

DROPSY.

The Sarsaparillian and the Pills, in large doses, should be taken by dropsical persons. They will not only reduce the swelling, but remove the cause of the swelling, which is the disease of the Liver, Kidney, or Heart, as the case may be. In this disease the Resolvent shows its great power over the absorbent system. Dropsical swelling frequently results from cases of Fevers, Measles, Consumption and Scrofula.

OVARIAN TUMORS.

CASSVILLE, BARTOW CO., GA.

DR. RADWAY:—I have had a tumor in the womb, which grew to my back; it was caused from inflammation; my kidneys were also affected, in which condition I suffered for nine years. The greater part of the time I was helpless, had to be helped on the bed and helped off; could not walk without a crutch. I tried every thing I could get, but all to no benefit; till at last I got some of your medicines, and have taken twelve bottles of Resolvent, with the Relief and Pills, according to your directions, about one year ago. I am now about well; can walk straight and go anywhere I want to; whereas before I could not get off the bed without help. You have my sincere thanks for your medicines. I shall use no other medicines but yours. There is hardly a day that passes over my head but what I think of the wonderful cure that your medicines have done for me. I write this, for you to see what your medicines are doing, and for the benefit of others that are suffering. You can publish this if you choose.

Respectfully yours,

MRS. P. D. HENDRIX.

HILLSBORO', OHIO.

MESSRS. RADWAY & Co.—*Gentlemen*: As it no doubt affords you satisfaction to know of the success of your medicines, we write you an account of a cure of Ovarian Tumor by your Resolvent which is exciting great interest in this community.

About eight years ago, the wife of one of the best known citizens of our county, and former member of our State Legislature, began to swell in the pelvic regions, and the physicians here could give her no satisfactory information in regard to the trouble. She went to her old family physician in Massachusetts, who told her, to her horror, the real condition. She consulted physicians in Boston, who advised an operation to which she refused to submit. They were candid enough to tell her that they suspected adhesions of the sac of the tumor, which would make an operation very complicated and severe, and of course extremely hazardous.

The tumor had been steadily growing until last March when her appearance was most miserable; her abdomen protruded far out and her general health was severely affected. A lady friend advised the use of the Resolvent. She began last March to take your Resolvent, Relief and Pills according to directions, but without apparent benefit until about a month since, when suddenly she began to discharge enormous quantities of fluid from her bladder, having, at the same time, copious and repeated liquid discharges from her bowels. In one day the circumference of her body diminished to the extent of nine inches, and within one week she was reduced to her natural size; she rapidly recovered her health, and two weeks later went several times to the woods, nutting, etc., and ran around like a school girl. Her recovery seems fully established, and she is now a neat, graceful looking woman, able to wear the latest fashion of dresses, and enjoying life with a relish that those only enjoy who have been at death's door for months. Her age is about 45, a very intelligent, educated lady.

Yours very respectfully, SEYBERT & Co., Druggists.
