SACEVILLE, N. B., JULY 27, 1871 THE INTERCOLONIAL. Section No. 4.

This Section, contracted for by Messrs, Smith & Pitblado, extends From a point to the south of Amherst nearly to the River Philip, a distance contiguously plaster, line, and coal. The total distance the Spring Hill that the new and thriving settlement, weakened, and yet we hear of the de-coal will, under this arrangement, have to be carried by rail to shipment that the new and thriving settlement, weakened, and yet we hear of the de-termination of the different legislanot but receive a powerful stimulus erly course from Amberst and ap- when the road is in working order. proaches the Maccan River till the Little Forks River (a branch of the will the road be ready for opening Macca:, 12 miles from Amierst), 1. reached, when it turns and follows an easterly course to Truro, Commencing at the northern end of the Section, the grading is completed to within a short distance of the Little Forks River, with the exception of a gap of some 60 yards to be completed in the embankment at Amherst Ridge. The upland at Amberst Ridge, ascending rapidly from the Nappan Marsh, and the latter Leing a complete morass, great difficulty has been experienced by the contract

for the embankment, the earth for some months being engulphed about as fast as it was shifted. 60,000

yards of earth have already been See Abner Smith's advt.-tf. placed in this work. The difficulties were however finally surmounted, and

in a few weeks this gap will be clos-# ed. At Little Forks there remains a small earth cutting to be completed.

for laying rails and ballasting. The masonry of Sec. 4. is in a still work of importance is the two stone abutments over the Nappan River. The pier on the south side was constructed last season. The formulation on the north side was commenced in May, and the abutment will be completed in a week or two. The abutments are 100 feet apart and 28x40.

vards of musonry and cost \$20,000.
