

The rustling wind with furious roar,
Bespeaks a wintry death;
Now raging—now is heard no more,
For winter yields its breath.

Full Moon, 1st day, 2h. 39m. afternoon
Last Quarter, 9th day, 1h. 4m. morning
New Moon, 15th day, 5h. 24m. afternoon
First Quarter, 23d day, 5h. 48m. morning
Full Moon, 31st day, 6h. 4m. morning

Maple Sugar.—This sugar, made with care, is superior to much that is imported. It should gratify our love of country, to spread our tables with the fruits of our own soil, which were raised by our industry, and for which we are dependent on none but our Maker. Improve therefore, the season for making sugar as soon as it arrives, and with as little expense of wood as possible.

Cows.—Keep no more cows than you can keep well. One cow well fed will give as much milk as two treated indifferently, and produce more butter. If a cow be wintered badly, she will rarely recover during the summer so as to become profitable to the owner. Cows should by all means be kept under a shelter in extreme weather; particularly those which give milk, or a failure in the quantity of milk will be experienced. Sweet potatoes, carrots, pumpkins, and ground oats, are unquestionably among the best articles of food for milch cattle. These cause the milk and butter to assume a fine flavor and a rich color, and at the same time the quantity and quality are greatly increased.
