

CHRISTMAS GREETING

Means so much more when something goes wrong. What is more suitable than a **NIGHTY PRESENTS PICTURE**? We have an immense stock and are offering reduced prices for the Christmas trade.

E. N. HUNT, 190 Dundas Street

A Lover's Triumph.

Here he learned something of Annie Dale's story, for Dyer's inquiries and interests in the same person had revived memories regarding that sad romance, and it had become a common theme since.

Annie Dale's grave, and the house where she had lived, were pointed out to Geoffrey, and he went by himself to visit them.

He came to the dismantled home first, and walked round and round it, as if he were looking for something.

He then went to the house where she had lived, and stood in the doorway, looking in at the empty rooms, and wondering if he should ever know if this had really been the home of his mother, and under what circumstances she had lived there; whether she had been a loved and honored wife, or whether her early death had been caused by some secret sorrow that had broken her heart.

He knew there had been another visitor there before him—although he had been told nothing regarding the stranger's visit of the week previous—for the broken step and the trampled grass gave ample evidence of that fact.

He wondered if it could have been the man who had so suddenly fled from Saratoga after meeting him, who, perhaps, been driven there by sorrow and remorse to look once more upon the ruin he had wrought.

He grew more and more fearful that the story of his birth must be a sorrowful one, for it was evident that no one bearing the name of William Dale had ever resided in Port Union.

He would have been able to trace the man beyond that point at all, but for his accidental meeting with the old miner, who had owned an interest, and thus been able to direct them to this remote spot.

If William Dale had never lived at Port Union, why had he registered from that place? If he was now living at Port Union, and his name was not William Dale, why had he used that address again after the lapse of so many years?

There was something very mysterious about the whole matter, and it began to seem like a hopeless puzzle to the young man.

He finally left the house, and bent his steps toward the small inclosure where, in the gathering dusk, he could just see the pure white head-stone gleaming among the vines that grew all around it.

He entered the place and approached the spot, noting that here, and there, were signs of a recent visitor, and knelt down to read the name that had been inscribed upon the spotless marble.

"Annie," he read, and the single name sent a thrill through every fiber of his being.

Here, too, there seemed evidence that there was some sad tale of love and suffering connected with the life of the girl who had been buried there, for had she been alone, would not a fond husband have wished the name that he had given her also inscribed there?

"Oh, if I could only know!" Geoffrey groaned within himself, as he bowed his head upon the stone, feeling completely baffled, and as if all trace must end here. "Was this woman my mother? She was something to William Dale, but William Dale is something to me, or he would never have betrayed so much emotion upon meeting me, and died from grief."

"Good heavens!" he added aloud, "there must be some way to solve these questions. Oh, if the Fates would but guide me to someone who could tell me how to unravel this mystery."

"Ah! Well, youngster, I shouldn't wonder if I was ever man. What'll ye give for a prettier love story than ever was written?"

CHAPTER XXVI.

Geoffrey started to his feet as if electrified, at these unexpected words that fell upon his ears, and found himself face to face with a man of perhaps twenty years, his face seemed and browned by hardships and exposure, rough in appearance, uncouth in dress, and with an anxious, alert air about him, which conveyed the impression that he feared being identified and apprehended for some reason or other.

"Who are you?" Geoffrey sternly demanded, for he knew that country was not the safest place in the world, and it flashed upon his mind that the man might be a robber, and had followed him there with some evil intent.

"Don't all right, I've no wish to harm ye, sir," was the reassuring response, as the newcomer appeared to read his thought, "and I guess it don't matter much who I be, provided, I can tell ye what ye seem to want to know about this here grave."

"Not replied Geoffrey, his suspicions instantly vanishing. "If you can give me the history of the poor lady who lies here, and tell me where I can find the man who brought her here, I'll pay you well, and ask no further questions about yourself. But how came you to follow me to this place?"

"I didn't follow ye, I was sittin' yonder, behind that clump of spruce, when ye hove in sight, I didn't mean to show up at all, but when I saw ye so eager by this here tombstone, I was kind of curious to know what yer game was, and crept on ye unawares. But I say, youngster," the man added, suddenly taking a step forward, and peering into Geoffrey's face, "who are you?"

The rough fellow had actually grown pale, and his bright eyes flashed through his tightly locked teeth. "I am an eastern man," answered Geoffrey, evasively.

"Is—ye name Geoffrey?" the man demanded, in a hoarse whisper. "Hail Geoffrey Dale!"

"Great Christopher! I—I thought so. Something about yer name, or on over me the minute I laid eyes on ye," said the man, tremblingly and terribly agitated. "Boy—boy," he continued, in a tone of fear, "how on earth came ye and me to turn up together here, of all places in the world?"

