The management owes the was crosscut here and drifted on for 100 shareholders an accounting of all its affeet. As soon as the No. 3 tunnel strikes fairs, and a report, audited by a compe the ore shoot the intention is to have a tent and reliable auditor. The assertion spur constructed for the Canadian Pacific made by C. Dempster, regarding the litirailway here to the dump and to com- gation, crown grant and the discontinumence shipping ore at the rate of 50 tons ance of work, is the most absurd nonsense per day as the 66 feet is pay ore from as will be plainly seen, as the crown grant take it out. It will probably average \$20 years ago, and the amount of ground emto the ton from wall to wall. Mr. Coch-braced in our crown grant is about 200 rane feels satisfied when the ore body has acres. Over 100,000 of the treasury shares fore the issuance of such certificate of imbeen found on No. 3 level that there will have been sold since then. What has been be 80,000 tons of \$20 ore in sight and even done with the funds received for the then only a very small fraction of the ore shares? The management has not yet exin the mine will have been shown up. plained. Now, as regards the threat that the Salmo Consolidated property is in any danger of being sold by any bank creditor, I will only state that the shareholder have not authorized the board of director Mr. D. R. Young, of the Kootenay Min-board of directors, and, therefore, according to law, the property of the Salmo Consolidated is not liable for any illegal

action of the said board. V. P. WIESENTHAL.

THIS PREACHES GREAT FAITH.

CONSTANT FEELING OF LASSITUDE.

From Parrsbore, N.S., Leader.

There is scarcely a man, woman or child in the busy mining town of Springhill, N. S., who does not know Mr. Moses Y. Boss, the trusty agent of A. R. Fulton, dealer in carriages and farm implements. Two years ago the writer first met Mr. Boss, and was struck with the extreme pallor of his countenance. He seemed, in fact, like one in the deadly grip of consumption. Recently business again brought him to the home of the writer, but a remarkable change for the better had taken place in the interval. Upon enquiry it was learned that failing health first induced Mr. Boss to go upon the road as satesman in the hope that a change of scene would be beneficial. The result, however, did not meet with his expectations. The food he ate distressed him, and the weakness and feeling of lassitude became intensified. To use his own words, he was so weak and nervous, and used up, that he felt that he "could have dropped down and gone to sleep anywhere." Driving tired him and when at home the slightest labor about his farm was irksome. He was in this hopeless and discouraged condition when a friend recommended Dr. Willams' Pink Pills. He decided to try one box, and before they were gone he found some benefit from them. He ithen bought four boxes more, and each week found an improvement in his condition. His stomach ceased to trouble him, the feeling of lassitude troubled him no more, and his labors were no longer irksome. By the time he had finished his fifth box, his health was fully restored, and has since continued to be excellent, and he is not backward in telling his friends the sterling worth of Dr. Williams' Pink Pills.

At all dealers, or direct from the Dr. Williams' Medicine Brockville, Ont., at 50 cents a box or six boxes for \$2.50.
