Water Pollution Control

Company/Product

EBA Environmental Ltd. was established as a wholly owned subsidiary of EBA Engineering Consultants Ltd. in response to the company's growing environmental engineering, waste management, and contaminant remediation practice. EBA, which operates from nine offices in B.C., Alberta, the Yukon Territory, the Northwest Territories, and Alaska, has been in business for 25 years. EBA has conducted environmental audits and site assessments and has implemented remediation programs for contaminated sites.

The company philosophy is to provide high quality service and to bring a high standard of technical expertise to each project. This is achieved through the diversified academic backgrounds and practical experience of the professional and technical staff, as well as extensive laboratory, computer, graphics, and word processing facilities.

EBA's record of high-quality service on conventional projects is complimented by its experience on 'first-time' projects where innovation and advanced technology are required to solve complex problems.

Current Geographic Marketing Activities

EBA is presently engaged in projects in Western Canada, the Canadian Arctic, Alaska, Russia, and Senegal. The company now serves clients in the following market sectors:

Oil and gas (from exploration to retail)
Industrial
Mining
Waste management
Forestry
Federal and provincial governments

Contact Sought

EBA would like to develop contacts with individuals in senior posts in the public or private sector who have or may have a requirement for services in any of the above fields.
