EIDERDOWN QUILTS

Exquisite French Quilts, Navy and Satin-Covered Quilts and Pillows.

JOHN CATTO & SON

King Street—opposite the Post-Office.

TO APPLY FOR INCORPORATION.

Gaelic Society Will Also Encourage Collection of Statistics.

At the monthly meeting of the Gaelic Society last night in Richmond Hall it was decided to apply for incorporation. The society in future will encourage the collection of statistics of the Gaelic settlements in the early days of Canada and follow-up and encourage the collection of statistics in this work. This is done to encourage the work of the society in the smaller towns.

Chief William Houston, M. A. read a letter received from Flora MacDonald in his native town of Barra, Scotland, in which she stated that she was now residing on the bagpipes and violin by J. A. Allen and Donald Carmichael. The society was presented with eight handsome bound volumes on Gaelic subjects by Alex. Fraser.

CAUGHT SHOPLIFTING.

Wife of Wealthy Farmer Near Belleville Admits Guilt.

Belleville, Dec. 22.—A painful case came to light in this city on Saturday afternoon last, when a lady, well dressed and refined, was caught in a front-store in the act of stealing articles in her pocket and inside her waist. She had on a long cape, under cover of which the pilfering was being committed. The manager of the store saw her, and she was taken with the theft, admitting the crime and promising to pay for the goods. It turned out that the woman's husband is one of the wealthiest farmers in this section of the country, the woman being evidently a kleptomaniac.

Gave a Silver Service.

A number of the friends of Mrs. Minnett of 231 Brunswick avenue met at her home last night and presented her with a silver service on behalf of the guests of Cleveland House, Lake Rosseau, Muskoka as a reward of her kindness to them last summer. The committee that made the presentation consisted of M. C. Milford, Accompanying the service was a handsome bouquet of flowers, which were presented to her by the committee.

Count Fellows' Wish.

Rome, Dec. 22.—Count Fellows of the Italian Club, who arrived in New York last night, is now trying to obtain the permission of his marriage to Countess Foch so that he may marry Donna Elvira.

Last New York Operation.

New York, Dec. 22.—Dr. Lorenz has performed his last public operation in the vicinity for congenital dislocation of the hip. Alvin Louis Black, 6 years old, was the patient. He is the boy who sent a letter to Lotta Armour, daughter of J. Ogden Armour of Chicago, to operate on whom Dr. Lorenz came to this country.

IT LAYS A STELLING HAND ON PAIN.

For pains in the joints and limbs and for rheumatic pains, neuritis and lumbago, Dr. Thomas' Electric Oil is without a peer. It is well rubbed in the skin absorbs it and it quickly and permanently relieves the affected part. Its value lies in the magic property of removing pain from the body, and for that good quality it is unequalled.

Rescued Seventeen Mariners.

New York, Dec. 22.—The Duke of Sale Prince, which arrived to-day from Naples and other Italian ports, brought 17 shipwrecked mariners from the Norwegian barque Bayard.

Father O'Reilly Dead.

Utica, N.Y., Dec. 22.—Father Luke G. O'Reilly, of the St. Francis de Sales Church in this city, died this afternoon of pneumonia. He was in his 58th year, and was born in Ireland.

Lever's V-Z (Wise Head) Disinfectant Soap

Power is a boon to any home. It disinfects and cleans at the same time.

Duke of Newcastle in New York.

New York, Dec. 22.—The Duke of Newcastle has arrived here. He expects to remain for several months and may go to the Pacific Coast.

POOR WELL LOOKED AFTER

Churches and Benevolent Societies Have Great Supplies for Christmas Dinner.

BEER, TURKEYS AND PLUM PUDDINGS

St. George's Society Will Fill Needs of Englishmen With Beef-Salvation Army's Plan.

Today and to-morrow will be busy days around the charitable institutions, as great preparations are being carried on to help make Christmas Day an enjoyable one for the poor.

Over 3000 families will be given their Christmas dinner by one or other of these societies, and all day yesterday the secretaries of the St. George's Society, the Irish Protestant Benevolent Association, the Rev. Victor Mission, the House of Industry, and the Salvation Army, as well as the many church societies, were kept busy getting things in readiness for distribution.

