London Medical Hall. LYMAN MOORE & CO. Agents for Moffat's Vegetable Life Medicines.

MOFFAT'S VEGETABLE LIFE-MEDICINE. These medicines are indebted for their name to their manifest and sensible action in purifying the springs and channels of life, and ending them with renewed tone and vigor. In many hundred certified cases which have been made public, and in almost every species of disease to which the human frame is liable, the happy effects of Moffat's pills and phenix bitters have been gratefully acknowledged by the persons benefited, and who were previously unacquainted with the beautifully philosophical principles upon which they are compounded, and upon which they themselves in diseases of every form and description. Their first operation is to loosen from the coats of the stomach and bowels, the various impurities and crudities constantly settling around them; and to remove the hardened feces which collect in the convolutions of the smallest intestines. Other medicines only partially cleanse these, and leave such collected masses behind as to produce habitual costiveness, with all its train of evils, or sudden crises, with its imminent dangers. This fact is well known to all regular anatomists, who examine the human bowels after death; and hence the prejudice of those well informed men against quick medicines—or medicines prepared and heralded to the public by ignorant persons. The second effect of the Life Medicines is to cleanse the kidneys and the bladder, and by this means, the liver and the lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and the lungs before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach, courses freely through the veins, removing every part of the system, and triumphantly maintains the banner of health in the blooming cheek.

Moffat's vegetable-life medicines have been thoroughly tested, and pronounced a sovereign remedy for dyspepsia, flatulency, palpitation of the heart, loss of appetite, heartburn and headache, restlessness, intolerance, anxiety, languor and melancholy, costiveness, diarrhoea, cholera, eructs of all kinds, rheumatism, gout, dropsies of all kinds, gravel, worms, asthma and consumption, scurvy, alcers, inveterate sores, scorbatic eruptions and bad complexion, eruptive complaints, scalding, cloudy, and other disagreeable humors, pleurisy, salt rheum, erysipelas, common colds and influenza, and various other complaints, which afflict the human frame. In fever and ague, particularly the life-medicines have been most eminently successful; so much so that in the fever and ague districts, physicians almost universally prescribe All that Mr. Moffat requires of his patients is to be particular in taking the life-medicines, strictly according to the directions. That he himself may say in their favour, that he hopes to gain credit. It is alone by the result of a fair trial.

MOFFAT'S MEDICAL MANUAL; designed as a domestic guide to health.—This little pamphlet, edited by W. B. Moffat, 575 Broadway, New York, has been published for the purpose of explaining more fully Mr. Moffat's theory of diseases, and will be found highly interesting to persons seeking health. It treats upon prevalent diseases, and the causes thereof. Price 25 cents—for sale by Mr. Moffat's Agents generally.
