

# The Chrysler Six

## Owners Get Far More For Their Money

The trend throughout America to-day is toward the Chrysler Six, because the Chrysler Six is in line with the American trend toward genuine economy.

It satisfies the growing desire to make the dollar go farther—to make it buy more comfort and enjoyment.

The plain fact is, that the Chrysler Six affords all the roadability, speed, and ease of riding of big, cumbersome cars; and to these, adds its own inherent advantages.

It is far less costly to buy and to keep.

It gives twice the gasoline and oil mileage of many cars which it equals or surpasses in speed.

Its tires cost less and last longer.

It stands up without constant mechanical attention in a way that arouses the highest praise of men and women who are used to the costliest cars.

In its space engineering has provided generous room for five adult passengers, without unwieldy length and costly weight. So different and better is Chrysler handling and Chrysler performance, that, in the words of one wealthy owner, "it discourages one from driving anything else."

There is a vast difference between the pleasure of driving an ordinary motor car, and the genuine delight with which its owners drive the Chrysler Six.

That difference—that far superior performance—originates in the fact that the Chrysler Six is an entirely new type of car, built on a new type of engineering, which produces results radically different from any heretofore registered.

Chrysler owners no longer are amazed that they can now enjoy the greater convenience and utility of two automobiles—because they have proved that they can own and operate two Chrysler Six cars for approximately the cost of owning and operating one heavy, cumbersome car.

If you are not personally familiar with Chrysler Six performance, you will find us eager to have you put a Chrysler Six through its paces.
