Campbellton, N. B., Nov. 9th, 1922.

We have noticed lately that some back yards in town are not being kept nearly as clean as they should be. Several piles of rubbish about town are making their presence known in a rather offensive way. Probably this is due merely to oversight on the part of the occupants of the premises we refer to. If so, they should lose no time in arranging for their removal for they are not only breaking the law but also endangering their own health as well as that of their neighbors.

Another offence which we wish to mention and strongly condemn is the existence of certain disgusting conditions in a local pool-room. Many former patrons have ceased to frequent the place in this account and although the proprietor does not seem to realize it, he is undoubtedly losing trade through his negligence. Yet, so far as we know, he has made no move to restore sanitary conditions. A broad hint from the health officers might furnish the necessary inspiration. We would suggest that, unless he shows some ambition in the near future to eradicate what he knows to be obnoxious conditions, the health authorities take some decisive action for there is absolutely no excuse for the existence of such unsanitary and unsalubrious conditions in any public building.

The Porepore fire in 1911 and what is known as the Claybelt disaster of 1916, were both due to land clearing fires started by settlers for the purpose of burning up the wooded debris of their farm lands, says, in part, a note issued by the Canadian Forestry Association, in which it is pointed out that "everyone recognizes the necessity of using fire for this purpose, but the operation is rendered highly dangerous unless closely supervised by government officers." No such burning should be allowed except where wind and heat conditions make it reasonably safe. The general public sentiment in Northern Ontario has always been in favor of a rapid burning off of the country, so as to clear land for farming and mining purposes. This, of course, cannot be accomplished except at the cost of human life, and the destruction of millions of dollars of real property—Canadian Lumberman.

WINTER FEED FOR THE DAIRY COW

(Experimental Farms Note).

How to keep up the winter milk flow is a problem confronting a great many dairymen, more so in sections where the temperature is severer than in the milder climate of British Columbia. Invariably the price of milk goes up in the fall and down in the spring and just as untrifling the supply drops in the fall and increases in the spring. The dairyman given good cows, the proper proportion bred to freshen in the fall, and conditions suitable for good general management in the matter of sanitation and thorough and regular milking, it is then up to the feeder to keep the milk supply up to the maximum.

The dairy cow is a manufacturing machine and requires suitable raw material from which to manufacture milk. She can make excellent use of much rough feed if supplied in conjunction with concentrates in the proper amounts. Among the most popular or widely used winter roughages are hay, straw, ensilage and roots and for dairy cows legume hays are much more valuable than grass hays. For milk production good alfalfa hay has no equal but, if this is unavailable, good clover or mixed hay is satisfactory. Damaged hay can be made more palatable by cutting and mixing with silage or pulped roots. The same holds true regarding straw. To provide the necessary succulence in a ration for dairy cows roots or silage, or both, are invaluable. Not only are these feeds succulent but they are bulky and comparatively cheap. Generally it is good business to give a extra five or ten cents per dozen and get guaranteed quality and more satisfaction.

Canada's Standard Remedy for Pain

Mrs. A. W. Ault Says She Still Feels Just Fine

That Tanlac is the ideal strength and body builder for elderly people has been conclusively proved by the statements of thousands who have tested its remarkable powers. Further evidence of this fact is furnished by the experience of Mrs. E. A. Ault, 14 Harris St., Halifax, N. S., who had reached her three score and ten.

Mrs. Ault recently said: "I would not expect to feel better than I do since taking Tanlac. Before I took this medicine I had been trying for years to get rid of stomach trouble. What little food I would eat seemed to stay right in the pit of my stomach. I would have a dull ache in my stomach all during the day and it would not let me sleep at night. I got up mornings tired and nervous and often had severe headaches. Why, at times I was so nervous I could not hold a pen in my hand."

"Soon after I started on Tanlac I had a good appetite, my stomach stopped troubling me and I began to sleep better and gain strength. It wasn't long until Tanlac built me up to good health and while I have not taken any in some time, I am still feeling fine."

Tanlac is sold by all good druggists.