The St. George Society will make their distribution on Wednesday morning, commencing at 10 o'clock. The society have purchased 7000 pounds of beef to be cut into roasts of various sizes, according to the size of the family they go to. Besides this they will give out 1500 loaves of bread and hundreds of pounds of tea, sugar and other groceries. On Wednesday during the distribution a free concert will be given in the big hall, in which several well-known singers will take part.

The Salvation Army have arranged to supply dinners to 1200 families, and for the past week they have had members out getting a list of needy persons. The plan adopted by the Army is a good one. They will make out the dinners in baskets and deliver them. These baskets will contain either fowl or beef, as well as tea, sugar, bread and other groceries. Then on New Year's Day the Army will give a dinner to 500 children.

The Irish Protestant Benevolent Society commence their distribution this morning, when the wants of 300 or 400 will be supplied. This society gives each one applying an order on some grocer, butcher or coal dealer, so that they can get what they are most in need of.

The House of Industry will give the inmates their annual Christmas dinner at noon on Thursday.

The Rev. Victor Mission will give a dinner to the poor of their mission on Dec. 30, and they will prepare to feed 400. On Jan. 2 they will give a dinner for children only.

The hospitals have arranged to give concerts for their patients on Christmas Eve.

What frayed your linen?

Not Sunlight Soap—No, indeed!

SUNLIGHT

REDUCES EXPENSE

Ask for the Octagon Mark

mas Eve. In former years these have been well worth attending.

The Industrial School at Mimico and the Alexandria School for girls at East Toronto are soliciting presents for their wards, and the public, as in former years, have been generous in their donations. Any one wishing to send presents to these institutions can do so by addressing them to Mr. Massey, 60 West Richmond-street.

St. Vincent de Paul and the Ladies' Society of the Roman Catholic Church will minister to the wants of the poor in that denomination to-day and to-morrow. These societies give out clothes, as well as groceries and meats.

ENGINEER DEAD IN HIS CAB.

Something Struck Him While Passing Another Train.

Lynchburg, Va., Dec. 22.—Readers anxious by the prolonged delay on the other side of the cab the fireman of freight train No. 85, on the Norfolk and Western Railroad, near the High Bridge this morning, climbed down to make an investigation and he found the engineer, John Parrish, lying dead on his seat with a mangled hole in the centre of his forehead. What caused Parrish's death is unknown. The freight had just passed a passenger train, and the engineer had just blown a whistle for a crossing when a passenger car while others think that a stone hurled from the cab window may have caused the death.

Plasterers' Smoking Concert.

The smoking concert given in St. George's Hall last night by the Plasterers' Union was largely attended, and the good program provided was thoroughly enjoyed.

It consisted of vocal and instrumental selections, as well as a couple of good boxing bouts between McGrath and Porter and El Gibson and partner. Among those that contributed to the evening's entertainment were Bert Harvey, W. White, F. Duffie, W. H. H. Parks, G. Beakes, Harry Elton, T. Boston, A. Glickman, J. Hamilton, J. Conroy, L. J. Conroy, W. Hamilton, F. Fowler, F. Hodgins, D. Smith, B. Kendall and George McMillan.

HOW WIRELESS WORKS.

Electric Spark Causes Series of Waves to Spread.

When a wireless message is sent across the ocean an electric spark is made to snap between two brass balls. The sparks may be said to make a splash in the ether, the high wire taking the place of the stone, which, when dropped, sends a series of ripples to flow outward in every direction. The electrical ripples similarly stream out from the wire in every direction at the speed of light, which is 185,000 miles a second.

The number of waves which stream from a Marconi pole is from 500,000 to 2,000,000 per second. These waves are not to be confused with the air waves, which cause sound, the for the purposes of explanation they may be compared to them. When a pole is struck the vibrations of the steel rod transfer themselves to the surrounding air in the form of waves in the atmosphere.

Wireless telegraphy waves travel not by means of the atmosphere, but through the far more intangible substance, ether, which is said to fill up space and penetrate all matter. Even in ordinary telegraphy the current does not flow through the wire, but through the ether surrounding the wire.

Many years ago it was found out that the ether is a medium through which flow two long parallel wires. When a current of electricity was made to flow through one wire a magnetic influence spread out from the wire, and on reaching the other wire it induced in it a state of electricity which to the current flowing in the first wire.

The current was transferred, as it were, across a bridge of magnetism.

The waves which fly from the transmitting station almost instantaneously reach the distant receiving wire. The waves are then feeble and could not operate an instrument, so that a "coherer" and "relay" have to be used.

