

## The Tractor to Buy

ARE you one of the many farmers who need more power to handle the farm work properly? Do you have to work with less help than you need?

If so, you need an International kerosene tractor. The size that gives you power for your heaviest load will handle all the work. Internationals use only as much fuel as the load requires. They are made to work with farm machines—the kind you are now using—and special hitches are provided for all kinds of field and road work. Their belt pulleys are large enough to prevent slippage, run at correct speed, and are set high enough to keep the belt off the ground. They all use kerosene or other low-grade fuels which means a big saving in operating expense.

### The Company to Buy From

You know that this organization has supplied farmers with high-grade machines for nearly 88 years. You know that our tractors have furnished satisfactory farm power for more than 12 years. We have far too much at stake to market machines of any but the highest standards of quality. We expect to come back some day and sell you some other machines. In every sale we try to build for the future.

### Tractor Service Whenever Needed

In line with this policy, we have developed a service organization which now consists of 16 branch houses and many thousands of loyal local agents, wide awake and attentive to the needs of their customers. Service is a very essential part of any tractor sale. When you buy an International kerosene tractor you buy with it the assistance of an organization that is fully equipped to keep your tractor working steadily.

### International Tractor Service

International tractors, all using kerosene for fuel, are made in 8-16, 10-20, and 15-30-H. P. sizes. A line to the nearest address below will bring you full information about all our tractors.