This does not hold true regarding concentrates. A popular practice is to feed the cows one pound of grain for every 3 to 4 pounds of milk they produce. This is a good general rule to follow. What the grain mixture should be will depend upon prices of the different feeds at that time, bran, oats, barley, oil meal, shorts, soybean meal, brewers grains and cotton seed meal are the common used concentrates. Bran 4 parts; ground oats 2 parts; ground barley 2 parts; oil cake meal 1 part; makes an excellent grain mixture for a commercial dairy herd. It should be kept in mind that a freshly calved cow abundantly and carefully fed will usually produce the cheapest milk. At this time a pound of grain is equivalent to several pounds given later after the cow has decreased in milk flow.

Besides the roughage and concentrates, heavy producing cows should have plenty of clean water and salt, and many successful feeders at the present time provide bone meal, lime, charcoal and other minerals.

W. H. HICKS, Superintendent, Experimental Farm, Agassiz, B. C.

EGGS.

Questions and Answers.

1. What causes rot in eggs?

Fertile eggs contain a germ which begins to develop at room temperature, and dies shortly afterwards because the heat required is not sufficient to hatch the dead germ, therefore decays and in a short while the egg is N.G.

Non-fertile eggs on the other hand will keep longer at the same temperature as fertile eggs because of the absence of a germ.

2. Are fresh eggs worth more than storage eggs?

Most certainly they are and for many reasons.

1st—They are not flavored like stored eggs.

2nd—They weigh from 2 to 5 ounces more per doz.

3rd—If they are strictly fresh they are all good—How about storage?

4. How can you tell fresh eggs from storage eggs?

Only by candling them. This operation is very simple. Free equipment and instructions will be forwarded on application to the Agricultural Office, Box 412, Bathurst, N. B.

5. Why do customers base themselves on the market price of storage eggs when they are offered fresh eggs?

This is a complicated question which cannot be fully answered. However, here are some reasons. Some people have been fooled once before by unscrupulous persons who guaranteed stored eggs as fresh. These people should get a candling case at the Agricultural Office. It is free of cost will tell you the truth and cannot be fooled.

Others think fresh eggs are not worth any more than the price of storage eggs, on the market. These people are certainly not fussy about food.

Others want to buy the cheapest because they cannot afford to pay more. These should consider that perhaps they are only getting cheap stuff for less money and it would pay them better in the long run to give an extra five or ten cents per dozen and get guaranteed quality and more satisfaction.

Their example was followed by the pros in the east, but the climax was capped yesterday when the United States Intercollegiate Hockey Association got to work. The organization is composed of eight big eastern colleges, namely, Harvard, Yale, Princeton, Cornell, Columbia, Pennsylvania, Dartmouth and Hamilton.

The Canadian pros, The Globe continues, thought they did a smart thing when they made the game about half increase by establishing a no offside

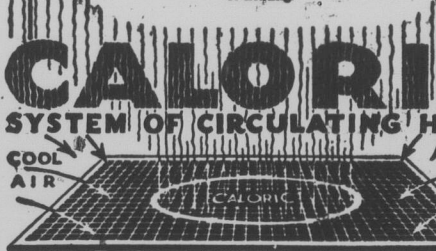

This scientific HEATING PLANT circulates warm air through the house and takes the cool air out

Caloric circulating heat is the modern idea in heating. It gives to the air in your rooms the freshness and balminess of out-door air in summer. Provides an even and uniform temperature throughout the house.

Caloric circulating heat is simple as sunshine and almost as convenient. Takes the cool air out, as it circulates warm air through the house.

No pipes, no plumbing, no radiators—only one register. Costs less than stoves required to heat the same space. Reduces fuel consumption 1/4 to 1/2. Pays for itself. You will never be satisfied with old methods of heating after you once know the advantages of Caloric circulating heat.

Guaranteed satisfaction or money back. Let us show you this scientific and economical system of heating.

Sporting News Of The Week

BOWLING.

On Friday evening last the local five team bowling league began its new series, when the Independents and C. N. R. met in an interesting match. Thos. Wran led the former team with an average on three games of 95 2-3, while Percy Shannon headed the C. N. R. rollers with an average of 89 2-3. The Independents captured the whole four points winning the three game with a margin of 91 pins.

	Independents.	Tot. Av.
T. Wran	90 100 100 290 96 2-3	
R. K. Shives	88 82 96 266 88 2-3

Reg. Henry	72 81 75 228 76
Total Pinfall	1256

MONDAY'S MATCH

On Monday night the second match of the new series was played, the Bankers and Singles being the contesting teams. The outcome was a 2-2 split.