Geoffrey was amazed at his words. The young man knew something about him, and with that knowledge, he was not in the least surprised that the young man's mind reverted to the condition in which Mr. Huntress had found him—a poor abandoned imbecile. Had this rough creature known of that, or had anything to do with it?

His next words enlightened him somewhat. "Ye're all right, too, in the upper story, and ye can talk," he muttered. "Where have ye been all these years?"

"All these years? How many years?" queried Geoffrey with a rapidly beating heart.

"It's eight years ago last spring, since I set eyes on ye, and, little thought it should ever come to pass, never with that look on yer face. Where ye been, I say?"

"Eight years ago last spring," began Geoffrey, gravely, while he closely watched every expression on his companion's countenance. "It was one day, wandering, a poor, demented boy, in the streets of New York city. My strange appearance and actions attracted a mob of archbishops, who began to make sport of me. They were in the midst of their cruelty when a carriage stopped near me, and a beautiful little girl beckoned to me, at the same time opening the door of the carriage, and I stepped in. I was taken to a room, and the next moment was driven away in safety, much to the surprise of the boys. The girl's name, which I have never forgotten, was Annie Dale. She was a physician, who made an examination of my case, and reported that my demented state had been caused by a heavy blow on the head several years before."

Geoffrey saw the man shudder, as he made this statement, while a low exclamation of pain escaped him, and his suspicion began to grow. "It was found," he resumed, still watching the man, "that a portion of the bone was pressing on my brain, which caused temporary paralysis, and made me an imbecile."

To be Continued.

Young Again.

Do You Wish to Avoid the Infirmities of Old Age?

Paine's Celery Compound an Invigorator and Life-Giver for the Old.

Old people seem to grow weaker as the months go by. They are troubled with constipation, flatulency, indigestion, rheumatism, indigestion and neuralgia. They have had one or more of these troubles for years. Their diseases are truly all of nervous origin.

Paine's Celery Compound is the world's great specific for all the difficulties that beset old people. Its regulating influence on the liver, bowels and kidneys removes the disorders that old people suffer from. Paine's Celery Compound is recommended by the best medical practitioners as a great stimulant to the vital powers, productive of appetite, and a wonderful promoter of digestion.

When you are old use Paine's Celery Compound; it will strengthen and build you up, and add years of comfort and peace to your life.

In the past, multitudes of people, reduced in vitality and strength, and on the road to becoming life-long invalids, have been made hale, hearty and strong by using nature's great life-giving medicine.

"See that you get 'Paine's,' the kind that makes old people feel young, and that always makes the sick well."

These are the days when the man with several pokes fun at the man with one wheel.

THE MEDICINE FOR LIVER AND KIDNEY COMPLAINT.—Mr. Victor Auger, Ottawa, writes: "I take great pleasure in recommending to the general public Paine's Pills as a cure for Liver and Kidney complaint. I have detected for the last three years with leading physicians, and have taken many medicines that were recommended to me without relief, but after taking eight of Paine's Pills I was quite relieved, and now I feel as free from the disease as before I was troubled."

After the honeymoon is over the man generally has all the bashfulness in the family.

It is often a mystery how a cold has been "caught." The fact is, however, that when the blood is poor and the system depressed, one becomes peculiarly liable to diseases. When the appetite or the strength fails, Ayer's Sarsaparilla should be taken without delay.

The old thing about marriage is that a fool is just as likely to make a desirable one as the wise people.

Worms cause feverishness, moaning and restlessness during sleep. Mother Graves' Worm Expeller is pleasant, sure and effectual. If your druggist has none in stock, get him to procure it for you.

Fitzgerald, Candrett & Co., 169 DUNDAS STREET.

The Oil Center

Hon. W. S. Fielding and Hon. W. Paterson Visit Petrolia.

Cordially Welcomed by the Leading Men of the Town.

An Interesting Trip Through the Oil Region.

Mr. Hyman Shoots a Well—The Processes of Oil Refining Witnessed—A Sarnia Manufacturer Wants a Chance at the American Market—Handicapped by the Duties.

