FOR SALE.

2520 Acres Phosphate Lands

IN TOWNSHIP OF TEMPLETON,
COUNTY OF OTTAWA.The undersigned offers for sale 2,280 ACRES OF
PHOSPHATE LANDS; also, MINING RIGHTS ON
240 acres of Land—known as the Perkins' Estate—all
in the Township of Templeton, at a distance of 8 to 10
miles from River Ottawa, and in immediate vicinity of
Phosphate Properties, now being successfully worked,
600 acres of which adjoin the 1,680 acres sold lately by
McLennan & Blackburn, for \$15,000. A portion of the
property has been worked and partially explored, and
a great many Phosphate openings made. Capitalists
desirous of securing a good investment will find this a
rare chance, it being the only Phosphate Property of
any extent, for sale in the Township of Templeton. All
information given, and property shown, on application to

PERKINS & PERKINS,

60 St. James street, Montreal.

TO THE

"MAGASIN ROUGE,"

581 ST. CATHERINE STREET,

MONTREAL.

The "MAGASIN ROUGE" has obtained the
greatest popularity that ever a Business House, the
Dominion had.The "MAGASIN ROUGE" not being sufficiently
spacious to accommodate the crowds which fre-
quent it, the adjoining house has of necessity been
added on. In these two houses, one of which is
devoted to ladies and the other to gentlemen, the
customers of this popular establishment will be
always sure to find goods which please them, and
at prices suitable to the times.The politeness and urbanity of the employees
of the "MAGASIN ROUGE," the enterprising
spirit of the proprietors, and the immense assort-
ment of Tweeds, Cloths, Stuffs and Dresses which
they are about to receive, and which are offered at
reduced prices, assure to this young establishment
the greatest possible success.

"AT THE MAGASIN ROUGE,"

No. 581 ST. CATHERINE STREET.

MONTREAL.

L. J. PELLETIER & CO.

PHOSPHATE OF LIME!

NEWELL'S PATENT UNIVERSAL GRINDER

The public is presented with a new mill which is
designated as above. It can be adapted to a great
variety of purposes than any mill heretofore invented.The following are a few results, substantiated by
experiments, which illustrate its remarkable utility:I. Its General Capacity. This Grinder gives
perfect satisfaction in the pulverization of Quartz,
PHOSPHATES, Zinc, Bone, Brimstone, Chemicals,
Oyster-Shell, Horn, South Carolina Clay, Chalk,
Cement, Cork, Corns and other Cereals, Colic,
Spices, Leaf Sugar, Mustard and Flax Seed. Also
in the Grinding of planing shavings, for packing
purposes and horse bedding, the pulverization of
Roots, Dye Woods, Tobacco, Rubber, Rope, Old
Cloth, and the reduction of Wood to fibre suitable for
use in the manufacture of Paper.II. Its Special Adaptations. For grinding Flax
Seed it has no rival. A great saving of time and labor
is secured by grinding instead of crushing this article.
Mustard Seed is also effectively ground to powder.III. Superior Quality of the Product. The
superior quality of the products of this mill is
observed in the grinding of Corn and other kinds of
Grain. The process does not heat the Flour or
Meal, even if grinding at the rate of 200 bushels
of Corn per hour. All danger of fermentation is thus
avoided. Every kind of grain is perfectly pulverized
without taking from the mill any particle of grit.IV. The Saving of Power and of Time. A
great saving of power and of time in the accomplish-
ment of any one of the uses above mentioned are
among the points in which the mill must inevitably
hold the highest place in the esteem of all who wit-
ness its capacity. The following few facts explain
what is now said. Quartz is ground to remarkable
fineness at the rate of ten tons per day. So also the
HARDEST OF THE PHOSPHATES. Corn can be
ground for meal, using only one-tenth of the power,
as rapidly as by *ten run of stone*; so that the con-
clusion is clear, that the mill costs less and will do
more, than any other mill yet invented.V. Available Everywhere. Its usefulness to
Farmers, and keepers of large stables is a fact
noticed. It is so cheap and so easily portable that it
can be brought into general use in Villages and
on large Farms. It can be run with one-horse
power, grinding twenty-five bushels of Corn for
Horse-Feed per hour, and with four-horse power it
will grind up to 200 bushels per hour. The grinding
discs can be easily and cheaply replaced should they
become worn. The weight of these machines varies
from 200 to 800 pounds. They are very compact,
requiring only a space three or four feet square, ex-
clusive of apparatus for bolting. The frames are
made either of wood or of iron. The price of these
machines ranges from \$300 to \$400, subject to a
25c. to 50c. royalty for the use of them; the tariff
whereof being regulated by the specific purpose to
which the mills are applied.A cordial invitation is extended to Phosphate Com-
panies and owners of Phosphate lands, to all Millers,
Quartz Crushers, Chemical Manufacturers, Farmers,
and others who have any interest in such improve-
ments, to call and see the machine and the samples of
the materials ground at W. D. McLENNAN'S, Union
Mills, 55 College street, Montreal. Montreal, June,
1878.
