

HALIFAX MEDICAL COLLEGE,

HALIFAX, Nova Scotia.

FORTIETH SESSION, 1908-1909

The Fortieth Session opens on Tuesday, September 1st, 1908, and continues for the eight months following.

The College building is admirably suited for the purpose of medical teaching, and is in close proximity to the Victoria General Hospital, the City Alms House and Dalhousie College.

The recent enlargement and improvements at the Victoria General Hospital have increased the clinical facilities, which are now unsurpassed. Every student has ample opportunities for practical work.

The course has been carefully graded, so that the student's time is not wasted.

For further information and annual announcement, apply to—

L. M. SILVER, M. D.,

Registrar Halifax Medical College,

65 Morris St., Halifax.

A STERILE EYE BATH.

An eye bath fashioned from a single piece of aluminum has been introduced by the Kress & Owen Company.* That this little device will be well received by the medical profession is not to be questioned when one considers the many points of advantage this metal cup has over the old style glass contrivance. It is cleanly, unbreakable and can be sterilized instantly by dropping into boiling water. The surgical bag in the future will hardly be complete without one of these cups which will give happy results in many an emer-

gency. It will be found invaluable for treating ophthalmia, conjunctivitis, eye strain, ulceration and all inflammatory conditions affecting the eye.

Directions:—Drop into the eye bath ten to thirty drops of Glyco-Thymoline; fill with warm water. Holding the head forward, place the filled eye bath over the eye, then open and close the eye frequently in the Glyco-Thymoline solution. It is soothing, non-irritating and reduces the inflammation.

*One of these eye baths will be sent free upon request.

Treatment of Rheumatism*

Iron Treatment.—*** "Form which I have found most useful is the soft Bland. Mass, with Arsenic, made by Duncan, Flockhart & Co."—J. T. Fotheringham, M.D., Toronto.

* Contribution to "Symposium on Rheumatism," read before Toronto Clinical Society.

Capsule No. 104.

Formula

Bland Mass - - 5 gr.
Arsenical Solution, 2 minims
(= Arsenious Acid 1/50 gr.)

Capsule No. 105.

Formula

Bland Mass - - 10 gr.
Arsenical Solution, 2 minims
(= Arsenious Acid 1/50 gr.)

"Chemical examination shows Iron is in the ferrous condition, and, therefore, that Capsules retain full efficacy."—*British Medical Journal*.

May be ordered through all Retail Druggists.

Samples sent physicians on application.

Full list of D. F. & Co. Capsules will be sent on request.
