# Elk Lake --- Result of Tenders for the Gowganda Town Lots --- Gowganda

# FACTS FOR INVESTORS!

IN OFFERING the stock of the Montreal River Consolidated, Limited, we do so largely on the grounds of its investment possibilities.

The small capitalization (\$500,000) and the large mineralized acreage-400 acres offer an exceptional opportunity to those of small means to participate in the great mineral wealth of New Ontario. Many investors have already taken advantage of the exceptional offering which we are making.

Until our supply of 60,000 shares of Montreal River Consolidated, Limited, is exhausted we will fill orders at the low price of 50 cents per share, par value \$1.00 per share.

On seven of the ten claims owned by this Company silver values have already been found, and development work during the incoming summer is expected to prove that the Company's properties are the equal of many of the Cobalt mines.

We expect to close out the stock we are now offering in a short time, and applications for the shares should therefore be made without delay.

It is altogether likely that after sinking is done on some of the veins where free silver has been found that the Company be recapitalized, and holders of the present issue will receive a bonus of four or five shares in the new Company for each share held in the present Company, This would be similar to the purchase of the present issue at about 10 cents per share.

This is a proposition which any one seeking a remunerative investment cannot overlook.

## CALCITE LAKE A RECENT DISCOVERY.

-Photo by Bogart, Cobalt.

Calcite Lake is one of the countless bodies of water that dot the silver fields of the north country. As the reader has doubtless already inferred, the name has been given to the lake since the advent of the prospec-the reader has doubtless already inferred, the name has been given to the lake since the advent of the prospec-the reader has doubtless already inferred, the name has been given to the lake since the advent of the prospec-the reader has doubtless already inferred, the name has been given to the lake since the advent of the prospec-the reader has doubtless already inferred, the name has been given to the lake since the advent of the prospec-tory found calcite there. Hitherto it was an unmapped and unknown lake, except to the Indians, who occator, who found calcite there. Hitherto it was an unmapped and unknown lake, except to the Indians, who occasionally trapped or fished in its waters, which abound with trout.

The Ojibways called Calcite Lake and Lost Lake the Twin Lakes, both being joined by a little river, which in the spring and fall becomes a roaring torrent. This river is said to be fairly alive with spekled trout.

Whoever discovered Calcite Lake is not known. S. C. McLauchlin, of the Bartlett Mines, and who first discovered silver on those remarkable properties, prospected along Calcite Lake in 1907. Mr. Merrill's prospectors also worked along the lake and located. The discovery of Calcite Lake by white men may be credited to a Mr. Sanderson, formerly of Toronto, who, when prospecting in the north, became separated from his party and got He stumbled on Lost Lake in his wanderings, and thus it got its name. He located his cabin on the Frank Helman, Berlin, \$75; lot 44, F. east shore of Lost Lake, and Sanderson's cabin is a landmark there to-day. It is said that Sanderson Bickford, \$57.20; lot 44, R. N. Simpson shortly after discovered Calcite Lake by following the little river which runs into Lost Lake at its southern extremity. Calcite Lake lies about eight miles southeast of Lake Gow Ganda.
