

MACMILLAN HAS BOY OF 15 IN HIS EXPEDITION

Kenneth Rawson Goes North as Full-Fledged Sailor

DOES HIS SHARE OF WORK ON VOYAGE

Father is Wealthy Financier in Chicago — Mother on Hand to Say Good-bye.

By GEORGE BRUIT.

WISCASSETT, Me., June 29—Kenneth Rawson, 15, sailing toward world nights and venturesome battle for existence under the midnight sun, can snap his fingers at the Rover Boys and all the heroes of G. A. Henty.

Northward bound with the MacMillan Arctic Expedition, the lad's daily life is becoming more and more the stuff youths' dreams are made of.

There was the exuberant realization of this good fortune in Kenneth's farewell gesture. He found a perch in the rigging of the Bowdoin as she left the dock and pulled down the sheepskin river, answering the waving handkerchiefs of his mother and father who had brought him here in their private car.

He was off, as any super-boy of fiction might have started, to visit Etah and other curiously-named ports on frozen seas, to see the Eskimo in his igloo, to hunt the walrus, to endure and triumph as any explorer must. The 15-year-old boy looked suddenly grown up, there on the rigging.

To his parents he still was little Kenneth. The father, Frederick H. Rawson, wealthy chairman of the board of the Union Trust Co. in Chicago, could talk about it being a fine thing for the lad, but he was thinking most about the day when the boats should sail back up the river again.

A Real Sailor. Although only 15, Kenneth will be more than a passenger on the expedition. During his summer vacations from the Hill School in Pennsylvania he has taken strenuous play on the water.

His father, a sailor, has used many of his own experiences to teach Kenneth the ropes of seamanship. He is a "working member" of the Bowdoin's crew.

Private Log. The boy is going to keep his own private log of the expedition. This diary giving a boy's eye view of the Polar circle should be a humane document to compare almost with Marco Polo's travels.

Kenneth was shipped for the expedition through the influence of E. E. McDonald, the Chicagoan who is radio expert and second in command. The father enlisted McDonald's aid, and Lieut. Com. MacMillan at length consented.

When the Bowdoin left, Kenneth was too busy and excited to care for the average routine of a boy's interests. Only the high spots could be touched in that great moment. Someone asked him where he was hunting and fishing gear which he was taking along.

"I don't know, Dad stowed it somewhere," he managed to answer. The slender, blonde youth in the old dunnage and the stained tennis shoes will be getting around to his gun and his fishing line later.

BEACON LIGHT CLASS. Members of the Beacon Light Class met last evening with the president, Mrs. E. M. Straight, in the chair. Refreshments were served by Mrs. Hamm.

NOTICES OF BIRTHS, MARRIAGES and Deaths, 50 cents.

DEATHS. ROBINSON—Suddenly, in Roxbury, Mass., on June 29, Mrs. Wm. S. Robinson, leaving to mourn her husband and son, Herman R., of Fairville, N. B.

IN MEMORIAM. SMITH—In loving memory of Ada M. wife of Geo. J. Smith, died July 1, 1917.

Planets Should Be of Great Interest to Star Gazers During Month.

WASHINGTON, June 30.—The big summer show in the heavens comes in July for the five brightest planets—Mercury, Venus, Mars, Jupiter and Saturn—will all be above the horizon at the same time for the greater part of the month.

On July 28 Mercury will reach its greatest eastern elongation when it will be more than 27 degrees east of the sun. This, the American Nature Association points out, is within one degree of its greatest possible distance from the sun and great enough to enable you to pick it up easily in the twilight after sunset.