The hospitality for which Petrolia is pre-eminent was extended yesterday to Hon. W. S. Fielding, the Minister of Finance, Hon. W. Paterson, the Controller of Customs, and other distinguished visitors who accompanied them. The express drive to leave London at 11:12 a.m., being two hours late, a special train of two coaches was made up at the G. T. R. station here, departing at 1:15, and reaching the oil metropolis about 1 p.m. With the Minister and Controller were Mr. Charles Hyman, Mr. T. S. Hobbs, M.P.P., Mr. Moses Masoret, Mr. W. S. Calvert, M. P. for West Middlesex; Mr. John Fraser, M. P. for East Lambton; Mr. Wm. McGregor, M. P. for North Essex; Mr. C. B. Burns, H. C. for Essex, and Mr. J. H. Fanning, private secretary to Mr. Fielding, and the representatives of The London Advertiser, the Toronto Globe, and the Toronto Mail and Empire. At the coming day party were joined by Mr. J. E. Lester, M. P. for West Lambton; Mr. Charles Mackenzie, ex-M. P. for West Lambton; Mr. Harry Gorman, editor of the Sarnia Observer, and Mr. Frank Ward, of Wyoming, a leading oil dealer.

The whistles of the railways shrieked a welcome as the train pulled into Petrolia. At the station the visitors were met by a large concourse of prominent citizens, and driven to the magnificent Hotel Iroquois, where a capital dinner was served. The local reception committee, Mr. James Peate, president of the Petrolia Liberal Association, presided, and among the well-known men present, besides the Ministerial company, were Mr. J. H. Fairbank, W. E. Hammon (president of the reception committee), Charles Jenkins, John Walker, Mayor Edwards, E. A. Archer, J. D. Noble, H. C. Corry, Geo. Fairbank, George Stinson, David Trotter, Robert Jackson, Dr. Calder, J. J. Bell (president of the Liberator's Association), Isaac Greenstone, John Dale, Alex. McQueen, Ed. Julien, J. H. Jackson, John B. Smith, and others.

The trip to Petrolia was not a part of the pre-arranged programme of the Liberal commission, but Mr. Fielding, with his usual thoroughness, wished to inspect the oil region and acquaint himself with its character and magnitude, which can scarcely be comprehended through any description, however graphic. The oil men decided to submit their views on the subject at a later period, when they will send an influential deputation to Ottawa, to present their case to the government, which cannot be elaborated at short notice. They therefore arranged to give their guests an opportunity to see the oil region, and very admirably succeeded.

DRIVING THROUGH THE OIL REGION. The visitors, directly after dinner, were driven in comfortable carriages through the oil metropolis of the oil district. The forest of derricks, dotting the landscape, planted in farms, orchards, meadows, moors, lanes, ditches, front yards, back yards, bounding the horizon, north, south and west, presented the most extraordinary sight of miles of shafting and thousands of pumps; the multitude of tanks, engine houses, refineries, and other tokens of this immense industry formed a spectacle which, if not aesthetic, was wonderfully impressive, and must have been a revelation to those who saw it for the first time. One glimpse of this territory is more effective a hundred times than the best statement that it contains 8,000 wells, producing 800,000 barrels per annum, and representing nearly \$10,000,000.

MR. HYMAN'S GOOD SHOT. Several stops were made to allow the party a close examination of the modern operations of oil production. Messrs. Fielding and Paterson first tramped through the clinging mud (which shared the affection shown by the visitors) to the well, and saw the process of drilling a well on the property of the Ontario Oil and Land Company. Nearly 400 feet of perpendicular shafting was drawn from the bowels of the earth with remarkable facility. The visitors were next privileged to witness an even more interesting thing—the shooting of a well on Mr. J. L. Englehart's territory. Mr. C. S. Hyman's reputation as a good shot earned him the honor of applying the fuse. The multi-

ed explosion of the nitro-glycerine was followed by a huge geyser of black fluid, which shot up 50 feet. The results were pronounced highly satisfactory by experts. Some time was also spent in Mr. Englehart's fine pump-house, where resides the power that works 200 pumps. The ample and cleanly machinery was much admired.

AT THE IMPERIAL WORKS. After another detour through the oil metropolis, the carriage pulled up at the Imperial Oil Company's huge works, which cover 60 acres of ground. Nearly an hour was spent in the various departments, studying the complicated processes to which petroleum is subjected, admiring their ingenuity and rapidity, and commending the system which governs the diverse branches of the establishment with automatic regularity. The visitors were shown, in order, the tin shops, the bleaching house, where the oil is bleached before shipping, the various departments, studying the complicated processes to which petroleum is subjected, admiring their ingenuity and rapidity, and commending the system which governs the diverse branches of the establishment with automatic regularity. The visitors were shown, in order, the tin shops, the bleaching house, where the oil is bleached before shipping, the various departments, studying the complicated processes to which petroleum is subjected, admiring their ingenuity and rapidity, and commending the system which governs the diverse branches of the establishment with automatic regularity.