The coherer consists of metal filings, which remain separate from one another, until a resistance to a current nullifies the magnetic force of the ether. Then the filings press together, and the obstruction is bridged. The current can then act, and a strong current instantly flows through the coherer and operates the relay, which prints the code on paper tape.

It has been said that two stations might be placed back to back, and the waves made to pass completely around the world. This would require waves of very great length in order to overcome the great curvature of the earth.

The induction method was the one used by all the earlier experimenters with wireless telegraphy, and was not successful. Published his experiments with the waves caused by the spark-gap method, that the waves of the ether were more powerful than those of the induction method.

When these waves under Prof. Hertz, himself an expert in them.

Mr. Marconi's progress has been from the first to the present, and he has spanned the Atlantic a distance of 2500 miles.

Smallpox Sign Did It.

Pittsburg, Dec. 22.—One of the most remarkable cases of attempts to beat a landlord was brought to light today in an action by Solomon William F. McCallant. Three months ago McCallant rented a house owned by Harkness, agreeing to pay him \$40 per month. When McCallant moved in Harkness demanded the rent in advance, and he refused to pay it. He then told him to get out of the house, and he refused to do so. Finally, Harkness went again for his money, but was astounded to find a smallpox notice tacked upon the door of the house. From that time until this week the smallpox sign remained.

Then Harkness discovered that McCallant had his house filled with boarders, was making money, and had never been a case of smallpox in the place.

Quarantine Removed.

Washington, Dec. 22.—The quarantine against Canada, because of the epidemic of foot and mouth disease in New England was removed by Secretary Wilson. The order takes immediate effect and permits cattle, sheep and other live stock to be shipped out of the state without restriction. The quarantine remained in full force as to the other states prescribed in the order issued Nov. 27 last. The advice received by the Department of Agriculture shows that up to date 551 cattle have been killed on account of the epidemic.

No Changes Coming.

Rumors have been doing some for several days in regard to intended changes in the staff and government of the Industrial School, Port Hope. It has been said that Rev. C. J. Boulden, M.A., of Brockville, has become headmaster, but both the school and the government have denied the rumor. Bishop Sweetman stated that he knew of it and if any were to be made he would certainly be constant of them.

Score's for Gift Goods.

Ladies are often perplexed as to what they can give their male relatives and bachelor friends. This query was solved at 77 King-street West, R. Score & Son's is headquarters for the smart men's things—the newest novelties at popular prices. For convenience of those who cannot conveniently shop during the day, Score's store will remain open evenings.

Picked Up Ten Survivors.

Boston, Mass., Dec. 22.—The fishing schooner Manassett arrived here early today, having on board ten survivors of the wrecked schooner Frank A. Palmer and Louisa B. Gray, which were in collision Wednesday night off Thatcher's Island. Fifteen of the crew were either killed in the collision, drowned or died from exposure after the accident. It is reported that the crew took a small boat.

EARL LOST MONEY AT CARDS

Lord Rosslyn Causes Arrest of Man With Whom He Played on the Euturia.

TRICKED OUT OF \$1500, HE SAYS

Man Who Invented a System Had to Pay Prisoner's Cab Hire.

New York, Dec. 22.—The Earl of Rosslyn, after perfecting a gambling system, which he guarantees can break the bank at Monte Carlo, confessed that he was tricked out of \$1500 by card sharp on the steamship Euturia. The sharp allowed the Earl to play in a poker game with them. Later the man with the "system" lost \$2000. He places the entire transaction under the heading "tricking it in."

When the Earl arrived to-day on the Cunard liner he caused the arrest of Jerome McKelvey, a passenger, whom he charged with fleeing him out of the \$1500. McKelvey says he is 38 years old and a "capitalist" of Harrisburg, Pa., objected to the publicity of a ride in the surface car from the Cunard pier to police headquarters with the detectives. Moody and Brown, who took him in custody, so a cab was hired.

Earl Pays for Cab.

At the end of the journey Lord Rosslyn was politely asked to give over \$2 to the driver, who says he is a "good fellow" and would not mind giving the Earl a ride home.

It is said that the English Earl, whose "system" has made him famous, would have been the matter to-day, but that C. B. Watt and H. R. Stetson, purser of the Euturia, had just passed a passenger train, and the engineer had just blown a whistle for a crossing when a passenger car while others think that a stone hurled from the cab window may have caused the death.