McNichol led the Bankers with an average of 94, while Horace Jardine led the Singles with an average of 90. Following is the score:

	Singles.	Tot. Av.
A. Alexander	85 85 83 253 84 1-3	
U. H. Steeves	102 90 75 267 89	
P. McLean	91 85 76 253 84 1-3	
H. Jardine	94 84 92 270 90	
J. Goodman	91 69 97 257 85 2-3	
Total Pinfall	1300	

	Bankers.	Tot. Av.
Ray, Henry	77 90 92 259 86 1-3	
J. McNichol	99 98 85 282 94	
A. Dion	87 82 91 260 86 2-3	
G. McBeath	85 72 81 238 79 1-3	
Total Pinfall	1278	

HOCKEY

Toronto, Nov. 7.—Hockey leagues everywhere appear to be obsessed with the idea that they are not doing their duty to themselves and to the game unless they do some tinkering to the rules of play, says the Toronto Globe.

The pioneers are the Pacific Coast Leaguers, who have "monkeyed" with the playing code until they have all their example was followed by the pros in the east, but the climax was capped yesterday when the United States Intercollegiate Hockey Association got to work. The organization is composed of eight big eastern colleges, namely, Harvard, Yale, Princeton, Cornell, Columbia, Pennsylvania, Dartmouth and Hamilton.

The Canadian pros, The Globe continues, thought they did a smart thing when they made the game about half increase by establishing a no offside

area in the middle of the rink. The silly and intricate system of penalties was an after-thought, but finally the coast leaguers went the length of permitting the puck to be kicked around, thus introducing a little soccer. Yesterday the United States colleges gave the poor old game another twist and evolved a no offside area rule which applies only within 20 yards in front of each goal. That is, of course, just diametrically opposed to the pro rule. Among the other changes affected yesterday by the United States colleges are to allow teams to make unlimited substitutions, to skate a player on-side and to lengthen the intermissions from five to ten minutes. But the no offside rule takes the belt, cups and medals.

Georges Vezina, veteran goal-tender of the Canadian team, Montreal member of the National Hockey League should be his old self again this season, following an operation which he claims has fixed him up for a strenuous year.

"Neddy" Healey, former amateur boxer has passed the money game when he joined the pro boxing realm. Under good coaches he should make good.

Joe Stecher, of Nebraska, former world's heavyweight, wrestling champion in New York's last Wednesday night defeated Charley Cutler, of Montreal, former American title-holder by obtaining two straight falls. Stecher obtained the first fall with a three-quarter Nelson and body scissors after 57 minutes and 30 seconds of grappling. The second and deciding fall came after but 13 minutes.

Dalhousie College will not be as strong as they were last year when U. N. B. was easily disposed of in the big game at Truro. Truro seems to be the most logical place for the play-off. Although Amherst is making a bid and U. N. B. favors the local M. A. A. grounds.

A. J. McAdam, former Antigonish and Halifax Crescents athlete, who has been in New York for nearly a year, is making good as a sprinter. In fifteen events this season, MacAdam won 14 and was second in the other.

The Maritime Indoor Championships will be held in the Halifax Arena Rink on November 13th, commencing at 8 o'clock in the evening. This meet will be held under the auspices of the Crescents A. A. A.

Halifax Herald.—Halifax sports are out gunning for a boxing manager named McNulty whose address is St. John. McNulty had better keep out of Nova Scotia, as there are also a few gentlemen down in Glace Bay who are after his scalp.

Jack Dempsey is contemplating another visit to Europe. The world's champion leaves in January and may arrange to meet Sikl over the pond.

The Garrison sports club of St. John has organized a bowling league, their alleys which were opened last night have been renovated.

Direct Importation of LINENS FROM BELFAST, IRELAND

This is the first time since the War that we have been able to secure PURE LINENS at practically pre-war Prices.

We were fortunate in securing control of John Brown & Sons "SHAMROCK" Linens and expect daily a big shipment of Table Cloths, Napkins, Centres, Side Board Covers, etc.

Childrens Silk Dresses

We purchased a Travellers line of Childrens Silk Dresses sizes 6 to 10 yrs. which we are putting on Sale at wholesale prices.
